

Star Search

by Simon Cooke

SCENE ONE: On the starship Matariki. Astronauts RUA and DALE are at the **COMPUTER**. JAY is looking through a telescope.

JAY (puzzled). Hey, guys. I'm looking at the Southern Cross, and one of its stars has disappeared!

RUA. Are you sure? Did you remember to take the lens cap off your telescope?

JAY (glaring at RUA). Of course I did.

DALE (shrugging). It's just one star. Why does it matter? There are billions of them out there.

JAY. What? Didn't you listen at astronaut school? We use stars as maps, just like our ancestors did. Stars stop us getting lost.

RUA. That's right. Lose a few stars, and we'll all be going round in circles.

JAY. And this isn't just any star. It's part of the Southern Cross!

DALE. What's so important about the Southern Cross?

RUA. Computer, you tell him.

COMPUTER. The Southern Cross is a constellation of four stars.

It has always been important to humans. You can use it to find south. There are pictures of the Southern Cross on flags and in books. People tell stories about the Southern Cross. In some tales, the Southern Cross is the anchor for a great sky walk.

JAY. So you see – we can't have a missing star. We'd have to call it the Southern Triangle.
