Resonating Bodies:

Resonating Bodies Lynne Alexander, 1989 Resonating Bodies Alexander, Nina, Lynne Alexander, 1993-02-01 The Oxford Handbook of Social Media and Music Learning Janice L. Waldron, Stephanie Horsley, Kari K. Veblen, 2020 The Oxford Handbook of Social Media and Music Learning provides fascinating insights into the ways in which social media musical participation and musical learning are increasingly entwined **Musicality in Theatre** David Roesner, 2016-04-29 As the complicated relationship between music and theatre has evolved and changed in the modern and postmodern periods music has continued to be immensely influential in key developments of theatrical practices In this study of musicality in the theatre David Roesner offers a revised view of the nature of the relationship The new perspective results from two shifts in focus on the one hand Roesner concentrates in particular on theatre making that is the creation processes of theatre and on the other he traces a notion of musicality in the historical and contemporary discourses as driver of theatrical innovation and aesthetic dispositif focusing on musical qualities metaphors and principles derived from a wide range of genres Roesner looks in particular at the ways in which those who attempted to experiment with advance or even revolutionize theatre often sought to use and integrate a sense of musicality in training and directing processes and in performances His study reveals both the continuous changes in the understanding of music as model method and metaphor for the theatre and how different notions of music had a vital impact on theatrical innovation in the past 150 years Musicality thus becomes a complementary concept to theatricality helping to highlight what is germane to an art form as well as to explain its traction in other art forms and areas of life The theoretical scope of the book is developed from a wide range of case studies some of which are re readings of the classics of theatre history Appia Meyerhold Artaud Beckett while others introduce or rediscover less discussed practitioners such as Joe Chaikin Thomas Bernhard Elfriede Jelinek Michael Thalheimer and Karin Beier Resonance Hartmut Rosa, 2019-07-26 The pace of modern life is undoubtedly speeding up yet this acceleration does not seem to have made us any happier or more content If acceleration is the problem then the solution argues Hartmut Rosa in this major new work lies in resonance The quality of a human life cannot be measured simply in terms of resources options and moments of happiness instead we must consider our relationship to or resonance with the world Applying his theory of resonance to many domains of human activity Rosa describes the full spectrum of ways in which we establish our relationship to the world from the act of breathing to the adoption of culturally distinct worldviews He then turns to the realms of concrete experience and action family and politics work and sports religion and art in which we as late modern subjects seek out resonance This task is proving ever more difficult as modernity's logic of escalation is both cause and consequence of a distorted relationship to the world at individual and collective levels As Rosa shows all the great crises of modern society the environmental crisis the crisis of democracy the psychological crisis can also be understood and analyzed in terms of resonance and our broken relationship to the world around us Building on his now classic work on acceleration Rosa's new book is a major new

contribution to the theory of modernity showing how our problematic relation to the world is at the crux of some of the most pressing issues we face today This bold renewal of critical theory for our times will be of great interest to students and scholars across the social sciences and humanities

Echo's Chambers Joseph L. Clarke, 2021-06-08 A room's acoustic character seems at once the most technical and the most mystical of concerns Since the early Enlightenment European architects have systematically endeavored to represent and control the propagation of sound in large interior spaces Their work has been informed by the science of sound but has also been entangled with debates on style visualization techniques performance practices and the expansion of the listening public *Echo's Chambers* explores how architectural experimentation from the seventeenth through the mid twentieth centuries laid the groundwork for concepts of acoustic space that are widely embraced in contemporary culture It focuses on the role of echo and reverberation in the architecture of Pierre Patte Claude Nicolas Ledoux Carl Ferdinand Langhans and Le Corbusier as well as the influential acoustic ideas of Athanasius Kircher Richard Wagner and Marshall McLuhan Drawing on interdisciplinary theories of media and auditory culture Joseph L Clarke reveals how architecture has impacted the ways we continue to listen to talk about and creatively manipulate sound in the physical environment

The Art of Resonance Anne Bogart, 2021-08-26 What is artistic resonance and how can it be linked to one's life and one's art This latest book of essays from legendary theatre director Anne Bogart considers the creation of resonance in the artistic endeavour with a focus on the performing arts The word resonance comes from the Latin meaning to re-sound or sound together From music to physics resonance is a common thread that evokes a response and in general is understood as a quality that makes something personally meaningful and valuable For Bogart curiosity is a key personal quality to be nurtured throughout life and that very same curiosity as an artist thinker and human being Creating pathways between performance theory art history neuroscience music architecture and the visual arts and consistently forging new thought paths the writing draws upon Anne Bogart's own life and artistic journeys to illuminate potent philosophical ideas Woven with personal anecdotes stories and reflections this is a book that will be of interest to any theatre artist and anyone who reflects on the power of the arts of theatre making and what it means to be engaged in the artistic process

Beyond Einstein's Universe Joseph Zammit, 2013 *Front Lines of Community* Hermann Kappelhoff, 2018-04-23 Based on the premise that a society's sense of commonality depends upon media practices this study examines how Hollywood responded to the crisis of democracy during the Second World War by creating a new genre the war film Developing an affective theory of genre cinema the study's focus on the sense of commonality offers a new characterization of the relationship between politics and poetics It shows how the diverse ramifications of genre poetics can be explored as a network of experiential modalities that make history graspable as a continuous process of delineating the limits of community

Revival: Dictionary of the Organ (1914) Carl Locher, 2018-12-20 A technical volume on the construction of organs Comprises an alphabetically arranged detailing of the various components of organs their

characteristics and uses Also includes a study of organ building Dictionary of the Organ Carl Locher,1914 The Age of Electroacoustics Roland Wittje,2025-02-18 The transformation of acoustics into electro acoustics a field at the intersection of science and technology guided by electrical engineering industry and the military At the end of the nineteenth century acoustics was a science of musical sounds the musically trained ear was the ultimate reference Just a few decades into the twentieth century acoustics had undergone a transformation from a scientific field based on the understanding of classical music to one guided by electrical engineering with industrial and military applications In this book Roland Wittje traces this transition from the late nineteenth century work of Hermann Helmholtz to the militarized research of World War I and media technology in the 1930s Wittje shows that physics in the early twentieth century was not only about relativity and atomic structure but encompassed a range of experimental applied and industrial research fields The emergence of technical acoustics and electroacoustics illustrates a scientific field at the intersection of science and technology Wittje starts with Helmholtz s and Rayleigh s work and its intersection with telegraphy and early wireless and continues with the industrialization of acoustics during World War I when sound measurement was automated and electrical engineering and radio took over the concept of noise Researchers no longer appealed to the musically trained ear to understand sound but to the thinking and practices of electrical engineering Finally Wittje covers the demilitarization of acoustics during the Weimar Republic and its remilitarization at the beginning of the Third Reich He shows how technical acoustics fit well with the Nazi dismissal of pure science representing everything that German Physics under National Socialism should be experimental applied and relevant to the military **The Garland Encyclopedia of World Music** J.W. Sensing Collectives Jan-Peter Voß, Nora Rigamonti, Marcela Suárez, Jacob Watson, 2023-03-03 Are aesthetics and politics really two different things The book takes a new look at how they intertwine by turning from theory to practice Case studies trace how sensory experiences are created and how collective interests are shaped They investigate how aesthetics and politics are entangled both in building and disrupting collective orders in governance and innovation This ranges from populist rallies and artistic activism over alternative lifestyles and consumer culture to corporate PR and governmental policies Authors are academics and artists The result is a new mapping of the intermingling and co constitution of aesthetics and politics in engagements with collective orders **Worship Sound Spaces** Christine Guillebaud, Catherine Lavandier, 2019-11-18 *Worship Sound Spaces* unites specialists from architecture acoustic engineering and the social sciences to encourage closer analysis of the sound environments within places of worship Gathering a wide range of case studies set in Europe Asia North America the Middle East and Africa the book presents investigations into Muslim Christian and Hindu spaces These diverse cultural contexts demonstrate the composite nature of

designing and experiencing places of worship Beginning with a historical overview of the three primary indicators in acoustic design of religious buildings reverberation intelligibility and clarity the second part of this edited collection offers a series of field studies devoted to perception before moving onto recent examples of restoration of the sound ambiances of former religious buildings Written for academics and students interested in architecture cultural heritage acoustics sensory studies and sound The multimedia documents of this volume may be consulted at the address <https://frama.link/WSS>
