Established as a top secret site for development of the atomic bomb as part of World War II's Manhattan Project, Los Alamos National Laboratory in New Mexico has from its very beginnings hosted some of the world's most brilliant scientists. Many of them were recipients of the internationally famous award for scientific accomplishment, the Nobel Prize. In Nobel Laureates of Los Alamos: The Manhattan Project Era, editors Rizwan Ali, who directs the National Security Research Center at Los Alamos, and Brye Ann Steeves have, with the assistance of a talented team of writers and designers, assembled portraits of the visionary researchers whose names are indelibly engraved in the popular imagination: Enrico Fermi, Richard Feynman, Maria Goeppert Mayer, and others. But these are not merely sketches of great intellects. Among the Nobel laureates profiled here, we also find a sly practical joker, an avid fly fisherman, an inward-focused beachcomber, a spontaneous comedian, and a gifted singer, along with the Lab's wartime leader, J. Robert Oppenheimer, who was never a Nobel Prize recipient himself. During the early years at Los Alamos, under the shroud of secrecy imposed by the dictates of the Manhattan Project, these scientists lived, labored, debated, explored the limits of human knowledge, and collectively laid the foundation for not only the development of the nuclear age but of vast swaths of science and technology during the twentieth century. Offered in a lively, visually rich, and easy-to-read presentation, this book provides a three-dimensional recollection of some of the most important scientific

pioneers of the modern age. **Lives of the Laureates, sixth edition** Roger W. Spencer, David A. Macpherson, 2014-11-28. Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process. *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by twenty-three Nobel Prize laureates in Economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. The accounts are accessible and engaging, achieving clarity without sacrificing inherently difficult content. This sixth edition adds four recent Nobelists to its pages: Eric Maskin, who illustrates his explanation of mechanism design with an example involving a mother, a cake, and two children; Joseph Stiglitz, who recounts his field's ideological wars linked to policy disputes; Paul Krugman, who describes the insights he gained from studying the model of the Capitol Hill Babysitting Coop and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them; and Peter Diamond, who maps his development from student to teacher to policy analyst. *Lives of the Laureates* grows out of a continuing lecture series at Trinity University in San Antonio, which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. These lectures demonstrate the richness and diversity of contemporary economic thought. The reader will find that paths cross in unexpected ways: that disparate thinkers were often influenced by the same teachers and that luck as well as hard work plays a role in the process of scientific discovery. The Laureates: Lawrence R. Klein, Kenneth J. Arrow, Paul A. Samuelson, Milton Friedman, George J. Stigler, James Tobin, Franco Modigliani, James M. Buchanan, Robert M. Solow, William F. Sharpe, Douglass C. North, Myron S. Scholes, Gary S. Becker, Robert E. Lucas Jr., James J.
