Lotts Bike:

Bike Boom Carlton Reid, 2017-06-15 Bicycling advocates envision a future in which bikes are a widespread daily form of transportation but this reality is still far away Will we ever witness a true bike boom in cities What can we learn from past successes and failures to make cycling safer easier and more accessible In *Bike Boom* journalist Carlton Reid uses history to shine a spotlight on the present and demonstrates how bicycling has the potential to grow even further if the right measures are put in place by the politicians and planners of today and tomorrow He explores the benefits and challenges of cycling the roles of infrastructure and advocacy and what we can learn from cities that have successfully supported and encouraged bike booms In this entertaining and thought provoking book Reid sets out to discover what we can learn from the history of bike booms

Bike Battles James Longhurst, 2015-04-15 Americans have been riding bikes for more than a century now So why are most American cities still so ill prepared to handle cyclists James Longhurst a historian and avid cyclist tackles that question by tracing the contentious debates between American bike riders motorists and pedestrians over the shared road *Bike Battles* explores the different ways that Americans have thought about the bicycle through popular songs merit badge pamphlets advertising films newspapers and sitcoms Those associations shaped the actions of government and the courts when they intervened in bike policy through lawsuits traffic control road building taxation rationing import tariffs safety education and bike lanes from the 1870s to the 1970s Today cycling in American urban centers remains a challenge as city planners political pundits and residents continue to argue over bike lanes bike share programs law enforcement sustainability and public safety Combining fascinating new research from a wide range of sources with a true passion for the topic Longhurst shows us that these battles are nothing new in fact they are simply a continuation of the original battle over who is and isn't welcome on our roads Watch the trailer <https://www.youtube.com/watch?v=WNleJ0tDvqg>

Bicycles in American Highway Planning Bruce D. Epperson, 2014-11-17 The United States differs from other developed nations in the extent to which its national bicycle transportation policy relies on the use of unmodified roadways with cyclists obeying the same traffic regulations as motor vehicles This policy known as vehicular cycling evolved between 1969 when the 10 speed boom saw a sharp increase in adult bicycling and 1991 when the American Association of State Highway and Transportation Officials adopted an official policy that on road bikeways were not desirable This policy resulted from a growing realization by highway engineers and experienced club cyclists that they had parallel interests the cyclists preferred to ride on highways because most bikeways were not designed for high speeds and pack riding and the highway engineers did not want to divert funding from roadways to construct bikeways Using contemporary magazine articles government reports and archival material from industry lobbying groups and national cycling organizations this book tells the story of how America became a nation of bicyclists

without bikeways Cycling ,2022-07-22 This volume addresses key contemporary aspects in cycling policy practice and research Cycling has seen a sharp increase in scientific and policy attention in the past decade The amount of research has surged over the past couple decades Also levels of cycling have increased substantially in many countries and cities and many areas have seen increases in infrastructure investments In addition the last decade has seen innovations in bicycle technology in particularly the rise of electric assist e bikes and dock less bike sharing schemes This volume reviews the state of the art on cycling from various angles As such it explores planners engineers policy makers provisions for cycling of cyclists and non cyclists travel behaviour and resulting consequences for individuals and society One focus is on demand side aspects including the use of bicycles and their users including patterns and trends in cycling determinants of cycling and modelling of cycling Another focus is on impacts of cycling such as emissions safety aspects as well as changes during the COVID pandemic Contemporary overview of key aspects in cycling research and bicycle planning A focus on design for cycling behavior of cyclists and consequences of cycling **Transportation Research Record** ,1995 Climate Chaos John Hans Gilderbloom,2024-12-15 Featuring insights from influential figures like Pope Francis and Albert Gore alongside contributions from over thirty esteemed authors Climate Chaos Killing People Places and the Planet charts a transformative path from despair to optimism Grounded in rigorous scientific research the book unflinchingly exposes the links between industries such as coal fossil fuels chemical factories liquor tobacco and others and their role in accelerating global warming and mass displacement It courageously challenges climate change denialism advocating for transparency and accountability in addressing these urgent challenges In a time of profound despair this book unites faith and science to forge a path towards a sustainable and livable future Its impact resonates beyond the page inspiring a forthcoming PBS film *Report No. FHWA-RD.
