Abstract: The frequency and quality of intergroup contact within racially and ethnically diverse schools has potentially important implications for the achievement of desegregation goals. The analyses presented here use survey data to assess intergroup contact within a sample of ten interdistrict magnet schools in Connecticut. Findings indicate frequent intergroup interactions within interdistrict magnet schools, but also that the perceived quality of intergroup relations differs across racial groups and both the frequency and quality of intergroup contact varies considerably across schools. Students who report higher quality intergroup relations in their school also tend to report more positive academic environments and more positive attitudes towards other groups.

Hansen, 2009 In Collaboration author Morten Hansen takes aim at what many leaders inherently know in today's competitive environment: companywide collaboration is an imperative for successful strategy execution yet the sought-after synergies are rarely if ever realized. In fact, most cross-unit collaborative efforts end up wasting time, money, and resources. How can managers avoid the costly traps of collaboration and instead start getting the results they need? In this book, Hansen shows managers how to get collaboration right through disciplined collaboration: a practical framework and set of tools managers can use to assess when and when not to pursue collaboration across units to achieve goals. Identify and overcome the four barriers to collaboration. Get people to buy into the larger picture even when they own only a small piece of it. Be a T-Shaped Manager: collaborating across divisions while still working deeply in your own unit. Create networks across the organization that are not large but nimble and effective.
