## **Responsible Tourism:**

**Ethical and Responsible Tourism** Marko Koščak, Tony O'Rourke, 2019-10-21 Ethical and Responsible Tourism explains the methods and practices used to manage the environmental impact of tourism on local communities and destinations. The three core themes of the book: destination management, environmental and social aspects of ethical sustainable development, and business impacts are discussed across both topic and case study chapters alongside explanatory editorial analysis with all chapters clearly signposted and interlinked. The case studies address specific and practical examples from a global range of examples including sites in Australia, Central America, Europe, Union countries, Japan, North America, and South America. Used as a core textbook, the linking of theory in the topic chapters and practice gained through case studies alongside further reading and editorial commentary. Ethical and Responsible Tourism provides a detailed and comprehensive learning experience. Specific case studies can be used as standalone examples as part of a case teaching approach, and the editorial and discussion elements are designed to be suitable for those simply seeking a concise overview such as tourism professionals or potential investors in sustainable tourism projects. This book will be essential reading for students, researchers, and practitioners of tourism, environmental, and sustainability studies. Responsible Tourism Harold Goodwin, 2016-10-31 Responsible Tourism Using tourism for sustainable development 2nd edition is about the globally vital necessity of realising sustainable tourism. It is a hugely important challenge to those who organise and sell travel and tourism and those who consume it. *Responsible Tourism* Anna Spenceley, 2012 Responsible Tourism presents a wide variety of valuable lessons learned in responsible tourism initiatives in Southern Africa that many tourism practitioners can use in their efforts to make the tourism sector work for the poor and for the environment. Dr Harsh Varma, Director, Development Assistance Department, World Tourism Organization, UNWTO. For those interested in how tourism can assist in the economic and social development of societies in need, Responsible Tourism effectively integrates scales and types of knowledge to present an informative, stimulating perspective. It will be on my bookshelf. Steve McCool, Professor Emeritus, Wildland Recreation Management, University of Montana. Responsible tourism is one of the most significant contemporary issues for tourism scholars and practitioners alike. This useful and clearly written collection of new research demonstrates the innovations in responsible tourism occurring within southern Africa and provides lessons for international research and practice. Professor Christian Rogerson, University of Witwatersrand, South Africa. Conservation efforts are often seen to be in conflict with local livelihoods and resource use: the park versus people debate. Responsible tourism and Ecotourism are often invoked as a third way that serve both ends. Yet do they actually work in practice? This volume delves deep into practice in southern Africa, the hotbed of innovation on the issue, and provides a comprehensive evidence-based examination of what works and what fails, using a wealth of information from scholars and practitioners working in the region. This book opens with an overview of the issues, looks at what sustainable and responsible tourism are in practice, and how they may contribute

to conservation poverty alleviation and local economic development Part 1 examines policies and institutional activities in responsible tourism by governments donor agencies and nongovernmental organizations and addresses the market for responsible travel Part 2 considers responsible nature based tourism the economics of wildlife tourism and ecotourism transfrontier conservation areas ecological impacts of tourism and other issues Part 3 looks at more detailed case studies of community based tourism projects and highlights the reasons for successes and failures in this sector The book concludes with a synthesis of the key findings with implications for policy destination planning business management and future private sector and donor interventions Published with the Southern African Sustainable Use Specialist Group SASUSG of IUCN
