Turning Tyrants into Tools in Health Practice Justin Amery,2022-01-26 In order to provide integrated healthcare we need

to integrate a huge number of entities Each one of these entities can be a useful tool for our practice To be effective practitioners we hope to gain some mastery of them But sometimes we feel as if they have mastery of us There are days when we feel on top of our game we keep to time we know instantly what's wrong the right treatment is immediately to hand our colleagues are supportive and helpful and birdsong drifts through our open summer window Then there are the other days Justin Amery This extraordinary new series fills a void in practitioner development and well being The books take a reflective step back from the tick box target driven and increasingly regulated world of 21st century health practice and invite us to revisit what health and health practice actually are Building carefully on the science and philosophy of health each book addresses the messy complex and often chaotic world of real life health practice and offers an ancient but now almost revolutionary understanding for students and experienced practitioners alike that health practice is a fundamentally creative and compassionate activity The series as a whole helps practitioners to redefine and recreate their daily practice in ways that are healthier for both patients and practitioners The books provide a welcome antidote to demoralisation and burn out amongst practitioners reversing cynicism and reviving our feeling of pride in and our understanding of health practice By observing practice life through different lenses they encourage the development of efficiency effectiveness and above all satisfaction The third book in the series The Integrated Practitioner Turning Tyrants into Tools in Health Practice explores the relationship between practitioners and their tangible external tools such as time computers money information colleagues equipment targets and office spaces along with less tangible elements like knowledge understanding language values and beliefs These tools can be of great benefit when fully integrated and balanced but they often end up controlling practitioners dictating the manner in which the practice operates and ultimately reducing efficacy It suggests ways for practitioners to harness the positive forces of these tools and regain control Brilliantly written practitioners students and trainees and GP trainers will find the enlightening witty conversational style a joy to read **Bibliographic Index**, 2004

Food for Thought Justin Amery,2022-03-02 Everything that exists exists against a background All of our experiences beliefs and understandings of health practice derive from a living organic and constantly moving context whether scientific philosophical cultural aesthetic biological or spiritual It is useful therefore to spend a little time understanding and reflecting on these building blocks of who we are As practitioners we don t always have time to do this A little luxury not essential but hopefully a bit nourishing Like a fireside cup of cocoa Justin Amery This extraordinary new series fills a void in practitioner development and well being The books take a reflective step back from the tick box target driven and increasingly regulated world of 21st century health practice and invite us to revisit what health and health practice actually are Building carefully on the science and philosophy of health each book addresses the messy complex and often chaotic world of real life health practice and offers an ancient but now almost revolutionary understanding for students and experienced practitioners alike that health practice is a fundamentally creative and compassionate activity The series as a whole helps practitioners to redefine and recreate their daily practice in ways that are healthier for both patients and practitioners The books provide a welcome antidote to demoralisation and burn out amongst practitioners reversing cynicism
