*Sound and Noise* Marcia Jenneth Epstein, 2020-10-30 This book is about how you listen and what you hear about how to have a dialogue with the sounds around you Marcia Jenneth Epstein gives readers the impetus and the tools to understand the sounds and noise that define their daily lives in this groundbreaking interdisciplinary study of how auditory stimuli impact both individuals and communities Epstein employs scientific and sociological perspectives to examine noise in multiple contexts as a threat to health and peace of mind as a motivator for social cohesion as a potent form of communication and expression of power She draws on a massive base of specialist literature from fields as diverse as nursing and neuroscience sociology and sound

studies acoustic ecology and urban planning engineering anthropology and musicology among others synthesizing and explaining these findings to evaluate the ubiquitous effects of sound in everyday life Epstein investigates speech and music as well as noise and explores their physical and cultural dimensions Ultimately she argues for an engaged public dialogue on sound built on a shared foundation of critical listening and provides the understanding for all of us to speak and be heard in such a discussion Sound and Noise is a timely evaluation of the noise that surrounds us how we hear it and what we can do about it *Acoustic Territories, Second Edition* Brandon LaBelle, 2019-10-17 The revised edition of *Acoustic Territories Sound Culture and Everyday Life* offers an expansive reading of auditory life It provides a careful consideration of the performative dynamics inherent to sounding and listening and discusses how sound studies may illuminate understandings of contemporary society Combining research on urbanism popular culture street life and sonic technologies *Acoustic Territories* opens up a range of critical perspectives it challenges debates surrounding noise pollution and charts an acoustic politics of space by engaging auditory experience as found within particular cultural histories and related ideologies Brandon LaBelle traces sound culture through a topographic structure from underground territories to the home and further into the rhythms and vibrations of streets and neighborhoods and finally to the sky itself as an arena of transmitted imaginaries The new edition includes an additional global territory of the relational positioning acoustics as a range of everyday practices that rework dominant tonalities Questions of orientation and emplacement are critically raised reframing listening as multi modal and intrinsic to resistant socialities and what the author terms acts of compositioning The book is fully updated to include new relevant research and references surfacing since 2010 as well as a new preface to the second edition *Acoustic Territories* continues to uncover the embedded tensions and potentialities inherent to sound as it exists in the everyday spaces around us

**Dark Side of the Tune: Popular Music and Violence** Professor Bruce Johnson, Professor Martin Cloonan, 2013-01-28 Written against the academically dominant but simplistic romanticization of popular music as a positive force this book focuses on the dark side of the subject It is a pioneering examination of the ways in which popular music has been deployed in association with violence ranging from what appears to be an incidental relationship to one in which music is explicitly applied as an instrument of violence A preliminary overview of the physiological and cognitive foundations of sounding hearing which are distinctive within the sensorium discloses in particular their potential for organic and psychic violence The study then elaborates working definitions of key terms including the vexed idea of the popular for the purposes of this investigation and provides a historical survey of examples of the nexus between music and violence from pre Biblical times to the late nineteenth century The second half of the book concentrates on the modern era marked in this case by the emergence of technologies by which music can be electronically augmented generated and disseminated beginning with the advent of sound recording from the 1870s and proceeding to audio internet and other contemporary audio technologies Johnson and Cloonan argue that these technologies have transformed the potential of music to mediate cultural

confrontations from the local to the global particularly through violence The authors present a taxonomy of case histories in the connection between popular music and violence through increasingly intense forms of that relationship culminating in the topical examples of music and torture including those in Bosnia Darfur and by US forces in Iraq and Guant namo Bay This however is not simply a succession of data but an argumentative synthesis Thus the final section debates the implications of this nexus both for popular music studies itself and also in cultural policy and regulation the ethics of citizenship and arguments about human rights
