Nomads and Crusaders, A.D. 1000-1368 Archibald Ross Lewis, 1988 A fine arresting book with a clear and novel thesis and a firm grasp of geography Good stuff in short strongly recommended William H McNeill      **Sea of Faith** Stephen O'Shea, 2009-05-26 In *Sea of Faith* O'Shea chronicles both the meeting of minds and the collisions of armies that marked the interaction of Cross and Crescent in the Middle Ages the better to understand their apparently intractable conflict today For all the great and everlasting moments of cultural interchange and tolerance in Cordoba Palermo Constantinople the ultimate geography of belief was decided on the battlefield O'Shea vividly recounts seven pivotal battles between the forces of Christianity and Islam that shaped the Mediterranean world from the loss of the Christian Middle East to the Muslims at Yarmuk Turkey in 636 to the stemming of the seemingly unstoppable Ottoman tide at Malta in 1565 In between the battles raged round the Mediterranean from Poitiers in France and Hattin in the Holy Land during the height of the Crusades to the famed contest for Constantinople in 1453 that signaled the end of Byzantium As much as the armies were motivated by belief their exploits were inspired by leaders such as Charles Martel Saladin and Mehmet II whose stirring feats were sometimes accompanied by unexpected changes of heart      **Perilous Glory** John France, 2011-11-01 A major new history of war that challenges our understanding of military dominance and how it is achieved      *Armies of Feudal Europe 1066-1300* Ian Heath, 2016-06-03 This is a reprint of the 1989 second edition of this book in our *Armies and Enemies* series It includes details of armies from Andalusia Bulgaria England Estonia France the Holy Roman Empire Hungary Ireland Italy Morocco the Ordensstaat of the Teutonic Knights the Earldom of Orkney the Papal State Poland Prussia Lithuania the Low Countries Kievan Russia Scandinavia Scotland Serbia Sicily Spain Venice Wales and Wendland      *Global Governance* Timothy J. Sinclair, 2004      Eden and the Fall - the Fallacies of Radical Ecological History, 1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today's ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to

numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t

**Secular Faith** Vincent William Lloyd, Elliot A. Ratzman, 2011-01-01 Is faith a necessary virtue in the contemporary world May it be or must it be detached from religious commitment What do genealogies of the secular tell us about faith Does religion need secular faith Secular Faith brings together leading and emerging scholars to reflect on the apparent paradox of secular faith Ranging over anthropology religious studies political science history and literature from Muslims in China to Pentecostals in South Africa to a prison chapel in Texas this collection of essays is as engaging and accessible as it is penetrating and rigorous Communism was once labeled the god that failed Like Christianity Communism involves faith in a superhuman endeavor conversion myth discipline and salvation and from the perspective of secular liberalism both are unjustified and false In recent years scholars have begun to investigate whether secularism is itself based on faith in a god that failed or is failing Nevertheless many still embrace such a faith finding in the spirit of democracy an ethos of eternal renewal Secular Faith enters and broadens this conversation interrogating secular faith in a global context tapping new theoretical resources and grappling provocatively with the tragedies and opportunities of today's profane pantheon of beliefs

**Leading Sectors and World Powers** George Modelski, William R. Thompson, 1996 The idea that political and economic power moves in coordinated cycles has long intrigued political scientists and political economists for if a pattern exists in the rise and fall of international political power a model explaining this pattern gains predictive qualities In Leading Sectors and World Powers George Modelski and William R Thompson venture beyond previous attempts to explain why major powers rise fall and fight about their changing status to establish an explicit connection between war economic innovation and world leadership They argue that surges in economic

innovation which in turn are tied to global war determine leadership in the global system Modelski and Thompson base their theory on the coordination of long cycles phases of world order and decay punctuated by intensive bouts of global war and K waves cycles delineating the wax and wane of leading industrial sectors They contend that K waves appear in paired sets correlated to long cycle shifts in political power Modelski and Thompson conclude by discussing the nature and timing of the next K wave long cycle peak commenting on the relevance of it for U S industrial policy and speculating on the possibility of evolving away from this pattern in the near future

**West Rules - For Now** Ian Morris,2011-01-14 Why does the West rule In this magnum opus eminent Stanford polymath Ian Morris answers this provocative question drawing on 50 000 years of history archeology and the methods of social science to make sense of when how and why the paths of development differed in the East and West and what this portends for the 21st century There are two broad schools of thought on why the West rules Proponents of Long Term Lock In theories such as Jared Diamond suggest that from time immemorial some critical factor geography climate or culture perhaps made East and West unalterably different and determined that the industrial revolution would happen in the West and push it further ahead of the East But the East led the West between 500 and 1600 so this development can t have been inevitable and so proponents of Short Term Accident theories argue that Western rule was a temporary aberration that is now coming to an end with Japan China and India resuming their rightful places on the world stage However as the West led for 9 000 of the previous 10 000 years it wasn t just a temporary aberration So if we want to know why the West rules we need a whole new theory Ian Morris boldly entering the turf of Jared Diamond and Niall Ferguson provides the broader approach that is necessary combining the textual historian s focus on context the anthropological archaeologist s awareness of the deep past and the social scientist s comparative methods to make sense of the past present and future in a way no one has ever done before **Trade, Travel, and Exploration in the Middle Ages** John Block Friedman,Kristen Mossler Figg,2013-07-04
