Magic Lands John M. Findlay,1993-09-22 The American West conjures up images of pastoral tranquility and wide open spaces but by 1970 the Far West was the most urbanized section of the country Exploring four intriguing cityscapes Disneyland Stanford Industrial Park Sun City and the 1962 Seattle World s Fair John Findlay shows how each created a sense of cohesion and sustained people s belief in their superior urban environment This first book length study of the urban West after 1940 argues that Westerners deliberately tried to build cities that differed radically from their eastern counterparts In 1954 Walt Disney began building the world s first theme park using Hollywood s movie making techniques The creators of Stanford Industrial Park were more hesitant in their approach to a conceptually organized environment but by the mid 1960s the Park was the nation s prototypical research park and the intellectual downtown for the high technology region that became Silicon Valley In 1960 on the outskirts of Phoenix Del E Webb built Sun City the largest most influential retirement community in the United States Another innovative cityscape arose from the 1962 Seattle World s Fair and provided a futuristic somewhat fanciful vision of modern life These four became magic lands that provided an antidote to the apparent chaos of their respective urban milieus Exemplars of a new lifestyle they are landmarks on the changing cultural landscape of postwar America

The Magic Kingdom and the Meaning of Life Adam Kadlac, 2025-09-02 What truths and life lessons can we take away from a seemingly trivial theme park in Orlando Florida Father and philosopher Adam Kadlac reflects on his own visits to Walt Disney World arguing that Disney

theme parks are a remarkably fruitful environment in which to reflect on the human condition. On the one hand, engagement with the worlds of Disney is a pervasive feature of many people's everyday experience. On the other hand, the fantastical nature of Disney theme parks casts light on aspects of our lives that may otherwise seem unremarkable. If on a day out at the Magic Kingdom we pause to absorb our surroundings, our thoughts can quickly turn to all sorts of important topics and questions: authenticity and pleasure, what it means for corporations to play such a large role in our culture, whether nostalgia is always bad, and of course, princesses. So many princesses! The Magic Kingdom and the Meaning of Life will challenge Disney lovers and sceptics alike to think more deeply about the things that matter to them.

Disney, Culture, and Curriculum Jennifer A. Sandlin, Julie C. Garlen, 2016-03-10

A presence for decades in individuals' everyday life practices and identity formation, the Walt Disney Company has more recently also become an influential element within the big curriculum of public and private spaces, outside of yet in proximity to formal educational institutions. Disney Culture and Curriculum explores the myriad ways that Disney's curricula and pedagogies manifest in public consciousness, cultural discourses, and the education system. Examining Disney's historical development and contemporary manifestations, this book critiques and deconstructs its products and perspectives while providing insight into Disney's operations within popular culture and everyday life in the United States and beyond. The contributors engage with Disney's curricula and pedagogies in a variety of ways through critical analysis of Disney films, theme parks, and planned communities; how Disney has been taught and resisted both in and beyond schools; ways in which fans and consumers develop and negotiate their identities with their engagement with Disney; and how race, class, gender, sexuality, and consumerism are constructed through Disney content. Incisive, comprehensive, and highly interdisciplinary, Disney Culture and Curriculum extends the discussion of popular culture as curriculum and pedagogy into new avenues by focusing on the affective and ontological aspects of identity development as well as the commodification of social and cultural identities, experiences, and subjectivities.
