law **A Theory of Global Governance** Michael Zürn,2018 This book offers a major new theory of global governance explaining both its rise and what many see as its current crisis The author suggests that world politics is now embedded in a normative and institutional structure dominated by hierarchies and power inequalities and therefore inherently creates contestation resistance and distributional struggles Within an ambitious and systematic new conceptual framework the theory makes four key contributions Firstly it reconstructs global governance as a political system which builds on normative principles and reflexive authorities Second it identifies the central legitimation problems of the global governance system with a constitutionalist setting in mind Third it explains the rise of state and societal contestation by identifying key endogenous dynamics and probing the causal mechanisms that produced them Finally it identifies the conditions under which struggles in the global governance system lead to decline or deepening Rich with propositions insights and evidence the book promises to be the most important and comprehensive theoretical argument about world politics of the 21st century

Rethinking Authority in Global Climate Governance Thomas Hickmann,2015-10-16 In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development
