Michael Waterson,1984      **The Emergent Firm** Neil M. Kay,1984-08-09      **The Economics of Industrial Location**

Philip McCann,2013-03-09 The motivation for this book comes from the apparent inability of existing orthodox location theory to throw light on a series of location production problems which are typically faced by modern manufacturing and distribution firms These problems are related to the treatment of time by firms who normally view time costs in terms of inventory costs From this perspective traditional industrial location and linkage analysis can be re cast in a form in which

space time problems can be dealt with in a unified manner The role played by input factor prices and market prices in location behaviour becomes dependent on the relationship between the frequency of shipment and the distance of shipment This approach provides new insights into the relationship between the optimal location of the firm and the value added by the firm under conditions of either fixed or varying local factor prices The approach can then also be extended to discuss the of the spatial changes involved in the new Just In Time JIT production question philosophy I would like to acknowledge the many helpful discussions I have had with Bernard Fingleton Masahisa Fujita Geoff Hewings John McCombie Ron Miller John Parr Tony E Smith and my colleagues at the University of Reading Table of Contents Preface vi Introduction 1 1 Comparing Western and Japanese Industrial Purchasing Linkages 5 1 1 Western Purchasing Linkages 5 Japanese Purchasing Linkages 7 1 2 1
