station was 49 F which was taken on March 4 When we returned to winter quarters on February 5 from a first trip we found that the Fram had already left us With joy and pride we heard from those who had stayed behind that our gallant captain had succeeded in sailing her farther south than any former ship So the good old Fram has shown the flag of Norway both farthest north and farthest south The most southerly latitude reached by the Fram was 78 41 Before the winter set in we had 60 tons of seal meat in our winter quarters this was enough for ourselves and our 110 dogs We had built eight kennels and a number of connecting tents and snow huts When we had provided for the dogs we thought of ourselves Our little hut was almost entirely covered with snow Not till the middle of April did we decide to adopt artificial light in the hut This we did with the help of a Lux lamp of 200 candle power which gave an excellent light and kept the indoor temperature at about 68 F throughout the winter The ventilation was very satisfactory and we got sufficient fresh air The hut was directly connected with the house in which we had our workshop larder storeroom and cellar besides a single bathroom and observatory Thus we had everything within doors and easily got at in case the weather should be so cold and stormy that we could not venture out

The Return of the South Pole Sled Dogs Mary R. Tahan,2021-02-25 This book documents the return of the surviving sled dogs of the Norwegian Antarctic Expedition of 1910 1912 from Antarctica where they had helped Roald Amundsen become the first human to reach the South Pole This book is the sequel to the highly acclaimed Roald Amundsen s Sled Dogs The Sledge Dogs

Who Helped Discover the South Pole It chronicles how the sled dogs were used internationally to further promote the expedition's great achievement and follows some of the dogs as they undertake subsequent expeditions with Douglas Mawson's Australasian Antarctic Expedition of 1911-1914 which made scientific discoveries and with Arve Staxrud's Norwegian Arctic Rescue Mission of 1913 which saved members of the Herbert Schröder Stranz German Arctic Expedition. The book tracks the remaining 39 sled dogs to their next challenging adventures and their final destinations in Argentina, Norway, Antarctica, and Australia. Polar Explorations Don Nardo, 2011-03-02 One of the least understood places in the world, the North and South Poles have captivated the imagination of scientists, adventurers, and ordinary people for centuries. With an abundance of natural resources, including crude oil, and the possibility for new scientific breakthroughs, the race to understand the poles has at various times led many nations to make political claims in a rush to exercise control over this terrain. This comprehensive volume offers detailed accounts of the major polar explorations, the political and scientific stakes in the quest to map and contain the Arctic and Antarctica. Chapters discuss the contest for the North Pole, the heroic age of exploration of the South Pole during the beginning of the twentieth century, the evolution of scientific technology and its effect on research in the harsh environment, and the trends in modern polar research.

South: Scott and Amundsen's Race to the Pole Hunter Stewart, 2015-10-08 The race to reach the South Pole for the first time was an unparalleled adventure in the early twentieth century. South by historian Hunter Stewart chronicles the competition between two fierce rivals, Robert F. Scott and Roald Amundsen, to secure their place in history as the first man to lead an expedition to the most uninhabitable place on earth. South dramatically tells the story of the quest that is marked by heartbreak, greed, ego, and bravery, not only by Scott and Amundsen but by the courageous crews and financial backers who supported them. The journey to reach the South Pole was truly as it was later called, The Heroic Age of Arctic Exploration.
