Maisons De Paris Et Propriétaires Parisiens Au Xix Siecle 1809-1880:

Maisons de Paris et propriétaires parisiens au XIXe siècle, 1809-1880 Adeline Daumard, 1965 **Housing the Poor of Paris, 1850-1902** Ann-Louise Shapiro, 1985 In the second half of the nineteenth century when Paris became a modern urban center the problem of working class housing emerged as a major issue In this study Ann Louise Shapiro examines the reform activities of philanthropists economist municipal authorities politicians and public hygienists as they together and separately responded to the questions of the worker's foyer Shapiro shows that the housing campaign touched all aspects of the social question providing a rare perspective on the political social and institutional readjustments required by a changing urban environment in nineteenth century France Shapiro's work will prove important reading for students and scholars of French history urban society and government and public health issues **The Working People of Paris, 1871-1914** Lenard Berlanstein, 2019-08-01 Originally published in 1984 In The Working People of Paris 1871 1914 Lenard Berlanstein examines how technological advances expanding industrialization bureaucratization and urban growth affected the lives of the working poor and near poor of one of the world's most influential cities during an era of intense social and cultural change Berlanstein departs from other historians of the working classes in treating in a parallel manner not only craftsmen and factory laborers but also service workers and lower level white collar employees Avoiding the fallacy of letting the city limits set the boundaries of an urban study he deals also with the industrial suburbs with their considerable concentration of workers to examine the transformation of the work leisure and consumer experiences of the people who did not own property and who lived from one payday to the next during the Second Industrial Revolution The Working People of Paris describes a cycle of adaptation and resistance to the forces of economic maturation For several decades after 1871 Berlanstein argues working people and employees preserved accommodations with management about reciprocal rights in the workplace By the beginning of the twentieth century however these forms of adaptation had broken down under new economic pressures The result was a crisis of discipline in the workplace as wage earners and modest clerks began to challenge managerial authority Berlanstein's study confronts the widely accepted view that during this period workers became better integrated into a society of improving standards of living and mass leisure Instead he documents uneven patterns of material progress and growing conflict over work roles among all sorts of laboring people **La Bourgeoisie parisienne de 1815 à 1848** Adeline Daumard, 2014-04-01 Dans les années soixante l'histoire sociale tant alors en plein essor Adeline Daumard publiait cet ouvrage aujourd'hui r dit que Pierre L on a qualifié oeuvre de pionnier travers données quantitatives et statistiques minutées de notaires listeslectorales sans négliger m moires correspondances pécunaires et romans elle faisait alors apparaître l'émergence d'une véritable civilisation construite par la génération contemporaine de la Révolution et ses héritiers Dans ce premier XIXe siècle Paris la bourgeoisie s'installe et crée un monde d'argent mais surtout un univers fondé sur la foi en l'individu citoyen capable par un bon usage de la raison de maîtriser l'avenir Adeline Daumard

The Artisan and the European Town, 1500-1900 Geoffrey Crossick,2016-12-05 Artisans played a central role in the European town as it developed from the Middles Ages onwards Their workshops were at the heart of productive activity their guilds were often central to the political and legal order of towns and their culture helped shape civic ritual and the urban order These essays which have all been specially written for this collection explore the relationships between artisans and their towns across Europe between the beginning of the early modern period and the end of the 19th century They pay special attention to the processes of economic juridicial and political change that have made the 18th and early 19th centuries a period of such significance Written by leading historians of European artisans the essays question the myths about artisans that have long pervaded research in the field The leading myth was that shared by the artisans themselves the myth of decline and the belief in each generation that artisans in the past had inhabited a better age These essays open up

for debate the nature of artisanship the way economic change affected craft production the political role of artisans the cultural identification of the artisans with work and masculinity and the way changing urban society and changing urban structure posed threats to which the artisans had to respond *Manifestoes and Transformations in the Early Modernist City* Christian Hermansen Cordua, 2016-05-13 The industrialization of the nineteenth century European city facilitated developing conceptions of the model city and allowed for large scale urban transformations The urban discourse in the latter half of the nineteenth century was consequently dominated by a dialectic exchange between the ideal and the practical a debate played out in the formation of the modern metropolis *Manifestoes and Transformations* is the first work to deal with urban utopias and their relationship with actual urban interventions Bringing together a carefully chosen wide ranging team of experts the book provides a broad contextual exploration of the ideas and urban practices which are the foundations of our conception of the contemporary city As such it is a valuable resource for students interested in the formation of the modernist city

Real Estate and Global Urban History Alexia Yates, 2021-08-26 Capitalist private property in land and buildings real estate is the ground of modern cities materially politically and economically It is foundational to their development and core to much theoretical work on the urban environment It is also a central pressing matter of political contestation in contemporary cities Yet it remains largely without a history This Element examines the modern city as a propertied space defining real estate as a technology of dis possession and using it to move across scales of analysis from the local spatiality of particular built spaces to the networks of legal political and economic imperatives that constitute property and operate at national and international levels This combination of territorial embeddedness with more wide ranging institutional relationships charts a route to an urban history that allows the city to speak as a global agent and artefact without dispensing with the role of states and local circumstance
