of Indian Archaeology: Settlements, technology and trade Frank Raymond Allchin, Dilip K. Chakrabarti, 1979 Illustrations Numerous B w Illustrations Maps Description The articles selected for this anthology are meant to act as a guide to the changing ramifications and some major foci of Indian archaeology up to the mid eighties The subsequent publications are still too close to us for a clear historical assessment Although published some eighteen years later than the first volume

compiled with the same intention this is a definitive source book in its own right and will further help people to turn to some major studies which have become over the years difficult of access Like archaeology elsewhere Indian archaeology too is getting increasingly complex and perhaps polarized In a sense the articles incorporated in the present volume serve as a reminder of some of the issues which confronted Indian archaeology before the current phase of complexity and politicization The relevant literature right from the beginning of Indian archaeological studies was carefully scrutinized in its entirety before the present volume was compiled
