intellectually challenging read ahead this book is well laid out and it is easy for the reader to pick up the thread of the argument even after a lay off The endnotes after each chapter are useful and comprehensive adding richness to the text through the additional information The bibliography is as comprehensive as it is exhaustive Professor Julien has given us a book that presents both an interesting and alternative perspective to the field of entrepreneurial cross disciplinary research Paul J Ferri International Journal of Entrepreneurial Behaviour and Research it is my view that this book gives a very important contribution for the understanding of development of local entrepreneurship through its cross disciplinary approach I see the book is especially interesting from an entrepreneurship and a regional development perspective this book should inspire research that takes a more holistic approach using different levels of analysis and applies it to economic development at a local territorial level when studying entrepreneurship Einar Lier Madsen International Small Business Journal The reader who is interested in entrepreneurship and or regional development will find this book a welcome contribution to the field Rainer Harms Entrepreneurship and Innovation For too long researchers have regarded local dynamism as the result of the actions of certain entrepreneurs If this were the case how could we explain the simultaneous presence of winning stagnating or declining areas with very similar socioeconomic profiles within the same region Departing from this restrictive and somewhat inadequate approach Pierre Andr Julien considers entrepreneurship as a collective behaviour specifically related to the dynamism of the milieu in which it develops The author introduces a complex innovative theory of local entrepreneurship demonstrating that the emergence of new ventures and the development of existing enterprises cannot be understood without taking into account certain factors locale social capital networking and entrepreneurial culture within a given area are all crucial to entrepreneurial growth Expanding upon this theory the book demonstrates how entrepreneurship can be fostered in order to support collective development Various forms of partnership among socioeconomic actors are then analysed to highlight the social conventions and entrepreneurial culture that connect and intensify the energies at the root of local dynamism This highly original book represents a departure from entrepreneurship literature that is largely limited to the study of entrepreneurs behaviour Its dynamic presentation of holistic theory will prove an extremely absorbing read for those with an academic or professional interest in business and management entrepreneurship and regional development
