The Healing Spring Carol S. Williams,1914

Crafting the Witch Heidi Breuer,2009-05-05 This book analyzes the gendered transformation of magical figures occurring in Arthurian romance in England from the twelfth to the sixteenth centuries In the earlier texts magic is predominantly a masculine pursuit garnering its user prestige and power but in the later texts magic becomes a primarily feminine activity one that marks its user as wicked and heretical This project explores both the literary and the social

motivations for this transformation seeking an answer to the question why did the witch become wicked Heidi Breuer traverses both the medieval and early modern periods and considers the way in which the representation of literary witches interacted with the culture at large ultimately arguing that a series of economic crises in the fourteenth century created a labour shortage met by women As women moved into the previously male dominated economy literary backlash came in the form of the witch and social backlash followed soon after in the form of Renaissance witch hunting The witch figure serves a similar function in modern American culture because late industrial capitalism challenges gender conventions in similar ways as the economic crises of the medieval period

Many Roads to Health Mary K. Moriarty,1922 Healing Dramas Raquel Romberg,2010-01-01 In this intimate ethnography Raquel Romberg seeks to illuminate the performative significance of healing rituals and magic works their embodied nature and their effectiveness in transforming the states of participants by focusing on the visible albeit mostly obscure ways in which healing and magic rituals proceed The questions posed by Romberg emerge directly from the particular pragmatics of Puerto Rican bruja a witch healing shaped by the eclecticism of its rituals the heterogeneous character of its participants and the heterodoxy of its moral economy What if any is the role of belief in magic and healing rituals How do past discourses on possession enter into the performative experience of ritual in the here and now Where does belief stop and where do memories of the flesh begin While these are questions that philosophers and anthropologists of religion ponder they acquire a different meaning when asked from an ethnographic perspective Written in an evocative empathetic style with theoretical ruminations about performance the senses and imagination woven into stories that highlight the drama and humanity of consultations this book is an important contribution to the cross cultural understanding of our capacity to experience the transcendental in corporeal ways

The Nature of Suffering and the Goals of Medicine Eric J. Cassell Clinical Professor of Public Health Cornell University Medical College,1991-10-03 The Nature of Suffering underscores the change that is taking place in medicine from a basic concern with disease to a greater focus on the sick person Cassell centers his discussion on the problem of suffering because he says its recognition and relief are a test of the adequacy of any system of medicine He describes what suffering is and its relationship to the sick person bodies do not suffer people do An exclusive concern with scientific knowledge of the body and disease therefore impedes an understanding of suffering and diminishes the care of the suffering patient The growing criticism that medicine is not sufficiently humanistic does not go deep enough to provide a basis for a new understanding of medicine New concepts in medicine must have their basis in its history and in the development of ideas about disease and treatment Cassell uses many stories about patients to demonstrate that despite the current dominance of science and technology there can be no diagnosis search for the cause of the patient s disease prognostication or treatment without consideration of the individual sick person Recent trends in medicine and society Cassell believes show that it is time for the sick person to be not merely an important concern for physicians but the central focus of medicine He addresses the exciting problems involved in such a shift In this new medicine doctors would have to know the person as well as they know the disease What are persons however and how are doctors to comprehend them The kinds of knowledge involved are varied including values and aesthetics as well as science In the process of knowing the experience of patient and doctor move to

center stage He believes that the exploration of the person will engage medicine in the 21st century just as understanding the body has occupied the last hundred years
