Miller,2024 This book raises the case of the world s first nomadic empire the Xiongnu as a prime example of the sophisticated developments and powerful influence of nomadic regimes Launching from a reconceptualization of the social and economic institutions of mobile pastoralists the collective chapters trace the course of the Xiongnu Empire from before its initial rise traversing the wars that challenged it and the reformations that made it stronger to the legacy left after its eventual fall Xiongnu expounds the economic practices and social conventions of steppe herders as fertile foundations for institutions and infrastructure of empire and renders a model of empires of mobilities which engaged the control less of towns and territories and more of the movements of communities and capital to fuel their regimes By weaving together archaeological examinations with historical investigations Bryan K Miller presents a more complex and nuanced narrative of how an empire based firmly in the steppe over two thousand years ago managed to formulate a robust political economy and a complex political matrix that capitalized on mobilities and alternative forms of political participation and allowed the Xiongnu to dominate vast realms of central Eurasia and leave lasting geopolitical effects on the many worlds around them

**Anywhere out of the world** Jonathan Chatwin,2017-10-02 By the time of his death in 1989 at the age of forty eight Bruce Chatwin had become one of the most celebrated writers of the twentieth century Though his career spanned merely twelve years his impact and influence was profoundly felt Chatwin s first book *In Patagonia* redefined travel writing whilst his later work *The Songlines* became one of the literary sensations of the 1980s Incorporating original and extensive archival research as well as new interviews with his family and friends *Anywhere out of the world* provides the definitive critical perspective upon the literary life and work of this enigmatic and influential author The work offers a chronological overview of Chatwin s literary career from his first ultimately aborted work *The Nomadic Alternative* here discussed in detail for the first time through to his final novel *Utz* In subjecting his work to such analysis the study uncovers a striking thematic commonality in Chatwin s oeuvre his work is fundamentally preoccupied with the subject of human restlessness This volume provides detailed insight into Chatwin s treatment of the subject in his work identifying and discussing the biographical and philosophical sources of this defining preoccupation *Climate Change* - Arie S. Issar,Mattanyah Zohar,2007-06-10 This

**Inner Asia and the Spatial Politics of Empire** William Honeychurch, 2014-11-05 This monograph uses the latest archaeological results from Mongolia and the surrounding areas of Inner Asia to propose a novel understanding of nomadic statehood political economy and the nature of interaction with ancient China In contrast to the common view of the Eurasian steppe as a dependent periphery of Old World centers this work views Inner Asia as a locus of enormous influence on neighboring civilizations primarily through the development and transmission of diverse organizational models technologies and socio political traditions This work explores the spatial management of political relationships within the pastoral nomadic setting during the first millennium BCE and argues that a culture of mobility horse based transport and long distance networking promoted a unique variant of statehood Although states of the eastern steppe were geographically large and hierarchical these polities also relied on techniques of distributed authority multiple centers flexible structures and ceremonialism to accommodate a largely mobile and dispersed populace This expertise in spatial politics set the stage early on for the expansionistic success of later Asian empires under the Mongols and Manchus Inner Asia and the Spatial Politics of Empire brings a distinctly anthropological treatment to the prehistory of Mongolia and is the first major work to explore key issues in the archaeology of eastern Eurasia using a comparative framework The monograph adds significantly to anthropological theory on interaction between states and outlying regions the emergence of secondary complexity and the growth of imperial traditions Based on this approach the window of Inner Asian prehistory offers a novel opportunity to investigate the varied ways that complex societies grow and the processes articulating adjacent societies in networks of mutual transformation
