Magnum Landscape:

Magnum Landscape Magnum Photos, 1996 In the tradition of monumental Magnum books this publication brings together an eclectic assortment of work by the finest photographers of our time capturing a riveting and seductive series of fleeting moments around the world For half a century Magnum photographers through countless commissions and their own personal work have produced images that comment on the state of the world In photographing the landscape they are not just spectators but participants aware that the land itself has been shaped by man and that the very notion of a landscape depends on a human viewpoint As each photographer records and interprets a diversity of subject matter to form a unique personal style the variations on this theme are endless landscapes of war of agriculture of industry of cities and motorways of desolation celebration and tranquillity The photographs assimilated in this book invite us to rediscover landscape and urge us to think more profoundly not only about planet earth in its entirety but about our own place in it *Imagining Landscapes* Monica Janowski, Tim Ingold, 2016-05-13 The landscapes of human habitation are not just perceived they are also imagined What part then does imagining landscapes play in their perception The contributors to this volume drawn from a range of disciplines argue that landscapes are imagined in a sense more fundamental than their symbolic representation in words images and other media Less a means of conjuring up images of what is out there than a way of living creatively in the world imagination is immanent in perception itself revealing the generative potential of a world that is not so much ready made as continually on the brink of formation Describing the ways landscapes are perpetually shaped by the engagements and practices of their inhabitants this innovative volume develops a processual approach to both perception and imagination But it also brings out the ways in which these processes animated by the hopes and dreams of inhabitants increasingly come into conflict with the strategies of external actors empowered to impose their own ready made designs upon the world With a focus on the temporal and kinaesthetic dynamics of imagining *Imagining Landscapes* foregrounds both time and movement in understanding how past present and future are brought together in the creative world shaping endeavours of both inhabitants and scholars The book will appeal to anthropologists sociologists and archaeologists as well as to geographers historians and philosophers with interests in landscape and environment heritage and culture creativity perception and imagination **Landscape** John Wylie, 2007-08-07 Landscape is a stimulating introduction to and contemporary understanding of one of the most important concepts within human geography A series of different influential readings of landscape are debated and explored and for the first time distinctive traditions of landscape writing are brought together and examined as a whole in a forward looking critical review of work by cultural geographers and others within the last twenty to thirty years This book clearly and concisely explores landscape theories and writings allowing students of geography environmental studies and cultural studies to fully comprehend this vast and complex topic To aid the student vignettes are used to highlight key writers papers and texts Annotated further reading and student exercises are also included For

Emerging Landscapes Davide Deriu, Krystallia Kamvasinou, 2016-05-06 Emerging Landscapes brings together scholars and practitioners working in a wide range of disciplines within the fields of the built environment and visual arts to explore landscape as an idea, an image, and a material practice in an increasingly globalized world. Drawing on the synergies between the fields of architecture and photography, this collection takes a multidisciplinary approach, combining practice-based research with scholarly essays. It explores and critically reassesses the interface between representation, the imaginary, and symbolic shaping of the human environment and production, the physical and material changes wrought on the land. At a time of environmental crisis and the end of nature, shifting geopolitical boundaries, and economic downturn, Emerging Landscapes reflects on the state of landscape and its future, mapping those practices that creatively address the boundaries between possibility, opportunity, and action in imagining and shaping landscape.

About the Hearth David G. Anderson, Robert P. Wishart, Virginie Vaté, 2013-08-01 Due to changing climates and demographics, questions of policy in the circumpolar north have focused attention on the very structures that people call home. Dwellings lie at the heart of many forms of negotiation. Based on years of in-depth research, this book presents and analyzes how the people of the circumpolar regions conceive, build, memorialize, and live in their dwellings. This book seeks to set a new standard for interdisciplinary work within the humanities and social sciences and includes anthropological work on vernacular architecture, environmental anthropology, household archaeology, and demographics.

Island Landscapes Gloria Pungetti, 2016-11-10 Island Landscapes takes a critical look at the evolution of European islandscapes and seascapes to examine the conditions facing them in the twenty-first century. Considering island landscapes as an expression of European culture, this book envisages future trends and presents clearly the need to find a balance between preservation and development to ensure sustainability. Both large and small islands are illustrated in the book, including the British Isles, Malta, and Cyprus, as well as archipelagos in Norway, Italy, and Greece. Their unique identities and values reveal the remarkable breadth of cultural heritage possessed by these diverse European islands. An interdisciplinary approach is applied to the history, perception, characterisation, and planning of islandscapes and seascapes in Europe to support culturally oriented strategies for these fragile landscapes.

Zen Landscapes Allen S. Weiss, 2013-09-15 The essential elements of a dry Japanese garden are few: rocks, gravel, moss. Simultaneously a sensual matrix, a symbolic form, and a memory theater, these gardens exhibit beautiful miniaturization and precise craftsmanship. But their apparent minimalism belies a true complexity. In *Zen Landscapes*, Allen S. Weiss takes readers on an exciting journey through these

exquisite sites explaining how Japanese gardens must be approached according to the play of scale surroundings and seasons as well as in relation to other arts revealing them as living landscapes rather than abstract designs Weiss shows that these gardens are inspired by the Zen aesthetics of the tea ceremony manifested in poetry painting calligraphy architecture cuisine and ceramics Japanese art favors suggestion and allusion valuing the threshold between the distinct and the inchoate between figuration and abstraction and he argues that ceramics play a crucial role here relating as much to the site specificity of landscape as to the ritualized codes of the tea ceremony and the everyday gestures of the culinary table With more than one hundred stunning color photographs Zen Landscapes is the first in depth study in the West to examine the correspondences between gardens and ceramics A fascinating look at landscape art and its relation to the customs and craftsmanship of the Japanese arts it will appeal to readers interested in landscape design and Japan s art and culture
