New Perspectives on Racial Identity Development Charmaine Wijeyesinghe, Bailey W. Jackson, 2012-07-30 For well over a century the United Fruit Company UFCO has been the most vilified multinational corporation operating in Latin America Criticism of the UFCO has been widespread ranging from politicians to consumer activists and from labor leaders to historians all portraying it as an overwhelmingly powerful corporation that shaped and often exploited its host countries In this first history of the UFCO in Colombia Marcelo Bucheli argues that the UFCO s image as an all powerful force in determining national politics needs to be reconsidered Using a previously unexplored source the internal archives of Colombia s UFCO operation Bucheli reveals that before 1930 the UFCO worked alongside a business friendly government that granted it generous concessions and repressed labor unionism After 1930 however the country experienced dramatic transformations including growing nationalism a stronger labor movement and increasing demands by local elites for higher stakes in the banana export business In response to these circumstances the company abandoned production selling its plantations and labor conflicts to local growers while transforming itself into a marketing company The shift was endorsed by the company s shareholders and financial analysts who preferred lower profits with lower risks and came at a time in which the demand for bananas was decreasing in America Importantly Bucheli shows that the effect of foreign direct investment was not unidirectional Instead the agency of local actors affected corporate strategy just as the UFCO also transformed local politics and society

Racism in Europe Neil MacMaster, 2017-03-08 The study of modern racism has tended to treat anti

Semitism and anti black racism as separate and unconnected phenomena This innovative study argues that a full understanding of the origins and development of racism in Europe after 1870 needs to examine the structure and interrelationships between the two dominant forms of prejudice Contrary to expectation anti black racism was not confined to the colonial maritime nations of western Europe but perpetrated even the rural societies of central and eastern Europe Likewise anti Semitism could flourish even in the almost total absence of Jews MacMaster explores the conditions under which modern political movements faced with the crisis of modernity began to draw upon and mobilise the negative stereotypes that through the development of the mass media had become almost universal features of popular culture By weaving together the changing spatial and temporal dimensions of anti Semitic and anti black prejudice the study provides a fresh and more global framework for understanding modern racism Violence Against Women in South Asian Communities Ravi K.
