On Becoming Aware Nathalie Depraz, Francisco J. Varela, Pierre Vermersch, 2003-03-20 This book searches for the sources and means for a disciplined practical approach to exploring human experience The spirit of this book is pragmatic and relies on a Husserlian phenomenology primarily understood as a method of exploring our experience The authors do not aim at a neo Kantian a priori new theory of experience but instead they describe a concrete activity how we examine what we live through how we become aware of our own mental life The range of experiences of which we can become aware is vast all the normal dimensions of human life perception motion memory imagination speech everyday social interactions cognitive events that can be precisely defined as tasks in laboratory experiments e g a protocol for visual attention but also manifestations of mental life more fraught with meaning dreaming intense emotions social tensions altered states of consciousness The central assertion in this work is that this immanent ability is habitually ignored or at best practiced unsystematically that is to say blindly Exploring human experience amounts to developing and cultivating this basic ability through specific training Only a hands on non dogmatic approach can lead to progress and that is what animates this book Series B

Platonic Mysticism Arthur Versluis, 2017-08-16 Restores the Platonic history and context of mysticism and shows how it helps us understand more deeply the humanities as a whole from philosophy and literature to art In Platonic Mysticism Arthur Versluis clearly and tautly argues that mysticism must be properly understood as belonging to the great tradition of Platonism He demonstrates how mysticism was historically understood in Western philosophical and religious traditions and emphatically rejects externalist approaches to esoteric religion Instead he develops a new theoretical critical model for understanding mystical literature and the humanities as a whole from philosophy and literature to art A sequel to his Restoring Paradise this is an audacious book that places Platonic mysticism in the context of contemporary cognitive and other approaches to the study of religion and presents an emerging model for the new field of contemplative science An important work on the mystical experience delving deep into its history particularly from the Platonic perspective An essential text for anyone interested in mysticism and its relationship to philosophy and creative expression Andrew Newberg author of How Enlightenment Changes Your Brain The New Science of Transformation The present work the latest from the pen of Arthur Versluis provides a trenchant learned and illuminating analysis of the origins of Western mysticism in the Platonist tradition relayed through such figures as Plotinus and Dionysius the Areopagite down through Meister Eckhart and others while suitably excoriating the attempts of certain modern philosophers and sociologists of religion to deconstruct it from a materialist perspective I found it a rattling good read John Dillon author of The Heirs of Plato A Study of the Old Academy 347 274 BC **A**
