Main Currents In Modern American History:

Main Currents in Modern American History Gabriel Kolko, 1976 The Entangled Labor Histories of Brazil and the United States Alexandre Fortes, Gillian McGillivray, Thomas D. Rogers, Fernando Teixeira da Silva, 2022-12-13 Workers in Brazil and the United States have followed parallel and entangled histories for many centuries Recent experiences with progressive popular presidents and authoritarian populist presidents in the two most populous countries in the hemisphere have underscored important similarities The contributors in this volume focus on the comparative and transnational histories of labor between and across Brazil and the United States The countries histories bear the marks of slavery racism transoceanic immigration and rapid urbanization as well as strong regional differentiation and inequalities These features decisively shaped the working classes Brazilian and US labor history debates have erupted and subsided at different times This collection synthesizes those debates while adding new topics and new sources from both countries The international group of historians methodologically innovative chapters explore links resonances and divergences between US and Brazilian labor history They widen the scope of analysis for themes and problems that have long been familiar to historians of work and workers in the two countries but have not provoked close dialogues between scholars in the respective places Though the histories themselves were often entangled the debates about them have too rarely intertwined **For Bread with Butter** Ewa Morawska, 2004-01-22 Christopher Tomlins offers here a critical examination of the impact of the National Labor Relations Act on American unions Dr Tomlins shows how public policy has been shaped to confine labour's role in the American economy and that many of the unions problems stem from the laws which purport to protect them **Common Worlds** Carl A. Maida, 2018-11-23 Common Worlds Paths Toward Sustainable Urbanism explores expert and lay approaches to sustainable urbanism focusing on the politics and civic aesthetics of space and place project based learning and its consequences for the life chances of youth and the prospect of intergenerational civic engagement Extended case studies of sustainable urbanism describe areas undergoing demographic and socioeconomic change over the two decades since the end of the Cold War The case studies based upon participatory action research are framed through the lens of transformational anthropology which focuses on the structural factors and power relationships that contribute to social and economic disparities within a population This approach is based upon principles of personal and group transformation and it holds researchers responsible for collaborating with communities and groups in co constructing research thereby enhancing the constituents ability to carry out subsequent transformational change studies rooted in and shaped by the local community Each case also focuses on a movement in support of aesthetic improvement including preservation conservation and restoration efforts on behalf of parkland open space agricultural land and marine wetlands in the face of external threats to their sustainability **Cold War US Foreign Policy** Steven Hurst, 2019-07-31 This book provides the first comprehensive description and critique of the six most important historical interpretations of US Cold War foreign policy Traditionalism

Revisionism Post Revisionism Corporatism World Systems Theory and Post Structuralism The author uses the levels of analysis approach to demonstrate how each of these perspectives can be understood as an explanatory framework combining different types of factors located at different levels of the international system This original way of explaining the work of the historians discussed helps the reader to see past the narrative and empirical elements of their writings and to grasp more clearly the underlying theoretical assumptions In each chapter a description of the perspective s underlying theoretical framework and how it explains US foreign policy is followed by a critique of that theory and explanation A central theme developed throughout the book is the difficulty of managing the constant tension between the explanatory power of theory and the historian s desire to encompass the complex totality of historical events This critical companion can be read alongside the works of the historians themselves showing how they have sought to explain US Cold War foreign policy and the key differences between their perspectives Key Features 1st complete discussion of the 6 schools of thought in one volume Discusses current issues such as corporatism world systems theory and post structuralism in an accessible manner original use of the levels of analysis framework in studying this subject demonstrates in practical terms how each theory explains US Cold War foreign policy **Workers' Control in America** David Montgomery, 1979 A collection of essays on workers efforts in the 19th and 20th centuries to assert control over the processes of production in US It describes the development of management techniques and includes discussions of various worker and union responses to unemployment

Society and Family Strategy Mark J. Stern, 1987-07-01 Using one of the largest quantitative data bases ever compiled on a single representative community Stern explains and substantiates the reasons for the decline of the fertility rate during the nineteenth and early twentieth centuries He integrates demographic and social history to determine the implications of this aspect of the modernization of America *Society and Family Strategy* describes the impact of capitalism and changing class and ethnic structure on family economy life cycle and ideology The author evaluates recent studies by social historians on the family social class and ethnicity in light of the Erie County experience examines theories of social and cultural change and proposes a non evolutionary model of their relationship **Energy and US Foreign Policy** Ahmed Mahdi, 2012-01-30 The quest for oil can be seen as a defining principle of global US foreign policy an imperative which has shaped and redefined the practice of American diplomacy especially in the wake of 9 11 which raised questions about the stability of global oil resources In *Energy and US Foreign Policy* Ahmed Mahdi relates the military expansion of the world s biggest superpower to its quest to gain guaranteed and secure access to the world s most important commodity Examining the foreign policy of George Bush Sr Bill Clinton and George W Bush culminating in the unprecedented military campaigns of the latter Mahdi demonstrates how and why oil has played a central role in US relations with the wider world By dissecting the failures of the US to secure its own economic and energy interests and by demonstrating the devastating impact this has had on the rest of the world especially in the Middle East Mahdi offers vital analysis for researchers and students of International Relations

Diplomacy Security and Energy Studies **Black Milwaukee** Joe William Trotter,1985 Other historians have tended to treat black urban life mainly in relation to the ghetto experience but in *Black Milwaukee* Joe William Trotter Jr offers a new perspective that complements yet also goes well beyond that approach The blacks in *Black Milwaukee* were not only ghetto dwellers they were also industrial workers The process by which they achieved this status is the subject of Trotter s ground breaking study This second edition features a new preface and acknowledgments an essay on African American urban history since 1985 a prologue on the antebellum and Civil War roots of Milwaukee s black community and an epilogue on the post World War II years and the impact of deindustrialization all by the author Brief essays by four of Trotter s colleagues William P Jones Earl Lewis Alison Isenberg and Kimberly L Phillips assess the impact of the original *Black Milwaukee* on the study of African American urban history over the past twenty years US Foreign Policy Michael Cox,Doug Stokes,2012-02-09 This textbook provides a comprehensive introduction to US foreign policy Bringing together a number of the world s leading experts the text deals with the rise of America US foreign policy during and after the Cold War and the complex issues facing the US since September 11th *Drums of War, Drums of Development: The Formation of a Pacific Ruling Class and Industrial Transformation in East and Southeast Asia, 1945-1980* Jim Glassman,2018-08-13 In *Drums of War Drums of Development* Jim Glassman analyses the geopolitical economy of industrial development in East and Southeast Asia during the Vietnam War era showing how it was shaped by the collaborative planning of US and Asian elites Challenging both neo liberal and neo Weberian accounts of East Asian development Glassman offers evidence that the growth of industry the East Asian miracle was deeply affected by the geopolitics of war and military spending the East Asian massacres Thus while Asian industrial development has been presented as providing models for emulation Glassman cautions that this industrial dynamism was a product of Pacific ruling class manoeuvring which left a contradictory legacy of rapid growth death and ongoing challenges for development and democracy Shortlisted for the 2019 Deutscher Memorial Prize The Liberal State on Trial Jonathan Bell,2004 What was left in both senses of the word of liberalism after the death of Franklin Roosevelt Using case studies from Senate and House races from 1946 to 1952 this book explores the role of the Cold War in shifting the center of gravity in American politics sharply to the right in the years immediately following World War II Bell demonstrates that there was far more active and vibrant debate about the potential for liberal ideas before they become submerged in Cold War anti state rhetoric than has generally been recognized **The Invention of the Western Film** Scott Simmon,2003-06-30 Table of contents Franklin D. Roosevelt Michael Heale,2002-01-04 This compact study assesses the personality political and economic policies in war and peace of America s longest serving president and one of the most important political figures of the twentieth century Franklin D Roosevelt Also providing an overview of the America over which Roosevelt presided the book offers a concise survey of both domestic and foreign affairs **Reliving the Past** Olivier Zunz,Charles Tilly,David William Cohen,William B. Taylor,William T. Rowe,2014-02-01 Five historians uncover the ties

between people's daily routines and the all encompassing framework of their lives. They trace the processes of social construction in Western Europe, the United States, Latin America, Africa, and China, discussing both the historical similarities and the ways in which individual history has shaped each area's development. They stress the need for a social history that connects individuals to major ideological, political, and economic transformations. The United States and the Global Struggle for Minerals Alfred E. Eckes, 2014-09-10. In 1973-1974, soaring commodity prices and an oil embargo alerted Americans to the twin dangers of resource exhaustion and dependence on unreliable foreign materials suppliers. This period seemed to mark a watershed in history as the United States shifted from the era of relative resource abundance to relative materials scarcity. Alfred E. Eckes's comprehensive study shows that resource depletion and supply dislocations are not concerns unique to the 1970s. Since 1914, the quest for secure and stable supplies of industrial materials has been an important underlying theme of international relations and American diplomacy. Although the United States has been blessed with a diversified materials base, it has pursued a minerals strategy designed to exploit low cost, high quality ores abroad. Eckes demonstrates how this policy has led to official protection for overseas private investments involving a role for the Central Intelligence Agency. Some modern historians have neglected the importance of resources in shaping diplomacy and history. This book, based on a vast variety of unutilized archival collections and recently declassified government documents, helps to correct that imbalance. In the process, it illuminates an important and still timely aspect of America's global interests.

U.S. Politics and the Global Economy Ronald W. Cox, Daniel Skidmore-Hess, 1999. This book investigates the influence of globalization on ideology and politics in the United States. Ronald Cox and Daniel Skidmore-Hess argue that U.S. policy has been motivated less by anxiety about the independence and stability of the domestic economy and more by worry about factors that might limit the participation of U.S. corporations in international markets. Connecting trends in domestic and foreign policy with the changing needs of industry, they associate increased globalization with the breakup of the liberal New Deal coalition, the collapse of the Bretton Woods Agreement in the 1970s, the neoconservative antiregulatory movements of the 1980s, and the rightward drift of both the Republican and Democratic Parties. Accumulation and Power Richard B. DuBoff, 2016-07-22. *Accumulation and Power* analyses America's economic development across three great waves of economic expansion: the Grand Traverse (1850-1900), the New Era (1916-1929), and the Great Postwar Boom (1945-1972). Drawing on the work of Keynes, Schumpeter, Marx, it departs radically from the new economic history model, focusing instead on capitalist decision making and its social consequences. It argues that the accumulation process is far more important than competitive markets in explaining resource allocation and growth. This innovative book is essential reading for all students and scholars of American economic history. *Truth in Publishing* Linda Lawson, 1993. The Newspaper Publicity Act passed in 1912 is still in effect and requires commercial newspapers and magazines using the preferential second class mail rate to identify their owners and investors and to label advertisements that resemble news stories or editorials. These publications are also

required to disclose circulation data along with their ownership statements In part 1 Linda Lawson documents the press s inner workings including its excesses and abuses as it evolved from a collection of small businesses in the mid 1800s to an established commercial institution of the twentieth century Large urban newspapers challenged small rural papers at the same time burgeoning popular magazines and trade journals competed fiercely with every other type of publication for advertisers and readers The regulatory actions brought about by these divisions within the industry are treated in part 2
