House, 2014-04-28 The Cold War did not culminate in World War III as so many in the 1950s and 1960s feared yet it spawned a host of military engagements that affected millions of lives This book is the first comprehensive multinational overview of military affairs during the early Cold War beginning with conflicts during World War II in Warsaw Athens and Saigon and ending with the Cuban Missile Crisis A major theme of this account is the relationship between government policy and military preparedness and strategy Author Jonathan M House tells of generals engaging in policy confrontations with their governments political leaders among them Anthony Eden Nikita Khrushchev and John F Kennedy many of whom made military decisions that hamstrung their own political goals In the pressure cooker atmosphere of atomic preparedness politicians as well as soldiers seemed instinctively to prefer military solutions to political problems And national security policies had military implications that took on a life of their own The invasion of South Korea convinced European policy makers that effective deterrence and containment required building up and maintaining credible forces Desire to strengthen the North Atlantic alliance militarily accelerated the rearmament of West Germany and the drive for its sovereignty In addition to examining the major confrontations nuclear and conventional between Washington Moscow and Beijing including the crises over Berlin and Formosa House traces often overlooked military operations against the insurgencies of the era such as French efforts in Indochina and Algeria and British struggles in Malaya Kenya Cyprus and Aden Now more than fifty years after the events House describes understanding the origins and

trajectory of the Cold War is as important as ever By the late 1950s the United States had sent forces to Vietnam and the Middle East setting the stage for future conflicts in both regions House s account of the complex relationship between diplomacy and military action directly relates to the insurgencies counterinsurgencies and confrontations that now occupy our attention across the globe      **Explanatorium of History** DK,2021-12-07 Take a roller coaster ride through the past with this fact including and visually stunning children s history encyclopedia Discover the major turning points in history from the evolution and migrations of early humans to the rise and fall of great empires such as Ancient Rome and the Aztecs Get the inside track on wars and conflict including European knights Japanese samurai Inca warriors and the major clashes of World War I World War II the Cold War the War on Terror and so much more This visual reference encyclopedia uses stunning photographs and supporting illustrations to trace the history of science from Ancient Greece through the major contributions of the Islamic world the Scientific Revolution the Space Race and on to modern technology The arts religions and ideas are also showcased from Australian Aboriginal Dreamtime the Renaissance and Greek drama to the origins of major world religions such as Christianity and Buddhism Explanatorium of History is the ultimate visual encyclopedia for kids ages 10 14 telling the story of us from the dawn of human history up to the present      Mao's Road to Power Stuart Schram,Timothy Cheek,Roderick MacFarquhar,2015-07-16 This eighth volume covers the period 1942 to 1945 when Mao asserted his status as the incarnation and symbol of the Chinese Revolution and the sinification of Marxism Leninism

**Tiananmen Protests ,      A Military History of China** David Andrew Graff,Robin Higham,2012-03-09 Gaining an understanding of China s long and sometimes bloody history can help to shed light on China s ascent to global power Many of China s imperial dynasties were established as the result of battle from the chariot warfare of ancient times to the battles of the Guomindang KMT and Communist regimes of the twentieth century China s ability to sustain complex warfare on a very large scale was not emulated in other parts of the world until the Industrial Age despite the fact that the country is only now rising to economic dominance In A Military History of China Updated Edition David A Graff and Robin Higham bring together leading scholars to offer a basic introduction to the military history of China from the first millennium B C E to the present Focusing on recurring patterns of conflict rather than traditional campaign narratives this volume reaches farther back into China s military history than similar studies It also offers insightful comparisons between Chinese and Western approaches to war This edition brings the volume up to date including discussions of the Chinese military s latest developments and the country s most recent foreign conflicts      Wealth and Power Orville Schell,John Delury,2013 Two leading experts on China evaluate its rise throughout the past one hundred fifty years sharing portraits of key intellectual and political leaders to

explain how China transformed from a country under foreign assault to a world giant From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself Rather he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era China Indochina Greece the Philippines Malaya Cambodia and Laos Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization Therefore he argues any intervention in a people's war will succeed or fail depending on how it affects this crisis The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements Applying this theory to the ongoing Sendero Luminoso insurgency in Peru Lomperis makes a qualified prediction of that conflict's outcome He concludes that a global trend toward democratization has produced a new era of people's rule

Bauer, 2001-04-30 Why do we acquire the things we do Behind this apparently ingenuous question are several answers some straightforward and others more interesting To feed ourselves might be the first response for we can easily see that we expend much energy in the quest for food Clothing and shelter as well would seem to constitute our basic needs Yet we quickly see that even in the Garden of Eden people want more than they need This simple impulse has created the ever mounting abundance we call progress and nearly all of the subsequent trouble on our planet Four main interwoven themes run through this exploration of material culture and consumption in Latin America over the past five centuries supply and demand the relationships between consumption and identity the importance of ritual both ancient and modern in what we

buy and the relationship between colonial and post colonial power in consumption      **Power and Sustainability of the Chinese State** Keun Lee, Joon-Han Kim, Wing Thye Woo, 2009-01-13 Since the start of the 21st century China has risen to the status of an important world power This book examines Chinese power focusing in particular although not exclusively on its economic capabilities and considering how this is likely to develop in the future It provides a detailed assessment of the key facets of Chinese power today including GDP growth multinationals and technological and scientific innovation It identifies the key trends in these areas compares China's experience with other important global powers such as the US and considers how this is viewed by the Chinese themselves including through the lens of their popular culture and mass media It goes on to identify the foremost problems facing China and the Chinese state today including fiscal management and public finance poverty inequality and rural development and considers whether China is capable of overcoming these challenges and continuing its remarkable economic development It addresses crucial questions such as the impact of globalization on Chinese power and whether Communist Party rule is sustainable for the foreseeable future
