**Conceptual Joining** Lukas Allner, Christoph Kaltenbrunner, Daniela Kröhnert, Philipp Reinsberg, Institute of Architecture at the University of Applied Arts Vienna, Institute of Art Sciences and Art Education at the University of Applied Arts Vienna, 2021-11-22 This book explores experimental approaches to the design and construction of wooden structures in architecture while presenting the results of an artistic research project Through the use of digital tools the anatomy of wood becomes a design determining principle for spatial structures The architects and artists also explore the potential of traditional craftsmanship and derive from this a material oriented practice Structures are not designed here for a specific use but rather open up various usage possibilities due to their unique spatial and geometric properties The documentation provides insight into an open ended research process Guest contributions reflect on the underlying concepts and thus the future relevance of wood as a building material

**Design: The Key Concepts** Catherine McDermott, 2007-10-30 This is the essential student s guide to Design its practice its theory and its history Respected design writer Catherine McDermott draws from a wide range of international examples

**The Culture of Nature in the History of Design** Kjetil Fallan, 2019-03-26 The Culture of Nature in the History of Design confronts the dilemma caused by design s pertinent yet precarious position in environmental discourse through interdisciplinary conversations about the design of nature and the nature of design Demonstrating that the deep entanglements of design and nature have a deeper and broader history than contemporary discourse on sustainable design and ecological design might imply this book presents case studies ranging from the eighteenth to the twenty first century and from Singapore to Mexico It gathers scholarship on a broad range of fields practices from urban planning landscape architecture and architecture to engineering design industrial design furniture design and graphic design From adobe architecture to the atomic bomb from the bonsai tree to Biosphere 2 from pesticides to photovoltaics from rust to recycling the culture of nature permeates the history of design As an activity and a profession always operating in the borderlands between human and non human environments design has always been part of

the environmental problem whilst also being an indispensable part of the solution The book ventures into domains as diverse as design theory research pedagogy politics activism organizations exhibitions and fiction and trade literature to explore how design is constantly making and unmaking the environment and conversely how the environment is both making and unmaking design This book will be of great interest to a range of scholarly fields from design education and design history to environmental policy and environmental history

**Design Anthropology** Alison J. Clarke, 2017-11-16 Design Anthropology brings together leading international design theorists consultants and anthropologists to explore the changing object culture of the 21st century Decades ago product designers used basic market research to fine tune their designs for consumer success Today the design process has been radically transformed with the user center stage in the design process From design ethnography to culture probing innovative designers are employing anthropological methods to elicit the meanings rather than the mere form and function of objects This important volume provides a fascinating exploration of the issues facing the shapers of our increasingly complex material world The text features case studies and investigations covering a diverse range of academic disciplines From IKEA and anti design to erotic twenty first century needlework and online interior decoration the book positions itself at the intersections of design anthropology material culture architecture and sociology

*The Green Imperative: Ecology and Ethics in Design and Architecture* Victor Papanek, 2022-02-01 A fresh edition of the sustainable design pioneer Victor Papanek's classic and ever relevant book examining the important role of design in combating climate change Whether it's horror at the plastic littering the world's beaches or despair at the melting polar ice caps the world is gradually waking up to the impending climate disaster In *The Green Imperative* Papanek argues for design that addresses these issues head on This means using materials that can be recycled and reused no more pointless packaging thinking about how products make us feel and engage all our senses putting nature at the heart of design working at a smaller scale rejecting aesthetics for their own sake and thinking before we buy First published at the end of the twentieth century this book offered a plethora of honest advice clear examples and withering critiques laying out the flaws of and opportunities for the design world at that time A quarter of a century on Papanek's lucid prose has lost none of its verve and the problems he highlights have only become more urgent giving today's reader both a fascinating historical perspective on the issues at hand and a blueprint for how they might be solved

Century of the Child Juliet Kinchin, Aidan O'Connor, 2012 The book examines individual and collective visions for the material world of children from utopian dreams for the citizens of the future to the dark realities of political conflict and exploitation Surveying more than 100 years of toys clothing playgrounds schools children's hospitals nurseries furniture posters animation and books this richly illustrated catalogue illuminates how progressive design has enhanced the physical intellectual and emotional development of children and conversely how models of children's play have informed experimental aesthetics and imaginative design thinking

The Politics of Furniture Fredie Floré, Cammie McAtee, 2017-02-10 In many different parts of the world modern furniture elements have served as material expressions of power in the post war era They were often meant to express an international and in some respects apolitical modern language but when placed in a sensitive setting or a meaningful architectural context they were highly capable of negotiating or manipulating ideological messages The agency of modern furniture was often less overt than that of political slogans or statements but as the chapters in this book reveal it had the potential of becoming a persuasive and malleable ally in very diverse politically charged arenas including embassies governmental ministries showrooms exhibitions design schools libraries museums and even prisons This collection of chapters examines the consolidating as well as the disrupting force of modern furniture in the global context between 1945 and the mid 1970s The volume shows that key to understanding this phenomenon is the study of the national as well as transnational systems through which it was launched promoted and received While some chapters squarely focus on individual furniture elements as vehicles communicating political and social meaning others consider the role of furniture within potent sites that demand careful negotiation whether between governments cultures or buyer and seller In doing so the book explicitly engages different scholarly fields design history history of interior architecture architectural history cultural history diplomatic and political history postcolonial studies tourism studies material culture studies furniture history and heritage and preservation studies Taken together the narratives and case studies compiled in this volume offer a better understanding of the political agency of post war modern furniture in its original historical context At the same time they will enrich current debates on reuse relocation or reproduction of some of these elements Library of Congress Catalog Library of Congress, 1970

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1976 **Design for Need, The Social Contribution of Design** Julian Bicknell, Liz Mcquiston, 2014-05-18 Design for Need The Social Contribution of Design compiles papers presented at the Symposium at the Royal College of Art London in April 1976 This book focuses on the concept of design as a conditioning reformist and practical element in society which examines and demonstrates actual projects carried out in response to social needs The topics discussed include the industrial design in dependent countries social forces that determine the shape of technology role of the designer in disaster relief reduction of need by design role of the artist in a hospital environment and Lucas workers initiative The language of social action twelve methodologies for design and future of design education are also deliberated in this text This publication is intended for professional and student designers aiming to gain knowledge on the extended and systematic study and development of design applications
