Political Geography and the Region in Indian History Kundan Kumar, 2025-10-27 This epigraphic study of the political geography of two historical regions Dak i a Ko ala and Vidarbha between fourth and thirteenth centuries focuses on the interaction of physical and human geography as reflected in the changing nature of settlement patterns both rural and urban and their political organization through time an important exercise based primarily on Sanskrit inscriptions from the period and the region The study contributes to further substantiation of the critical significance of the conception of early medieval in the study of Indian history Since almost all the inscriptions are in the nature of land grants to Brahmanas shrines and monasteries a related area of investigation is the extent of agrarian expansion in the context of political and administrative changes initiated by a series of dynasties across centuries This also involved a gradual growth of a sense of affiliation with the region or conscious effort to appropriate its identity by the ruling dynasties The book critically analyses the data meticulously presented in tabulated form an established method in inscription based studies of early medieval India It thus adds to our knowledge and understanding of the region as it has gradually evolved over several centuries through the early medieval period

Baghelkhand, Or, the Tigers' Lair David E. U. Baker, 2007 This book explores the concept of region and nation in Indian history through a long term study of Bagelkhand from prehistory up to 1956 It examines the ways in which the region eventually became part of the Indian nation 1947 and then the state of Madhya Pradesh 1956 The author sees region building as a process encompassing a dialogue between the region and external often centralizing states on the one hand and migration on the other While these two forces gave the region its distinct identity they also paradoxically forged political social and economic commonalities with other regions of the country subject to similar influences He pursues the theme of nation building from prehistory through the centralizing Mauryan Gupta Mughal British Empires to the Indian state The book assesses the social economic and political impact of various colonialisms rather than merely that of Britain whose very difference colonialism was part of worldwide capitalism It examines the regional aspects of power which opposed but fell before the centralizing initiatives Illustrated with rare visuals this book would appeal to historians political scientists sociologists and anthropologists particularly those concerned with concepts like region and nation
