Proceedings of the First Workshop on Biological Physics 2000 Virulh Sa-yakanit, L. Matsson, Hans Frauenfelder, 2001 Like inanimate matter biological matter is condensed though it may be more complex However a living cell is a chemically open system with biological functions that are often a nonstationary nonlinear type of collective phenomena driven by chemical reactants e g ATP GTP ligands and receptors The living cell and many of its subsystems are hence lyotropic systems depending on various reactant concentrations rather than the temperature Nonlocal and local correlations of the interacting molecules become the prerequisites for signal transduction This book constitutes the proceedings of the workshop entitled Biological Physics 2000
