Non Marine Organic Geochemistry:

Non-Marine Organic Geochemistry Frederick M. Swain, 1970-10-02 The author outlines the geologically important organic compounds their reactions and the fundamental analytical methods used in organic chemistry **Biogeochemistry of Ancient and Modern Environments** P. A. Trudinger, M. R. Walter, B. J. Ralph, 2013-06-29 This volume contains a selection of papers presented to the Fourth International Symposium on Environmental Biogeochemistry ISEB and a conference on Biogeochemistry in Relation to Mining Industry and Environmental Pollution Leaching Conference held in Canberra Australia on August 26-31 and September 3-4 1979 respectively The ISEB were established to provide a forum for uninhibited exchange of information and ideas among the biological chemical atmospheric and geological scientists working in the common area of biogeochemistry encompassing soil and other earth sciences as well as the hydrosphere and atmosphere By linking the fourth ISEB with the Leaching Conference the scope of discussions was extended to encompass the application of biogeochemical processes to the mining industry This wide ranging philosophy is reflected in the breadth and diversity of the subjects covered in this book The published papers are expanded versions of those presented at the meetings They have all been scrutinized by at least one referee in addition to the editors About 20% of the contributions to the meetings are not included either because authors did not wish to publish or because the papers were not accepted by the editors **Abstracts of North American Geology** Geological Survey (U.S.), 1971-07 Advances in Organic Geochemistry, 1972 NOAA Professional Paper, 1978 ESSA Professional Paper United States. National Oceanic and Atmospheric Administration, 1972 Fossil Matter in the Geosphere Jan Schwarzbauer, Branimir Jovančević, 2015-05-12 The first volume in this new textbook series covers comprehensively relevant aspects related to the appearance and characterisation of fossil matter in the geosphere such as kerogen oil shales and coals As organic geochemistry is a modern scientific subject characterized by a high transdisciplinarity and located at the edge of chemistry environmental sciences geology and biology there clearly is a need for a flexible offer of appropriate academic teaching material on an undergraduate level addressed to the variety of students coming originally from different study disciplines For such a flexible usage this textbook series consists of different volumes with clear defined aspects and with manageable length Theory and Simulation Experimental Technology of Oil Generation From Nonmarine Source Rocks in China Defan Guan, Zhongliang Ma, Yongqiang Zhao, 2025-07-18 Guided by organic geochemical methodologies this book conducts a comparative analysis of the characteristics of oil source rocks deposited across various geological eras within typical continental oil bearing basins revisits several issues concerning the oil generation theory of continental oil source rocks and reshapes organic geochemical thinking methods and simulation experimental techniques challenging the traditionally dominant artificial petroleum theory and experimental techniques The book is divided into three parts Introduction Characteristics of Oil Source Rocks in Typical Continental Oil Bearing Basins in China and Simulation Experiments on Oil Generation of Continental Oil Source Rocks

encompassing a total of 12 chapters and 143 figures It delves into the petroleum geological evolution during the stages of continuous subsidence overall uplift and denudation and full shrinkage in major basins such as the Junggar Ordos Sichuan Songliao and Bohai Bay The book analyzes the characteristics of the main oil source rocks develops an oil generation simulation instrument for continental oil source rocks establishes the experimental technology for low temperature catalytic cracking of source rocks to simulate oil generation and reveals the oil generation mechanism of the geological molecular sieve and favorable conditions for oil generation in source rocks It offers new ideas and methods for the evaluation of petroleum resources in continental oil bearing basins and can be a reference for researchers engaged in petroleum geological and geochemical research as well as teachers and students working in related fields

The Impacts of Igneous Systems on Sedimentary Basins and their Energy Resource B. Kilhams,S. Holford,D. Gardiner,S. Gozzard,L. Layfield,C. McLean,S. Thackrey,D. Watson,2024-08-13 Many sedimentary basins worldwide contain extrusive and intrusive igneous rock sequences and these rocks and associated magmatic processes can exert profound influences on a diverse range of basin processes and elements including multiscale structural and tectonic development heat flow transport of hydrocarbons and other basinal fluids and the hydraulic properties and integrity of reservoir and sealing units Recent years have witnessed increased focus on improved understanding of igneous processes in basins to aid hydrocarbon exploration and development projects and there is growing interest in the multifaceted role that igneous sequences in basins may play in the energy transition for example as components of carbon capture and storage projects and sources of geothermal energy natural hydrogen and helium This volume showcases state of the art research from both academia and industry drawing on global examples and addressing reservoir to plate scales providing critical new data knowledge and technological capabilities that highlight the opportunities complexities and potential pitfalls associated with unlocking the energy resources of sedimentary basins impacted by igneous processes

Environmental Chemistry G Eglinton,2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and

Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

Oxidation in Organic Chemistry 5-D Walter Trahanovsky, 2012-12-02 Organic Chemistry A Series of Monographs Volume 5 D Oxidation in Organic Chemistry is a four chapter text that discusses the specific oxidants in oxidation reactions of organic compounds Chapter I covers oxidations with lead tetraacetate an oxidant that has been used widely for the selective oxidation of a variety of functional groups Chapter II examines an oxidant that has a long and extensive history the permanganate with emphasis on phase transfer assisted permanganate oxidations Chapter III discusses the intramolecular oxidative coupling of aromatic substrates highlighting the utility of developed methods such as vanadium oxytrifluoride oxidations in the syntheses of complex natural products Chapter IV describes the process of coal oxidation with emphasis on the selective oxidative degradation procedures as tools for characterization of coal structure This text will be of value to organic chemists researchers teachers and students who are interested in oxidation of organic compounds
