Joseph, 1999-04-23 A wide range of social scientific perspectives from anthropology geography history and Indigenous studies to politics psychology and sociology are represented here The effects of restructuring processes in Canada and New Zealand are particularly well documented and the importance of words and their manipulation is emphasized but it is the broad sweep of approach that distinguishes this work from more abstract or interdisciplinary commentaries on restructuring Feature essays one by former Ontario premier Bob Rae on conservative and radical resistance to abuses of power and two on aboriginal First Nations issues challenge important public policy trends Restructuring Societies takes crucial steps toward developing informed public debate about a process that affects us all

Dregs Laura McLauchlan, 2025-03-27 Girls who join dog packs boys who gain strength from trees men who love bodies with nobody in them Dregs is a collection of tenderly monstrous love stories set in a shadowy small town of the same name Based in South Canterbury New Zealand these lovingly disturbing fictions welcome the strange and other worldly while keeping an ethnographic eye trained on the classed religious gendered racialised and species based forces shaping this rural region of New Zealand's South Island While at times grotesque these darkly loving richly illustrated tales offer new avenues

for ethnographic research and shed new light on the region giving voice and form to unspoken aspects of this antipodean rural idyll Shaped by a deep respect for the monstrous feminine regardless of the gender of the bodies in which such forces appear *Dregs Love and Monsters in Small Town New Zealand* is a product of both an anthropological sensibility and a trust that naming and finding ways to live well with our monsters is a vital aspect of living well in our times **The**

Sustainability of Rural Systems I.R. Bowler, C.R. Bryant, C. Cocklin, 2013-06-29 Economy society and environment comprise the three main dimensions of sustainable development but too often they are considered separately This book by comparison examines the interaction of the three dimensions in the context of rural systems embracing a wide range of topics including globalisation and reregulation in sustainable food production conservation and sustainability the development of sustainable rural communities and sustainable rural urban interaction An international team of geographers drawn from the International Geographical Union's Commission on The Sustainability of Rural Systems summarises the basis of unsustainable rural development in these topics the remedial policies being pursued and their own evaluations of the policies Rather than deal just with generalisations their analyses are illustrated by detailed case studies drawn from a variety of rural systems in both developed and developing countries *The SAGE Handbook of Qualitative Research* Norman K. Denzin, Yvonna S. Lincoln, Michael D. Giardina, Gaile S. Cannella, 2023-04-07 This new edition of the SAGE Handbook of Qualitative Research represents the sixth generation of the ongoing conversation about the discipline practice and conduct of qualitative inquiry As with earlier editions the Sixth Edition is virtually a new volume with 27 of the 34 chapters representing new topics or approaches not seen in the previous edition including intersectionality critical disability research postcolonial and decolonized knowledge diffraction and intra action social media methodologies thematic analysis collaborative inquiry from the borderlands qualitative inquiry and public health science co production and the politics of impact publishing qualitative research and academic survival Authors in the Sixth Edition engage with questions of ontology and epistemology the politics of the research act the changing landscape of higher education and the role qualitative researchers play in contributing to a more just egalitarian society To mark the Handbook's 30 year history we are pleased to offer a bonus PART VI in the eBook versions of the Sixth Edition this additional section brings together and reprints ten of the most famous or game changing contributions from the previous five editions You can bundle the print eBook version with bundle ISBN 978 1 0719 2874 5

Contingent Work, Disrupted Lives Anthony Winson, Belinda Leach, 2002-01-01 The new rural economy involves a fundamental shift in the stability and security of people's lives and ultimately causes wrenching change and an arduous struggle as rural dwellers struggle to rebuild their lives in the new economic terrain *Decolonizing Methodologies* Linda Tuhiwai Smith, 2021-04-08 To the colonized the term research is conflated with European colonialism the ways in which academic research has been implicated in the throes of imperialism remains a painful memory This essential volume explores intersections of imperialism and research specifically the ways in which imperialism is embedded in disciplines of

knowledge and tradition as regimes of truth Concepts such as discovery and claiming are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being Now in its eagerly awaited third edition this bestselling book includes a co written introduction and features contributions from indigenous scholars on the book s continued relevance to current research It also features a chapter with twenty five indigenous projects and a collection of poetry **Geopolitics at the End of the Twentieth Century** Nurit Kliot,David Newman,2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs
