Sad massacre of 1942 Hungarian soldiers and gendarmes carried out the crime in the city and surrounding areas in territory Hungary occupied after the German attack on Yugoslavia. The perpetrators believed their acts to be a contribution to a new order in Europe and as a means to ethnically cleanse the occupied lands. In marked contrast to other massacres the Horthy regime investigated the incident and tried and convicted the commanding officers in 1943-44. Other trials would follow. During the 1960s a novel and film telling the story of the massacre sparked the first public open debate about the Hungarian Holocaust. This book examines public contentions over the Novi Sad massacre from its inception in 1942 until the final trial in 2011. It demonstrates how attitudes changed over time toward this war crime and the Holocaust through different political regimes and in Hungarian society. The book also views how the larger European context influenced Hungarian debates and how Yugoslavia dealt with memories of the massacre.

The Massacre in History Mark Levene, Penny Roberts, 1999. The role of massacre in history has been given little focused attention either by historians or academics in related fields. This is surprising as its prevalence and persistence surely demands that it should be a subject of serious and systematic exploration. What exactly is a massacre? When and why does it happen? Is there a cultural as well as political framework within which it occurs? How do human societies respond to it? What are its social and economic repercussions? Are massacres catalysts for change or are they part of the continuity of the human saga? These are just some of the questions the authors address in this important volume. Chronologically and geographically broad in scope, *The Massacre in History* provides in-depth analysis of particular massacres and themes associated with them from the 11th century to the present. Specific attention is paid to 15th century Christian Jewish relations in Spain, the St Bartholomew's Day massacre, England and Ireland in the civil war era, the 19th century Caucasus, the rape of Nanking in 1937 and the Second World War origins of the Serb-Croat conflict. The book explores the subject of massacre from a variety of perspectives: its relationship to politics, culture, religion, and society; its connection to ethnic cleansing and genocide; and its role in gender terms and in relation to the extermination of animals. The historians provide evidence to suggest that the massacre is often central to the course of human development and societal change.
