Lynch, 2018-11-02 A richly illustrated full color guide to the unique plants wildlife and environments of Cape Cod and the other nearby Outer Lands that face the Atlantic Ocean This essential guidebook presents the most abundantly illustrated and fascinating account of the natural history of Cape Cod its nearby islands Block Island the western coast of Rhode Island and southeastern Long Island ever published Exploring the ecology and most common plants and animals of the various regional environments beaches dunes salt marshes heathlands and coastal forests the book also encompasses marine mammals sea turtles and fish offshore For nature loving local residents and visitors alike this essential book will be a treasured resource **Where the river meets the ocean - Stories from San Francisco Estuary** Peggy W. Lehman, Pedro

Morais, Theodore Flynn, Frances P. Wilkerson, 2022-11-02 What is an estuary Where do they occur How do they work Who lives there And why are estuaries important to our planet This collection will answer all of these questions and more Estuaries are places where fresh water from rivers moving downstream from the mountains mixes with salty water moving upstream from the ocean Estuaries thus contain both fresh and salty water habitats places where many kinds of plants and animals can live and grow San Francisco Estuary is the largest estuary on the West Coast of the United States and is home to millions of people plants and animals Our scientists have been studying all aspects of the San Francisco Estuary for nearly 50 years and we have 35 stories to tell about the people plants and animals in the estuary We will tell you horror stories of how tiny poisonous plants and vampire fish kill other fish and we have success stories of how conservation saves the lives of tiny mice in marshes and birds along the Pacific Flyway The Collection of stories is divided into six sections so you can easily find the stories that interest you the most The first section describes the many kinds of habitats in the estuary including rivers shallow bays wetlands and marshes and what makes them a good home for plants animals and people In the second section the water quality scientists will describe how they use boats special instruments and new technology to determine whether the water is healthy for people plants and animals In the third and fourth sections we will tell stories about how plants and animals live in the estuary Microbiologists will describe the tiny microscopic plants and animals that live in the estuary what makes them grow how important they are as food for animals and why they are sometimes poisonous Fish scientists will describe the many kinds of fish in the estuary and how we measure their growth determine where they are what they eat and the ways they use both fresh and saltwater habitats to grow and raise their young In the fifth section scientists will discuss how invasions of plants and animals from outside of the estuary have changed habitats and the survival of native plants and animals Lastly in the sixth section we will share how scientists in the estuary are using new technologies and management actions to control invasions of unwanted plants and animals increase the growth of native plants and animals improve water quality and restore habitats in the estuary

Ocean Bestiary Richard J. King, 2023-05-26 A delightful A to Z menagerie of the sea whimsically illustrated authoritative and thought provoking For millennia we have taken to the waves And yet for humans the ocean remains our planet's most inaccessible region the place about which we know the least From A to Z abalone to zooplankton and through both text and original illustrations Ocean Bestiary is a celebration of our ongoing quest to know the sea and its creatures Focusing on individual species or groups of animals Richard J King embarks upon a global tour of ocean wildlife including beluga whales flying fish green turtles mako sharks noddies right whales sea cows as well as sea lions sea otters and sea pickles skipjack tuna swordfish tropicbirds walrus and yellow bellied sea snakes But more than this King connects the natural history of ocean animals to the experiences of people out at sea and along the world's coastlines From firsthand accounts passed down by the earliest Polynesian navigators to

observations from Wampanoag clamshell artists African American whalemens Korean female divers or haenyeo and today's pilots of deep sea submersibles and even to imaginary sea expeditions launched through poems novels and paintings Ocean Bestiary weaves together a diverse array of human voices underrepresented in environmental history to tell the larger story of our relationship with the sea Sometimes funny sometimes alarming but always compelling King's vignettes reveal both how our perceptions of the sea have changed for the better and how far we still have to go on our voyage

Jellyfish

Lisa-ann Gershwin, 2016-06-07 An introduction to these bizarre and beautiful creatures of the sea filled with color photos and illustrations Fascinating Boing Boing Jellyfish are the oldest multi-organed life form on the planet having inhabited the ocean for more than five hundred million years With their undulating umbrella-shaped bells and sprawling tentacles they are compelling and gorgeous strange and dangerous In many places they're also vastly increasing in number and these population blooms may be an ominous indicator of the rising temperatures and toxicity of the oceans Jellyfish presents these aquarium favorites in all their glory Fifty unique species from the purple people eater to black sea nettles are presented in stunning photos along with the most current scientific information on their anatomy history distribution position in the water and environmental status Foremost jellyfish expert Lisa-ann Gershwin provides an insightful look at the natural history and biology of each of these spellbinding creatures plus a timely take on their place in the rapidly changing and deteriorating condition of the oceans Learn about immortal jellyfish who live and die and live again as well as those who camouflage themselves amid sea grasses and shells hiding in plain sight Discover the jellyfish that's the world's most venomous animal and the jellyfish that helped scientists win the Nobel Prize They're all here and more in this delightful volume A thorough coverage of jellyfish history biology and ecology Gershwin a marine biologist who has discovered over 200 new species of jellyfish does an excellent job of combining a compelling narrative of 50 different jellyfish with luscious I can't believe they're real photos Boing Boing

Stung! Lisa-ann Gershwin, 2013-05-07 The world of jellyfish is brought alive as you never imagined it could be by Lisa ann Gershwin in this engaging gripping and often funny book Callum Roberts author of The Ocean of Life As our oceans become increasingly inhospitable to life there is one creature that is thriving in this seasick environment the beautiful dangerous and now incredibly numerous jellyfish As foremost jellyfish expert Lisa ann Gershwin describes in Stung the jellyfish population bloom is highly indicative of the tragic state of the world's ocean waters while also revealing the incredible tenacity of these remarkable creatures Despite their often dazzling appearance jellyfish are simple creatures with simple needs namely fewer predators and competitors warmer waters to encourage rapid growth and more places for their larvae to settle and grow In general oceans that are less favorable to fish are more favorable to jellyfish and these are the very conditions that we are creating through mechanized trawling habitat degradation coastal construction pollution and climate change Despite their role as harbingers of marine destruction jellyfish are truly enthralling creatures in their own right and in Stung Gershwin tells stories of jellyfish both attractive and deadly while illuminating many interesting and unusual facts about their behaviors and environmental adaptations She takes readers back to the Proterozoic era when jellyfish were the top predator in the marine ecosystem at a time when there were no fish no mammals and no turtles and she explores the role jellies have as middlemen of destruction moving swiftly into vulnerable ecosystems The story of the jellyfish as Gershwin makes clear is also the story of the world's oceans and Stung provides a unique and urgent look at their inseparable histories and future
