Marrone, 2014-12-11 A History of Science Magic and Belief is an exploration of the origins of modern society through the culture of the middle ages and early modern period By examining the intertwined paths of three different systems for interpreting the world it seeks to create a narrative which culminates in the birth of modernity It looks at the tensions and boundaries between science and magic throughout the middle ages and how they were affected by elite efforts to rationalise society often through religion The witch crazes of the sixteenth and seventeenth century are seen as a pivotal point and the emergence from these into social peace is deemed possible due to the Scientific Revolution and the politics of the early modern state This book is unique in drawing together the histories of science magic and religion It is thus an ideal book for those studying any or all of these topics and with its broad time frame it is also suitable for students of the history of Europe or Western civilisation in general **Official Gazette of the United States Patent and Trademark Office**, 1979 **The Origin of the Inequality of the Social Classes** Gunnar Landtman, 2015-12-22 Originally published in 1938 The Origin of the Inequality of the Social Classes presents ethnological research into how rank and inequality has been created or formed in various societies This study especially focuses on recent changes in aboriginal cultures with particular attention paid to the Kiwai Papuans of British New Guinea whom Landtman researched extensively from 1910 1912 This title will be of interest to students of Sociology and Anthropology **Paul and Katia meet Mr. Turner** BLANDINE JACQUOT, With more than 80 pictures illustrations and quizzes this book allows the reader to travel through William Turner's era at the beginning of the 19th century and to discover his paintings **Magic and Memory in Giordano Bruno** Manuel Mertens, 2018-06-12 In Magic and Memory in Giordano Bruno Manuel Mertens unravels the enigmatic knot between the mnemonic treatises and the magical writings of the sixteenth century Italian philosopher Giordano Bruno Since long the magical orientation of the Brunian art of memory has been a preoccupation for Bruno scholars like Paolo Rossi Frances Yates and Rita Sturlese This serious study of the philosophical underpinnings of both Bruno's mnemonic treatises and his writings on magic shows that Bruno believed his mnemonic method could prevent demons from corrupting the cognitive process Mertens's focus on Bruno's idea of deification through memory and the philosopher's view on fiery heroic spirits points to a surprisingly literal reading of the heretic's last words **The Character Codex I** Robert Neri, 2015-07 A new supplement from Ranger Games for the Dice Glory game system containing specialist traditional character classes This book is a great resource for both Players and Game Masters introducing classic archetype specialist classes as well as new and strange hybrids Requires the Dice Glory Core Rulebook This book contains Over 70 Fantasy Specialist Classes with full descriptions of class abilities and level progression tables Of these there are 4 Brick classes 16 Fighter classes 7 Adventurer classes 5 Rogue classes 6 Psychic classes 19 mage classes 7 Clergy classes and 13 NPC classes NPC tables which can be applied to NPC's to easily apply
