## **Nobel Prize Conversations:**

**Nobel Prize Conversations with Sir John Eccles, Roger Sperry, Ilya Prigogine, Brian Josephson** John Carew Eccles, Norman Cousins, 1985     *The Nobel Prize Winners* Frank Northern Magill, 1989     **Nobel Prize Conversations with Sir John Eccles, Roger Sperry, Ilya Prigogine, Brian Josephson** , 1985     *Podcast Journalism* David Dowling, 2024-03-19

Runner up 2025 Tankard Book Award Association for Education in Journalism and Mass Communication Podcasting's stratospheric rise has inspired a new breed of audio reporting Offering immersive storytelling for a binge listening audience as well as reaching previously underserved communities podcasts have become journalism's most rapidly growing digital genre buoying a beleaguered news industry Yet many concerns have been raised about this new medium such as the potential for disinformation the influence of sponsors on content the dominance of a few publishers and platforms and at times questionable adherence to journalistic principles David O Dowling critically examines how podcasting and its evolving conventions are transforming reporting and even reshaping journalism's core functions and identity He considers podcast reporting's most influential achievements as well as its most consequential ethical and journalistic shortcomings emphasizing the reciprocal influences between podcasting and traditional and digital journalism Podcasting both as a medium and a business has benefited from the blurring of boundaries separating news from entertainment editorial from advertising and neutrality from subjectivity The same qualities and forces that have allowed podcasting to bypass the limitations of traditional categories expand the space of social and political discourse and provide openings for marginalized voices have also permitted corporations to extend their reach and far right firebrands to increase their influence Equally attentive to the medium's strengths and flaws this is a vital book for all readers interested in how podcasting has changed journalism

**Conversations with Great Economists** Diego Pizano, 2009-08

Depressions are not the result of the operation of the market They are the result of government controls particularly in the sphere of monetary policy Professor F A Hayek Nobel Prize winner in Economics It is because I want to make economics more human that I want to make it more time conscious Professor Sir John Hicks Nobel Prize winner in Economics The most important challenge facing the world economy is the need to strengthen the adjustment mechanism between the growth of supply and demand for primary products Professor N Kaldor Cambridge University Many people in the Soviet Union are aware that our economic system is not perfect It is true that the Soviet economy's growth rate has decreased Professor L V Kantorovich Nobel Prize Winner in Economics The unemployment of developing economies arises because productive capacity and effective demand have never been at an appropriate level Professor J Robinson University of Cambridge Schumpeter was wrong when he thought there is a timetable for the disappearance of capitalism Professor P Samuelson Nobel Prize winner in Economics I am not as optimistic as Keynes in the sense the economic problem will disappear as a result of compound interest and technical progress Professor J Tinbergen Nobel Prize Winner in Economics A useful and important book Professor P Samuelson MIT Nobel Prize winner in

economics A lively addition to the economics literature Professor A Hirschman Institute for Advanced Study Princeton New Jersey You will have read studied or taught the work of these outstanding economists Now you get a chance to meet them Through the work of Diego Pizano we learn about how they thought and not just what they thought Professor R Bates Harvard University Through penetrating and well structured questions Colombian economist Diego Pizano manages to reveal the thought processes of five of the first Nobel Prize winners in Economics and two who could have obtained it Joan Robinson and N Kaldor This book has to be read by all researchers interested in the history of economic thought and by all persons interested in economics as a discipline Professor D Hueth University of Maryland

Larson former Commissioner of the Atomic Energy Commission and his wife Jane Larson Tapes     45 Conversations About Behavioral Economics Li Way Lee, Aaron Keathley, 2022-07-12 The hallmark of this book is its conversational format The conversations are organic no jargons no additives such as equations and tables Each conversation comes in bite size taking no more than ten minutes to digest     *Dna Doctor, The: Candid Conversations With James D Watson* Istvan Hargittai, 2007-07-11 Three in depth conversations with the Nobel laureate co discoverer of the double helix and the first director of the Human Genome Project cover a wide range of topics including progress in science the scientist s role in modern life women in science scientific ethics terrorism religion multiculturalism and how genetics may improve human lives Reflections by further illustrious contributors to the scientific revolution and the author s commentaries provide a glimpse into the thinking of scientists who largely determine the progress of humankind in our time     **The Truth about Human Origins** Brad Harrub, Bert Thompson, 2003 Ever since Charles Darwin first published *The Origin of Species* on November 24 1859 the subject of origins has been one of the most controversial topics around Sadly it also is a subject that is fraught with erroneous theories and concepts Most students today are taught that organic evolution is not a theory but a fact that all reputable scientists accept Disclaimers from the evolutionary community notwithstanding such a claim is quite simply wrong We believe it is time for someone to offer what renowned news commentator Paul Harvey would call the rest of the story That is what *The Truth About Human Origins* does It tells the rest of the story as it discusses the scientific facts about mankind s beginning For example it investigates the record of the rocks as that record relates to human evolution It demonstrates how evolutionary theory is unable to explain things like the origin of gender and sexual reproduction the origin of language and communication the origin of the brain the mind and human consciousness and the origin of skin colors and blood types It also examines in an in depth fashion the so called molecular evidence of human evolution     Candid Science Iii: More Conversations With Famous Chemists Istvan Hargittai, Magdolna Hargittai, 2003-03-21 In this invaluable book 36 famous chemists including 18 Nobel laureates tell the reader about their lives in science the beginnings of their careers their aspirations and their hardships and triumphs The reader will learn about their seminal discoveries and the conversations in the book bring out the humanity of these great scientists Highlighted in the stories are the discovery of new elements and compounds the VSEPR model computational chemistry organic synthesis natural products polysaccharides supramolecular chemistry peptide synthesis combinatorial chemistry X ray crystallography the reaction mechanism and kinetics electron transfer in small and large systems non equilibrium systems oscillating reactions atmospheric chemistry chirality and the history of chemistry     Candid Science Ii: Conversations With Famous Biomedical Scientists Istvan Hargittai, 2002-03-15 This invaluable book contains 36 interviews including 26 with Nobel laureates It presents a cross section of biomedical science a field that has been dominant in science for the past half century The in depth conversations cover important research areas and discoveries as well as the roads to these discoveries including aspects of the scientists work that never

saw publication They also bring out the humanness of the famous scientists the reader learns about their backgrounds aspirations failings and triumphs The book is illustrated with snapshots of the conversations and photos provided by the interviewees It is a follow up to the critically acclaimed Candid Science Conversations with Famous Chemists by the same author a     **Brain Circuits and Functions of the Mind** Roger Sperry, Colwyn B. Trevarthen, 1990-01-26 Roger Sperry has made outstanding contributions to neuroscience Here he and over twenty of his contemporaries review 50 years of both his work and their own in the context of Sperry's contribution to their fields Sperry's challenging theories are still much alive in brain science cognitive psychology and the philosophy of the mind
