Parenting for a Happier Home Stuart Passmore,2016-03-21 Being a parent can be tough and there are times when you just don t have all the answers For parents who find themselves faced with a seemingly endless spiral of conflict poor behaviour and ineffective discipline this is the evidence based parenting program they ve been waiting for Divided into 12

sessions it first focuses on developing a strong relationship between parent and child Once a firm foundation of parenting strategies has been developed the program then moves onto effective discipline The discipline program is designed so that it is self sustaining and allows the parent to step back from what is often an emotionally charged situation and instead use predetermined consequences It also emphasises teaching children ownership of their behaviour The beauty of this program is that the principles can be used in each of the child s environments at home at school with grandparents etc while it has also been designed so that any parent can use it as well as those with children who have been diagnosed with behavioural disorders such as ADHD Oppositional Defiance Disorder or explosive and non compliant behaviour It s a commonsense practical guide to getting your kids back on track and creating a happier home

William W. Meissner,2007 This book is a study of time particularly of the nature of subjective time that is time as subjectively experienced and lived in contrast with time as measured objectively as for example by a clock The argument first addresses the development of the time experience its origins in infantile experience and traces its variations and modifications during the course of the life cycle As the life course advances concerns about and preoccupations with death play an increasingly important role in attitudes toward and involvement in temporally related contexts The next step is an examination of the phenomenology of time experience itself and its dependence on biorhythms and affective influences An important aspect of this discussion is the relation between time experience as a conscious phenomenon and the functioning

of unconscious determinants of the time experience This leads to the question given these conclusions regarding the nature of time experience what implications can we draw for the understanding of the nature and functioning of the self within psychoanalysis The book s final section applies these understandings to the analytic process focusing particularly on the meaning of the time experience in the patient s psychic reality and patterns of enactment around issues of time and time management in the analytic situation
