Seapower In The Nuclear Age:

Seapower in the Nuclear Age Joel J. Sokolsky, 2021-01-26 This book first published in 1991 provides a major analysis of the prelude to the US's Cold War maritime strategy showing how NATO's maritime forces were organised in the period. It examines how the United States Navy and allied navies particularly the Royal Navy were incorporated into the Alliance's nuclear and conventional deterrent forces. It looks at the structure of the main naval commands, the growth of Soviet maritime forces and the impact of the flexible response strategy on NATO's naval posture in the 1970s. Drawing upon many declassified documents, this account fills an important gap in postwar literature on American seapower and its relation to European security. It also addresses important aspects of NATO strategy and organisation.

China's Strategic Seapower John Wilson Lewis, Litai Xue, 1994 Using major new documentary sources, the authors tell the story of why and how China built its nuclear submarine flotilla and the impact of that development on the nation's politics, technology, industry and strategy.

American Sea Power and the Obsolescence of Capital Ship Theory R.B. Watts, 2015-11-16 Since the beginning of the 20th century the United States has sought to achieve Admiral Alfred Thayer Mahan's vision of command of the sea using large battle fleets of capital ships. This strategy has been generally successful; no force can oppose the US Navy on the open seas. Yet capital ship theory has become increasingly irrelevant. Globally irregular warfare dominates the spectrum of conflict, especially in the aftermath of 9/11. Fleet engagements are a thing of the past and even small scale missions that rely on capital ships are challenged by irregular warfare. In a pattern evident since World War II, the US Navy has attempted to adapt its capital ship theory to irregular conflicts with mixed results before returning to traditional operations with little or no strategic debate. This book discusses the challenges of irregular warfare in the 21st century and the need for US naval power to develop a new strategic paradigm.

Thomas Schelling and the Nuclear Age Robert Ayson, 2020-09-23 An illuminating insight into the work of Thomas Schelling, one of the most influential strategic thinkers of the nuclear age. By the time of the Cuban Missile Crisis and the United States' early forays into Vietnam, he had become one of the most distinctive voices in Western strategy. This book shows how Schelling's thinking is much more than a reaction to the tensions of the Cold War. In a demonstration that ideas can be just as significant as superpower politics, Robert Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social theory and psychology. As such, this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control thinking, which still has an enormous influence in the early twenty-first century.

Seapower Geoffrey Till, 2004 At the beginning of the 21st century, much has remained the same in naval terms, but much has changed. Geoffrey Till's study is

an exploration of how change will impact upon the world's navies *The Yankee mariner and sea power* Joyce J. Bartell, 1982-01-01 Sea Power is more than naval ships and men and weapons more than naval strategy more than the ability to engage and defeat an enemy at sea Sea Power encompasses every strength contributed to a nation's defense economy self image and position in the world community through its use of the oceans Sea Power is measured by the health of a nation's navy and merchant marine the vitality of its fishing and shipbuilding enterprises the adequacy and efficiency of its ports and docks It is reckoned by the ability to husband and harvest the living and non living resources of the waters and the ocean floor It is found in maritime recreational activity that invigorates both people and industry It benefits from the inspiration that stimulates man's imagination to an ever more creative relationship with the sea This book assesses these components of sea power from the historical perspective of the Yankee Mariner to provide a view of the total impact United States sea power has had in the past and should have in the future It further considers how understanding and stewardship of the oceans can contribute to solutions for the problems of America and the dilemmas of mankind The words are those of specialists in ocean science and engineering sea transport and the building of ships and ports ocean politics and law deep sea mining and underwater oil production fishery biology and management and aquaculture naval history naval strategy and defense policy at sea Drawing upon a vast store of experience and expertise these fifteen authors find Uncle Sam faltering as a Yankee Mariner They investigate the extent of human commitment and the nature of scientific and technical support needed for the United States to regain its momentum in use of the sea What they report is a broad based guide to America's past and present sea power stance and to the requirements for her future challenge of ocean space *America, Sea Power, and the World* James C. China's Rising Sea Power Peter Howarth, 2006-04-18 This is a fascinating insight into China's strategic abilities and ambitions probing the real depths of its plans for the twenty first century China's Rising Sea Power explores similarities between China's strategic outlook today and that of earlier continental powers whose submarine fleets challenged dominant maritime powers for regional hegemony Germany in two World Wars and the Soviet Union during the Cold War Using insights from classical naval strategic theory Peter Howarth examines Beijing's strategic logic in making tactical submarines the keystone of China's naval force structure He also investigates the influence of Soviet naval strategy and ancient Chinese military thought on the PLA Navy's strategic culture contending that China's increasingly capable submarine fleet could play a key role in Beijing's use of force to resolve the Taiwan issue This book will be of great interest to all students and scholars of security and strategic studies Asian politics geopolitics and military naval strategy

The Fall and Rise of French Sea Power Hugues Canuel, 2021-04-15 The Fall and Rise of French Sea Power explores the renewal of French naval power from the fall of France in 1940 through the first two decades of the Cold War The Marine nationale continued fighting after the Armistice a service divided against itself The destruction of French sea power at the hands of the Allies the Axis and fratricidal confrontations in the colonies continued unabated until the scuttling of the Vichy fleet in 1942 And yet just over twenty years after this dark day Charles de Gaulle announced a plan to complement the country's nuclear deterrent with a force of nuclear powered ballistic missile carrying submarines Completing the rebuilding effort that followed the nadir in Toulon this force provided the means to make the Marine nationale a fully fledged blue water navy again ready to face the complex circumstances of the Cold War An important continuum of cooperation and bitter tensions shaped naval relations between France and the Anglo Americans from World War II to the Cold War The rejuvenation of a fleet nearly wiped out during the hostilities was underpinned by a succession of forced compromises often the least bad possible reluctantly accepted by French politicians and admirals but effectively leveraged in their pursuit of an independent naval policy within a strategy of alliance Hugues Canuel demonstrates that the renaissance of French sea power was shaped by a naval policy formulated within a strategy of alliance closely adapted to the needs of a continental state with worldwide interests This work fills a distinct void in the literature concerned with the evolution of naval affairs from World War II to the 1960s The author

drawing upon extensive research through French British American and NATO archives including those made public only recently regarding the sensitive circumstances surrounding the French nuclear deterrent maps out for readers the unique path adopted in France to rebuild a blue water fleet during unprecedented circumstances **One Hundred Years of Sea Power** George W. Baer, 1996-07-01 A navy is a state's main instrument of maritime force What it should do what doctrine it holds what ships it deploys and how it fights are determined by practical political and military choices in relation to national needs Choices are made according to the state's goals perceived threat maritime opportunity technological capabilities practical experience and not the least the way the sea service defines itself and its way of war This book is a history of the modern U S Navy It explains how the Navy in the century after 1890 was formed and reformed in the interaction of purpose experience and doctrine Maritime Strategy and the Nuclear Age Geoffrey Till, 1982-06-18 **National Security Affairs Monograph Series** , 1976 Papers Presented at the Soviet Affairs Symposium , 1978 The Royal Navy in the Falklands Conflict and the Gulf War Alistair Finlan, 2004-06 This book provides an insight into the relationship between the Royal Navy's institutional culture and modern warfare with specific reference to the Falklands Conflict and the Gulf War
