Road Funds And Road Maintenance An Asian Perspective:

Road Funds and Road Maintenance Asian Development Bank, 2003 Singling out roads as an important factor in economic development this report presents the findings of a regional technical assistance inquiry carried out to examine the problem of road funding in Asia with the aim of proposing case specific solutions Particular attention is paid to the data collected during road assessments performed in the Kyrgyz Republic Pakistan Uzbekistan and Vietnam Also discussed are a number of possible strategies for combating road maintenance neglect across Asia

Mongolia Asian Development Bank, 2012-02-01 Mongolia's growth is set to accelerate in the next decade as its vast mining resources start to be put into large scale production This has greatly improved its prospects for prosperity and poverty reduction However to realize its full potential Mongolia will need to transform its society economy and administration This report discusses how the context of road sector policy and road infrastructure investments will change and the ways the sector can best prepare to fulfill its new role Given the country's road infrastructure needs the road sector will be expected to implement massive highway investments in a short time and then to consistently maintain the new highways at a high standard However Mongolia's current small scale road sector will unlikely have the capacity to scale up and deliver upon such expectations without extensively modernizing its financing mechanisms business processes organization and education systems This report therefore argues that Mongolia's government needs to implement a comprehensive capacity development program for the road sector for about 5 years This study looks into the sector's financial dimension the techniques and processes followed for road maintenance and construction and the role of human resources management and education It tries to understand why sector performance improvement has been slow even though many sector issues and apparent solutions have been considered in the past Reflecting on lessons from international experience it outlines a range of policy options for decision makers and proposes an agenda until 2016

Planning, Housing and Infrastructure for Smart Villages Hemanta Doloi, Ray Green, Sally Donovan, 2018-12-07 Some 7.3 billion people currently live on the planet Of these 3.4 billion live in rural areas In just a few regions Latin America the Middle East and North Africa less than 50 per cent of poverty is now located in rural areas But for the rest of the world's regions between 55 per cent and 80 per cent of the poor continue to live in the countryside Progress is being made but much of the knowhow needed is not disseminated outside of a small coterie of professionals who work in the area With urban development attracting a great deal of attention lately poorer rural areas deserve the same and new knowledge for empowerment of rural communities is urgently needed This book provides an overview of current thinking and practices that have emerged over the last thirty years for uplifting rural communities in developing economies Drawing on a body of knowledge across a spectrum of relevant disciplines this book provides a range of innovative ideas for rural planning housing and infrastructure development Governments in many emerging economies where rural poverty is often most acute have attempted to improve livelihoods Approaches and techniques that have been used for urban development are often not

applicable to rural communities Studies show that money allocated for rural development is often not effectively spent due to distance lack of infrastructure lack of education poverty and other factors Meanwhile the gap in development between the city and country continues to grow sometimes leading to social and political instability in both developing and developed countries This book seeks to provide a guidebook for meeting such challenges Through in depth enquiry of global practices and thinking about rural development and selected case studies the authors argue that careful consideration must be given to incorporating issues of resilience resourcefulness and the involvement of communities at grassroots levels in realising the transformation of rural settlements into Smart Villages *Pacific Economic Monitor* July 2017 Asian Development Bank,2017-07-01 To help overcome remoteness Pacific economies are looking to improve economic integration not only through ICT and transport network investments but also by promoting greater competition and private investment Enhancing connectivity is crucial to the Pacific and its people who constantly contend with the challenges of geographic isolation and remoteness Physical connectivity through air and maritime links brings people goods and services to and from the Pacific while digital connectivity through information and communication technology ICT integrates the region with the rest of the world This section tackles Pacific developing member countries efforts to enhance connectivity by expanding internet and other ICT connections improving and maintaining transport networks and strengthening investment facilitation Ultimately the goal of connectivity is to link Pacific peoples with each other and enable them to access goods and important social services as well as economic opportunities locally and globally *Rural Road Maintenance* Chris Donnges,Geoff A. Edmonds,Bjorn Johannessen,2007 Provides an analysis of rural road maintenance in the Asian region **Affordable Housing for Smart Villages** Hemanta Doloi,Sally Donovan,2019-10-18 This book initiates a fresh discussion of affordability in rural housing set in the context of the rapidly shifting balance between rural and urban populations It conceptualises affordability in rural housing along a spectrum that is interlaced with cultural and social values integral to rural livelihoods at both personal and community level Developed around four intersecting themes explaining houses and housing in rural settings exploring affordability in the context of aspirations and vulnerability rural development agendas involving housing and communities and construction for resilience in rural communities the book provides an overview of some of the little understood and sometimes counter intuitive best practices on rural affordability and affordable housing that have emerged in developing economies over the last thirty years Drawing on practice based evidence this book presents innovative ideas for harnessing rural potential and empowering rural communities with added affordability and progressive development in the context of housing and improved living standards For a student aspiring to work in rural areas in developing countries it is an introduction to and map of some key solutions around the critical area of affordable housing For the rural development professional it provides a map of a territory they rarely see because they are absorbed in a particular rural area or project For the academic looking to expand their activities into rural areas especially in rural housing it provides a handy

introduction to a body of knowledge serving 47% of the world's population and how this differs from urban practice For the policy makers it provides a map for understanding the dynamics around rural affordability growth potential and community aspirations helping them to devise appropriate intervention programs on rural housing and development *Reforming the Financing System for the Road Sector in the People's Republic of China* Asian Development Bank,2015-08-01 The People's Republic of China implemented the Fuel Tax Reform in 2009 It abolished a range of provincial and local government fees and increased the central government tax on motor vehicle fuel This reform centralized the government revenues for the sector but various issues remain This publication analyzes the implications of the reform on the operation and maintenance of ordinary roads It recommends the formation of a National Road and Funding Administration responsible for the national road programs and policy and the creation of a central road trust fund to finance the operation and maintenance of ordinary roads

Output-Based Aid Yogita Mumssen,Lars Johannes,Geeta Kumar,2010-02-25 Developing country governments and the development aid community are acutely aware of the need to find more effective ways to improve basic living conditions for the poor as traditional approaches of delivering public support have not always led to the results intended Results based financing RBF instruments which tie the disbursement of public funding to the achievement of pre agreed results are now recognized as one important piece of the aid delivery puzzle The aim of these instruments is to enhance the effectiveness of public funding Output Based Aid Lessons Learned and Best Practices provides a practical understanding of the experience with output based aid OBA a results based instrument that is being used to deliver basic infrastructure and social services to the poor including through public private partnerships OBA has been used in the World Bank Group since 2002 including more recently through the Global Partnership on Output Based Aid which has a mandate to design and test OBA approaches The authors of this book analyze nearly 200 OBA projects in water and sanitation energy health roads telecommunications and education The piloting phase of OBA has in general been a success and OBA has demonstrated clear advantages over traditional approaches in terms of efficiently targeting subsidies and mobilizing the private sector to serve poor households that would otherwise go without an improved service OBA has also demonstrated that monitoring for results is possible if appropriate systems are put in place As the first comprehensive review of OBA in eight years this book will be an essential reference for infrastructure and social services sector experts and OBA practitioners around the world including staff of international financial institutions public and private service providers and NGOs as well as for donors and governments who are interested in piloting or scaling up and mainstreaming OBA approaches As the first comprehensive review of OBA in eight years this book will be an essential reference for infrastructure and social services sector experts and OBA practitioners around the world including staff of international financial institutions public and private service providers and NGOs and for donors and governments who are interested in piloting or scaling up and mainstreaming OBA approaches

Guidance Note: Road Transport Subsector Risk Assessment Asian Development Bank,2010-08-01 The road

transport subsector tends to be vulnerable to risks This is due to large budgets that often comprise a sizable percentage of a country's national budget 20% 30% an unclear strategic vision nontransparent policy decisions that lead to inappropriate priorities procurement contracts for goods and services that lend themselves to corruption and political interference Additional factors include weak business processes and control systems weak capacity of subsector agencies and fragile links across agencies and stakeholders This guidance note aims to explain key features of the road transport subsector and identify entry points for mapping governance risks *ECMT Round Tables Transport Infrastructure Charges and Capacity Choice Self-financing Road Maintenance and Construction* European Conference of Ministers of Transport, OECD, 2007-03-15 The Round Table analyses the opportunities for setting infrastructure service prices so that they also provide guidance for the supply of services *Infrastructure and Productivity in Asia* J. Kidd, F. Richter, 2005-02-11 There is a feeling that Asia is at a crossroad and is facing a new crisis The earlier crisis of 1997-98 showed that effective systems were missing Afterwards governments foreign investors and foreign managers initiated more holistic infrastructures but corruption poorly connecting systems and a lack of transparent management have ensured that these are under performing In this book well informed authors offer insights on Asia's political educational and physical infrastructures and indicate the routes leading to better integrated futures *Journal of Economic Literature*, 2005-12 *Public Private Partnership: Asian Perspectives - Recommendations for Azerbaijan* Mahir Humbatov, Nikita Singla, 2016-12-12 As the world makes great strides on the path to development the gap between infrastructure needs and the resources governments possess to meet those needs is ever growing on account of governments' razor thin budgets rapid urbanization and population growth Asia's overall infrastructure investment needs are estimated at USD 9 trillion till 2030 68% of which is for new capacity and 32% for maintaining and replacing existing infrastructure The average annual infrastructure investment during this period is about USD 750 billion As countries move up the value chain and urban populations expand demand for transport logistics and utilities will only continue to grow increasing the burden on public funds If cash flushed investors have an appetite for Asia's infrastructure projects what is keeping them at bay For infrastructure development statistics show that Asian nations have been turning to Public Private Partnerships PPP which seemed to be one of the main tools to attract financing and keep pace with rapid growth Although the PPP models are established in several Asian countries such as Singapore South Korea and Japan others are relatively immature Indonesia China and India in particular have announced ambitious infrastructure programs with governments developing mechanisms to encourage PPP investment and address barriers to PPP development The new game changers of the 21st century India and China are showing aggressive signs of opening their domestic markets to international investors While PPPs hold significant potential for Asia they also present formidable challenges Case studies of PPP markets in Australia China India Indonesia Japan Korea Malaysia Singapore and Thailand provide an Asian perspective enabling recommendations for Azerbaijan The Azerbaijani government has achieved great progress over the last decade in

integrating the country into the global economic marketplace and increasing foreign investment mainly due to its oil resources. Now the government's focus is on diversifying the economy outside the oil sector. Azerbaijan is facing increasing demand for investment in infrastructure development, overstressing the government's budget. There is a need for not only private sector investment but also private sector knowledge and expertise. The traditional approach of the government for infrastructure development of any kind has been to use the state's own budget or privatization. The first is markedly insufficient to meet the country's needs while the latter only works in a sound legal and financial framework and is not appropriate for all public service delivery projects. So there is a need to see if the time is ripe for public private partnerships. PPPs may not be the ultimate solution but they can help address many of the issues systemic to the region in the field of infrastructure development. All it needs is a systematic approach undertaken through joint efforts of private and public sectors.

ADB Review, 2004 *An Approach to Sustainable Funding of Road Maintenance*, 2001 [Impact Evaluation of Infrastructure Reform](#), 2008 **ADB Publications** Asian Development Bank, 2006 **Disaster Risk Reduction in Indonesia** Riyanti Djalante, Matthias Garschagen, Frank Thomalla, Rajib Shaw, 2017-05-02. This book is a unique transdisciplinary summary of the state of the art of disaster risk reduction (DRR) in Indonesia. It provides a comprehensive overview of disaster risk governance across all levels and multiple actors including diverse perspectives from practitioners and researchers on the challenges and progress of DRR in Indonesia. The book includes novel and emerging topics such as the role of culture, religion, psychology and the media in DRR. It is essential reading for students, researchers and policy makers seeking to understand the nature and variety of environmental hazards and risk patterns affecting Indonesia. Following the introduction, the book has four main parts of key discussions. Part I presents disaster risk governance from national to local level and its integration into development sectors. Part II focuses on the roles of different actors for DRR. Part III discusses emerging issues in DRR research and practice and Part IV puts forward a variety of methods and studies to measure hazards, risks and community resilience.

Road Funds and Road User Charges in the CAREC Region Asian Development Bank, 2022-12-01. This publication explores how roads are financed in five Central Asia Regional Economic Cooperation (CAREC) program countries and outlines lessons and best practices to help build a robust road network throughout the region. The publication details how road funds are managed in Azerbaijan, the Kyrgyz Republic, Mongolia, Pakistan and Uzbekistan and explains how earmarked road user charges help finance maintenance and repair. It recommends countries create road asset management systems to prioritize roads with the highest economic returns, boost data collection and increase the efficiency and transparency of road fund financing.
