Western Empires, Christianity and the Inequalities between the West and the Rest Sampie Terreblanche,2014-09-30 The acute problem of inequality in the world was brought centre stage by the sensational appearance of French economist Thomas Piketty s bestselling book *Capital in the Twenty first Century* In *Western Empires Christianity and the Inequalities between the West and the Rest* 1500 2010 Sampie Terreblanche studies the matter from a political economic perspective and brings five centuries of global history to bear in his focus on global as opposed to internal national inequalities The unprecedented accumulation of wealth in the Western world has come at a dire cost to the Restern world a term the author coins and empire building is at the root of it The last 500 years have seen successive epochs of empire followed by war and systemic chaos During this time the haves of world history have systematically channeled global resources towards the West through cunning and conquest a process in which Christian missionary societies played a key role as the soft avant garde followed by the hardware The book deals with several concepts of empire and the forces through which empires have been rolled out through history arms money ideology religion What fed into the Eurocentrism and notion of superiority which paved the way for a lamentable history of slavery exploitation and the unremitting accumulation of wealth and power The book shows how clearly dangerous a world we live in with the scales as precipitously tipped as they are Ten years in the writing and in many ways the apex of this decorated author s life work *Western Empires* is a book for everyone who wishes to understand or address the extreme concentration of wealth in the hands of the global few and the hopeless poverty of the many

Western Civilization: Since 1560 Thomas F. X. Noble,1998 The Brief Edition of *Western Civilization* presents a strong chronological and political framework and seamlessly integrates the social and cultural forces that have shaped the western past Two related themes are pursued throughout 1 Europe in relation to the rest of the world and non Western influences and 2 power in all its senses public and private economic social cultural and political symbolic and real *Views from the Margins* Kevin J. Callahan,Sarah Ann Curtis,2008-01-01 These essays explain French identity as a fluid process rather than a category into which French citizens and immigrants are expected to fit They offer examples drawn from an imperial history of France that show the power of the periphery to shape diverse and dynamic modern French identities at its centre
