X22 Rachels Favourite Food at Home Unknown UK Publisher, **Dictionary of Ethics, Theology and Society** Paul A. B. Clarke, Andrew Linzey, 2013-11-05 This Dictionary provides a unique and groundbreaking survey of both the historical and contemporary interrelations between ethics theology and society In over 250 separately authored entries a selection of the world s leading scholars from many disciplines and many denominations present their own views on a wide range of topics Arranged alphabetically entries cover all aspects of philosophy theology ethics economics politics and government Each entry includes a concise definition of the term a description of the principal ideas behind it analysis of its history development and contemporary relevance a detailed bibliography giving the major sources in the field The entire field is prefaced by an editorial introduction outlining its scope and diversity Selected entries include Animal Rights Capital Punishment Communism Domestic Violence Ethics Evil Government Homophobia Humanism Liberation Theology Politics Pornography Racism Sexism Society Vivisection Women s Ordination **Australian Farm Journal** ,1993 **Law's Meaning of Life** Ngaire Naffine, 2009-01-06 The perennial question posed by the philosophically inclined lawyer is What is law or perhaps What is the nature of law This book poses an associated but no less fundamental question about law which has received much less attention in the legal literature It is Who is law for Whenever people go to law they are judged for their suitability as legal persons They are given or refused rights and duties on the basis of ideas about who matters These ideas are basic to legal decision making they form the intellectual and moral underpinning of legal thought They help to determine whether law is essentially for rational human beings or whether it also speaks to and for human infants adults with impaired reasoning the comotose fetuses and even animals Are these the right kind of beings to enter legal relationships and so become legal persons Are they for example sufficiently rational or sacred or simply human Is law meant for them This book reveals and evaluates the type of thinking that goes into these fundamental legal and metaphysical determinations about who should be capable of bearing legal rights and duties It identifies and analyses four influential ways of thinking about law s person each with its own metaphysical suppositions One approach derives from rationalist philosophy a second from religion a third from evolutionary biology while the fourth is strictly legalistic and so endeavours to eschew metaphysics altogether The book offers a clear coherent and critical account of these complex moral and intellectual processes entailed in the making of legal persons *A Philosopher's Guide to Natural Capitalism* Wayne I. Henry, 2023-07-07 This book posits that a sustainable future is possible without abandoning Capitalism In its current form as Consumer Capitalism the organization of the global economy is clearly unsustainable But Capitalism is a malleable concept that has assumed a variety of forms since the 17th century and it can be altered as needed In Part I of this book the author sets out an economic model for a sustainable form of Capitalism referred to in the literature as Natural Capitalism In Part II he abandons exposition in favour of rigorous philosophical analysis and critiques the older but still dominant narrative that underlies Classical Liberalism The narrative

will be reconstructed with great care and analysed to understand why it has been so powerful and enduring and of course why it is no longer appropriate for our current circumstances In Part III he investigates from a normative perspective Classical Liberalism and globalized Capitalism and the economic system it licenses Finally in the conclusion the author draws the threads of the discussion together in a way that emphasizes the differences between the two narratives Classical Liberalism on the one hand and the contemporary version of Progressive Liberalism that nurtures and supports Natural Capitalism on the other This book will be of interest to a broad range of scholars and curious laypersons interested in a clear and interdisciplinary presentation of the issues arising out of climate change including corporate governance social and environmental policy declining social capital and the capacity of democratic institutions to deal effectively with sustainability It will be particularly relevant for students and instructors of philosophy history economics political science social policy and environmental sociology <https://waynehenry.com>
