Looking At The Invisible Universe:

Looking at the Invisible Universe James Jespersen, Jane Fitz-Randolph, 1990 Discusses the aspects of our universe that we do not see and how they were discovered The Invisible Universe Matthew Bothwell, 2021-11-11 From the discovery of entirely new kinds of galaxies to a window into cosmic prehistory Bothwell shows us the Universe as we've never seen it before literally Since the dawn of our species people all over the world have gazed in awe at the night sky But for all the beauty and wonder of the stars when we look with just our eyes we are seeing and appreciating only a tiny fraction of the Universe What does the cosmos have in store for us beyond the phenomena we can see from black holes to supernovas How different does the invisible Universe look from the home we thought we knew Dr Matt Bothwell takes us on a journey through the full spectrum of light and beyond revealing what we have learned about the mysteries of the Universe This book is a guide to the ninety nine per cent of cosmic reality we can't see the Universe that is hidden right in front of our eyes It is also the endpoint of a scientific detective story thousands of years in the telling It is a tour through our Invisible Universe ,
