## **Racing To Regionalize:**

**Racing to the Top** William R. Thompson, Leila Zakhirova, 2019 In the international political economy of the last two millennia there tends to be one state leading the world as the foremost producer of energy and new technology In *Racing to the Top* William R Thompson and Leila Zakhirova argue that the US and China like previous leading countries rely on energy transition or the development of alternative energy in order to make new technology relatively inexpensive to develop and to fuel While the US has historically held the lead its edge in the global energy economy appears to be eroding and as energy leadership diminishes so does the country's position in world politics Thompson and Zakhirova take a long view in order to show what will be necessary for a new power to emerge as the system leader then map a path forward for energy policy Informed by a deep knowledge of world history political economy and environmental technology this book is the first complete overview of energy transitions over the past thousand years *Racing to Regionalize* Neil Harrison, 1999 4 Who Got What and Why

(State),1934      *Mapping Strategic Knowledge* Anne Sigismund Huff,Mark Jenkins,2002-01-31 This book outlines a number of different tools for mapping strategic knowledge and thus making knowledge more accessible Anne Sigismund Huff and Mark Jenkins have brought leading academics together in this work to provide informed analysis and theory to illustrate the contribution of knowledge mapping to central issues in strategy and organization theory to consider the contribution of these studies to management practice to address practical theoretic and methodological limitations of these tools including several software tools now available to facilitate mapping Each section of the book provides a table which charts the chapters main contents key findings and implications for knowledge management An annotated bibliography is provided at the end of the book as a resource for readers who may wish to become more familiar with relevant and existing literature in this area Mapping Strategic Knowledge is relevant to those interested in knowledge management primarily academics and consultants in the area of strategic management but also academics in the area of organization theory      *The regional travel guide for Lonan (Isle of Man)* ,2025-09-24      *Racing to the Bottom?* Kathryn Harrison,2011-11-01 The spectre of a race to the bottom is increasingly prominent in debates about globalization and also within federal systems where the mobility of both capital and individuals prompts fears of interjurisdictional competition with respect to taxes and environmental and welfare standards While there has been no shortage of either political rhetoric or academic theorizing on this subject empirical studies have been in shorter supply This volume seeks to fill that gap by asking Are Canadian provinces engaged in a race to the bottom and if so what are the consequences The contributors apply insights from economics and political science to several policy fields What emerges is a theoretical and empirical picture of interprovincial competition that shows it to be more complex than the popular image of a race to the bottom and that also contradicts predictions of an inexorable downward spiral This timely practical volume will be of interest to public policy practitioners as well as to students and scholars of economics and political science      *LA Sports* Wayne Wilson,David K. *Reconsidering the East Asian Peace* William R. Thompson,Thomas J. Volgy,2024-08-01 This volume re examines the notion of the East Asian peace arguing that it requires updating for the current and near future context of US Chinese rivalry The East Asian peace refers to the remarkable change in conflict levels in eastern Eurasia over the past 80 years or even the past 130 years or so Prior to the late 1970s East Asia was regarded as the most conflictual region on the planet Although insurgencies have continued in places such as Myanmar Thailand and the Philippines after the 1980s East and Southeast Asia became one of the world s least conflictual regions Geopolitics and economic development worked hand in hand to reduce conflict in the region and in this respect the East Asian peace has been a confluent peace The general problem with a confluent peace is that the factors that shape it evolve over time and the specific circumstances in question seem to be evolving in a different direction with East Asia shaping up to be the most central locale of the contest between US and Chinese hegemony both regionally and perhaps globally This book argues that the idea of the East Asian peace now requires adjustment to the current and near future context The more general arguments presented here focus on alternative interpretations of how regional peace and order should be interpreted while the more specific arguments involve interpretations of Chinese and other countries behavior in the context of the heightened rivalry between China and the United States This book will be of much interest to students of East Asian politics peace studies foreign policy and international relations
