Race and Racism Peter Jackson, 2003-09-02 First Published in 1987 In September 1985 the Social Geography Study Group of the Institute of British Geographers held a three day conference at Coventry Lanchester Polytechnic on the subject of Race and Racism The present volume is a selection of essays derived from some of the papers that were given at the conference together with one newly commissioned paper by Susan Smith and an introductory essay **Handbook of Cultural Geography** Kay Anderson, 2003 The editors of this genuinely brilliant book seem to dare the reader to argue with them from the first page I would encourage everyone interested in cultural geography or in the cultural turn within a whole set of human geographies to do likewise ANNALS OF THE ASSOCIATION OF AMERICAN GEOGRAPHERS A richly plural and impassioned re presentation of cultural geography that eschews everything in the way of boundary drawing and fixity A re visioning of the field as a set of engagements with the world it contains a vibrant atlas of ever shifting possibilities Throbbing with commitment and undisciplined in the most positive sense of that term it is exactly what a handbook ought to be Professor Allan Pred Department of Geography University of California at Berkeley Ten sections with a detailed editorial introduction the Handbook of Cultural Geography presents a comprehensive statement of the relation between the cultural imagination and the geographical imagination Emphasising the intellectual diversity of the discipline the Handbook is a textured overview that presents a state of the art assessment of the key questions informing cultural geography while also looking at resonances between cultural geography and other disciplines **The SAGE Handbook of Geographical Knowledge** John A Agnew, David N Livingstone, 2011-03-04 Broad in scope and edited by two massive names in geography this is a critical exploration of how the field has emerged and fared over the course of its modern institutionalization

Multiculturalism in Practice Suzanne Audrey, 2017-11-01 This title was first published in 2000 Patterns of racism and disadvantage vary throughout Britain yet most British research continues to focus on data from England and Wales This Scottish study allows distinctions to emerge which contribute to our understanding of the complex processes of discrimination and integration Looking first at the history of Irish Jewish and Italian migration to Scotland attention is then focused on the Pakistani population Whilst acknowledging the persistence of racism the author uses original quantitative and qualitative data to examine the ways in which immigrants and their descendants assert their priorities The book questions whether focusing on minority ethnic groups as victims of racism is the most effective strategy in undermining exclusionary practices

Fostering Transformative Research in the Geographical Sciences National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on Identifying Transformative Research in the Geographical Sciences, 2019-03-22 The central purpose of all research is to create new knowledge In the geographical sciences this is driven by a desire to create new knowledge about the relations between space place and the anthropogenic and non anthropogenic features and processes of the Earth But some research goes beyond these modest aims and creates new opportunities for further research or affects the process of knowledge acquisition more broadly or changes the way other researchers in a domain think about the world and go about their business Due to its positive impacts transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear

Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future

Geographies of Muslim Identities Peter Hopkins, 2016-04-15 In recent years geographies of identities including those of ethnicity religion race and gender have formed an increasing focus of contemporary human geography The events of September 11th 2001 particularly illustrated the ways in which identities can be transformed across time and space by both global and local events of a social cultural political and economic nature Such transformations have also demonstrated the temporal and spatial construction of hate and fear and of increasing incidences of Islamophobia through the construction of Muslims as the Other As the social

Critical White Studies Richard Delgado, Jean Stefancic, 1997 No longer content with accepting whiteness as the norm critical scholars have turned their attention to whiteness itself In *Critical White Studies Looking Behind the Mirror* numerous thinkers including Toni Morrison Eric Foner Peggy McIntosh Andrew Hacker Ruth Frankenberg John Howard Griffin David Roediger Kathleen Heal Cleaver Noel Ignatiev Cherrie Moraga and Reginald Horsman attack such questions as How was whiteness invented and why How has the category whiteness changed over time Why did some immigrant groups such as the Irish and Jews start out as nonwhite and later became white Can some individual people be both white and nonwhite at different times and what does it mean to pass for white At what point does pride in being white cross the line into white power or white supremacy What can whites concerned over racial inequity or white privilege do about it Science and pseudoscience are presented side by side to demonstrate how our views on whiteness often reflect preconception not fact For example most scientists hold that race is not a valid scientific category genetic differences between races are insignificant compared to those within them Yet the one drop rule whereby those with any nonwhite heritage are classified as nonwhite persists even today As the bell curve controversy shows race concepts die hard especially when power and prestige lie behind them A sweeping portrait of the emerging field of whiteness studies *Critical White Studies* presents for the first time the best work from sociology law history cultural studies and literature Delgado and Stefancic expressly offer critical white studies as the next step in critical race theory In focusing on whiteness not only do they ask nonwhites to investigate more closely for what it means for others to be white but also they invite whites to examine themselves more searchingly and to look behind the mirror
