Searching For Certainty:

Searching for Certainty Shelly Miller,2020-10-13 We all long for certainty in life yet things often don't go as we expect. When facing illness, job loss, strained relationships and other struggles, our impulse is to question God and strive to fix things ourselves. In this book, Shelly Miller, a trusted ministry leader, explores how difficult times can actually be purposeful times of spiritual growth. Weaving the exodus story from the Bible with her own story, she shares how to focus on God rather than trying to overcome challenges in our own limited strength. Each chapter features a simple spiritual practice to help us enjoy the peace and security that is only possible through Christ. Uncertain seasons will soon be translated as an aha instead of an oh no.

Searching for Certainty Jerry Stafford,2013-05 When we were children in the Oklahoma hills, one of our pastimes was to pick the petals from a sunflower bloom or a daisy while saying with each petal, "She loves me, she loves me not." Thankfully, we don't have to do those kinds of things to determine whether or not God loves us, because there is a way of knowing. That is through the knowledge gained by experiencing a personal relationship with Jesus Christ, His Son. How can we know? How can we confirm our experience in Christ? There are some ways we can know. Hopefully, some of these can be revealed in this attempt to describe a Christian Experience. During my more than fifty years in the ministry, I have heard many say they were not sure if they were saved, and I have seen others who claimed to be born again but denied it by their behavior. John makes it very clear in his writings in chapter five, verse twelve: "He just simply says if you have Christ, you're saved; if you don't, you aren't. Are you saved? Are you certain?"

Searching for Certainty John L. Casti,1993-04-08 [The Collected Works of J. Krishnamurti](#) Jiddu Krishnamurti,2007 [more TRUTH](#) Kristi Mair,2019-02-21 Struggling to know what truth means today, Truth is a tricky thing. Today, the truth is not just hard to swallow; it is something we refuse to swallow. Truth is too certain, too divisive, too arrogant. In response, today's truth is often one of relativism: what's true for you might not be true for me. But if it's sometimes true and sometimes not, is it really truth at all? Jesus claimed to be the way and the truth and the life. But can we really accept this ultimate truth in an age of questioning, uncertainty, relativism, and scepticism? In *More Truth*, young philosopher Kristi Mair explores whether Christians can be confident in the truth in our anything goes age.

In Search of Certainty Josh McDowell, Thomas Williams,2003 This seeker-friendly book invites readers to discover that certainty involves some absolutes. It addresses postmodernists' view of truth, pointing to the absolute truth in the person of Jesus.

The Search for Certainty W. W. Spradlin, P. B. Porterfield,1984-03-12 **Smart Surveillance** Ric Simmons,2019-08-22 Over the last decade, law enforcement agencies have engaged in increasingly intrusive surveillance methods, from location tracking on cell phones to reading metadata off of e-mails. As a result, many believe we are heading towards an omniscient surveillance state and irrevocable damage to our privacy rights. In *Smart Surveillance*, Ric Simmons challenges this conventional wisdom by taking a broader look at the effect of new technologies and privacy, arguing that advances in technology can enhance our privacy and our security at the same time. Rather than focusing

exclusively on the rise of invasive surveillance technologies Simmons proposes a fundamentally new method of evaluating government searches based on quantification transparency and efficiency resulting in a legal regime that can adapt as technology and society change

Artificial Intelligence Through Search Chris Thornton, Benedict Du Boulay, 2012-12-06 This is an important textbook on artificial intelligence that uses the unifying thread of search to bring together most of the major techniques used in symbolic artificial intelligence The authors aware of the pitfalls of being too general or too academic have taken a practical approach in that they include program code to illustrate their ideas Furthermore code is offered in both POP 11 and Prolog thereby giving a dual perspective highlighting the merits of these languages Each chapter covers one technique and divides up into three sections a section which introduces the technique and its usual applications and suggests how it can be understood as a variant generalisation of search a section which developed a low level POP 11 implementation a section which develops a high level Prolog implementation of the technique The authors also include useful notes on alternative treatments to the material further reading and exercises As a practical book it will be welcomed by a wide audience including those already experienced in AI students with some background in programming who are taking an introductory course in AI and lecturers looking for a precise professional and practical text book to use in their AI courses About the authors Dr Christopher Thornton has a BA in Economics an Sc in Computer Science and a DPhil in Artificial Intelligence Formerly a lecturer in the Department of AI at the University of Edinburgh he is now a lecturer in AI in the School of Cognitive and Computing Sciences at the University of Sussex Professor Benedict du Boulay has a BSc in Physics and a PhD in Artificial Intelligence Previously a lecturer in the Department of Computing Science at the University of Aberdeen he is currently Professor of Artificial Intelligence also in the School of Cognitive and Computing Sciences University of Sussex

Cooperative search for moving targets with the ability to perceive and evade using multiple UAVs Ziyi Wang, Wencheng Zou, Sheng Li, 2023-10-28 This paper focuses on the problem of regional cooperative search using multiple unmanned aerial vehicles UAVs for targets that have the ability to perceive and evade When UAVs search for moving targets in a mission area the targets can perceive the positions and flight direction of UAVs within certain limits and take corresponding evasive actions which makes the search more challenging than traditional search problems To address this problem we first define a detailed motion model for such targets and design various search information maps and their update methods to describe the environmental information based on the prediction of moving targets and the search results of UAVs We then establish a multi UAV search path planning optimization model based on the model predictive control which

includes various newly designed objective functions of search benefits and costs We propose a priority encoded improved genetic algorithm with a fine adjustment mechanism to solve this model The simulation results show that the proposed method can effectively improve the cooperative search efficiency and more targets can be found at a much faster rate compared to traditional search methods

[A Search for Truth](#) Ernest J. Honigmann, 2016-08-03 The genesis of this book was in 1957 when the author was rejected from a loving courtship because he did not believe in the existence of God To quell the pain and to understand what had happened to him he researched the evidence as to why people believe that God exists The result was this book a predominance of evidence in favor of atheism Further the author found that truth should always be held provisionally not permanently pending discovery of new evidence and insights For example the author's atheism is provisional His search also brought a tough new world If God does not exist we need new concepts for the meaning of life the basis of morality and our unalienable Rights to Life Liberty and the pursuit of Happiness This book offers his solutions to those problems And one more thing The author's recommendation in his final chapter for a new way to search for religious truth forms the most exciting part of this book and possibly the most prophetic Now in 2016 50 years after it had been offered to the world and rejected by the publishers as a threat to their own interests our society has come of age And this book with its eye opening freshness still intact is finally yours to learn from and to enjoy

[People of Paradox](#) Terryl L. Givens, 2007-08-29 In People of Paradox Terryl Givens traces the rise and development of Mormon culture from the days of Joseph Smith in upstate New York through Brigham Young's founding of the Territory of Deseret on the shores of Great Salt Lake to the spread of the Latter Day Saints around the globe Throughout the last century and a half Givens notes distinctive traditions have emerged among the Latter Day Saints shaped by dynamic tensions or paradoxes that give Mormon cultural expression much of its vitality Here is a religion shaped by a rigid authoritarian hierarchy and radical individualism by prophetic certainty and a celebration of learning and intellectual investigation by existence in exile and a yearning for integration and acceptance by the larger world Givens divides Mormon history into two periods separated by the renunciation of polygamy in 1890 In each he explores the life of the mind the emphasis on education the importance of architecture and urban planning so apparent in Salt Lake City and

Mormon temples around the world and Mormon accomplishments in music and dance theater film literature and the visual arts He situates such cultural practices in the context of the society of the larger nation and in more recent years the world Today he observes only fourteen percent of Mormon believers live in the United States Mormonism has never been more prominent in public life But there is a rich inner life beneath the public surface one deftly captured in this sympathetic nuanced account by a leading authority on Mormon history and thought Interpreting Islam Tamara Sonn,1996-10-10 In this book Sonn provides the first English translation of *The History of Intellectual Movements in Islam* 1928 a seminal text of Arab modernism written by the Palestinian intellectual Bandali al Jawzi 1871 1942 In that book Jawzi offered the first Marxist interpretation of the history and development of Islamic thought The continuing importance of his work lies in Jawzi s critical method of reevaluating both European orientalist and classical Muslim accounts of Islamic history Fifty years before Edward Said s landmark *Orientalism* Jawzi identified the vested imperial interests as the weakness in both methodologies Sonn s translation brings to life this skillful and entertaining critique of Islamic history Her introduction places Jawzi s thought in context with both postmodern intellectuals and Muslim reformers who continue the struggle to apply Islamic principles to contemporary life *Ten Times Calmer* Dr. Kirren Schnack,2024-01-30 Feeling better starts now Dr Kirren Schnack is here to tell you that your anxiety isn t here to stay Whether you re going through something and need support to feel like yourself again or if you have been dealing with anxious thoughts for a long time *Ten Times Calmer* has the help you ve been looking for Dr Kirren is an Oxford trained clinical psychologist with twenty years experience In *Ten Times Calmer* she offers a first aid kit of tools to help you understand what you re going through and change how you re feeling and it might just be easier than you think Not everyone has access to therapy and not everyone needs it but we could all do with a little more calm in our lives The ten chapters cover everything from dealing with anxious thoughts and stress to managing uncertainty and safely tackling trauma and each takes you a step closer to an anxiety free life Inside you ll find short anxiety busting exercises with a big impact and a toolkit of well researched and clinically proven tips that will help you find calm each and every day Signs, Search and Communication René J.
