**Nomads in Archaeology** Roger Cribb, 1990 The Archaeology of Mobility Hans Barnard, Willeke Wendrich, 2008-12-31 There have been edited books on the archaeology of nomadism in various regions and there have been individual archaeological and anthropological monographs but nothing with the kind of coverage provided in this volume Its strength and importance lies in the fact that it brings together a worldwide collection of studies of the archaeology of mobility This book provides a ready made reference to this worldwide phenomenon and is unique in that it tries to redefine pastoralism within a larger context by the term mobility It presents many new ideas and thoughtful approaches especially in the Central Asian region

**Ethnoarchaeology of the Kel Tadrart Tuareg** Stefano Biagetti, 2014-07-19 This book focuses on the issues of resilience and variability of desert pastoralists explicitly challenging a set of traditional topics of the discourse around pastoralism in arid lands of the Old World Based on a field research carried out on the Kel Tadrart Tuareg in Libya various facets of a surprisingly successful adaptation to an extremely arid environment are investigated By means of an ethnoarchaeological approach explored are the Kel Tadrart interactions with natural resources the settlement patterns the campsite structures and the formation of the pastoral archaeological landscape focusing on variability and its causes The resilience of the Kel Tadrart is the key to understand the reasons of their choice to stay and live in the almost rainless Acacus Mountains in spite of strong pressure to sedentarize in the neighboring oases Through the collection of the interviews participant observation mapping of inhabited and abandoned campsites remote sensing and archival sources various and different Kel Tadrart strategies perceptions and material cultures are examined This book fills an important gap in the ethnoarchaeological research in central Sahara and in the study of desert pastoralism Desert lands are likely to increase over the next decades but our knowledge of human adaptations to these areas of the world is still patchy and generally biased by the idea that extremely arid lands are not suited for human occupation

**Extremism, Ancient and Modern** Sandra Scham, 2018-01-19 Near Eastern archaeology is generally represented as a succession of empires with little attention paid to the individuals labelled as terrorists at the time that brought them down Their stories when viewed against the backdrop of current violent extremism in the Middle East can provide a unique long term perspective Extremism Ancient and Modern brings long forgotten pasts to bear on the narratives of radical groups today recognizing the historical bases and specific cultural contexts for their highly charged ideologies The author with expertise in Middle Eastern archaeology and counter terrorism work provides a unique viewpoint on a relatively under researched subject This timely volume will interest a wide readership from undergraduate and graduate students of archaeology history and politics to a general audience with an interest in the deep historical narratives of extremism and their impact on today's political climate
