Nonprofit Organisations Annette E. Zimmer,Christina Stecker,2013-03-19 In many countries particularly in continental Europe societies have been plagued by high unemployment for several decades Simultaneously due to recent shifts from industrial to service oriented post industrial societies labor as a significant culture code is increasingly losing importance Because of this the third or voluntary sector as a place of employment and as a service agency to society has become important for Europe as indicated by the 1997 Communication of the European Commission and various declarations by the European Parliament and the EU s Economic and Social Council **Strategy Mix for Nonprofit Organizations Vehicles for Social and Labor Market Integration** explores the role of the third sector in Europe where unemployment is high and in North America where unemployment is rising and exploring the gaps that the third sector is fulfilling both as a social service and as an employer The volume is organized into two distinctive parts Part 1 The Nonprofit Sector and Social Integration highlights the embeddedness of the sector in selected countries it discusses how the sector is currently affected by changes of public policy particularly in the traditional social democratic welfare state regimes and it draws our attention to the sector s potentials to provide avenues for social integration self actualization and civic empowerment Part 2 Labor Concepts and Market Integration refers to the multifunctionality of third sector organizations discussing potentials of workplace as well as community involvement via nonprofit organizations This seminal volume will be of interest to those in the nonprofit sector organizational management and economics political scientists and other researchers working with nonprofit organizations and civil society studies on an international level **To Examine Whether Charitable Organizations Serve the Needs**

Benjamin Gidron, Michal Bar, 2009-12-03 Over the past decade the third sector has had tremendous growth worldwide in both size and importance As many countries struggle to address this changing reality many have adopted policy initiatives aimed at changing the ways the third sector is addressed It is a complex process involving different fields of practice different levels of government and different types of third sector organizations The contributions to this timely volume detail the process as carried out in eight diverse countries US UK Canada Hungary Germany Ireland Israel Japan all of whom have recently enacted policy initiatives towards the third sector The studies are comprehensive from reviewing the current policy enacting new laws supervisory mechanisms and modes of funding Featuring a postscript from Helmut Anheier UCLA School of Public Policy Los Angeles CA USA and Hertie School of Governance Berlin Germany the thorough analysis in this volume will provide a new understanding of the policy initiatives in the eight countries studied as well as guiding principles for other countries that may implement such initiatives in the future The resulting work will give researchers in sociology social work third sector research and international economics a new framework for understanding the Third Sector its role in society and its relationships with government the market and the citizens of the country *Civic Engagement in Contemporary Japan*

Henk Vinken, Yuko Nishimura, Bruce L. J. White, Masayuki Deguchi, 2010-03-25 Civic engagement is a concept of action that has become part of common vocabulary not only in the West but also in many other regions of the world as well A growing yet still small number of scholarly works has recently emerged showing how in Japan citizen activism volunteering and social action for a public cause are developing This present volume is another and in my view important addition to the body of knowledge on civic engagement in Japan The majority of books on related issues in Japan take on the perspective of organized civic life in nongovernmental organizations NGOs or nonprofit organizations NPOs we know quite a number of things about the quantitative trends in these organizations on their positioning on their difficulties and on the institutional contexts in which they have to work We know relatively little except for a small number of topical qualitative case studies on broad issues that relate to civic engagement in Japan inside or outside these formal organizations This volume is the first to offer a wide scope of broad variety of forms of civic engagement in contemporary Japan The volume is quite forceful in counterbalancing oversimplified ideas on an ideal civil society in which state market and civil society organizations are independent and at best take on oppositional stances Modernizing Democracy Matthias Freise, Thorsten Hallmann, 2014-05-13 *Modernizing Democracy* brings together scholars focusing the role of associations and associating in contemporary societies Organizations and associations have been identified as the meso level of society and as the basic elements of democracy They are important providers of welfare services and play an important role between the individual and political spheres In recent

years the environment of associations and associating has changed dramatically Individualization commercialization and globalization are challenging both democracy and the capability of associations to fulfill the functions attributed to them by social sciences This change provides the central question of the volume Is being part of an organization or association becoming an outdated model And do associations still have the capacity of modernizing societies or are they just outdated remnants of post democracy The contributions to Modernizing Democracy will be organized into Studying Association and Associating in the 21st Century Associating in Times of Post Democracy and Associations and the Challenge of Capitalist Development The book will be attractive to third sector researchers as well as a broader academic community of political scientists sociologists economists legal scientists and related disciplines

The Political Economy of the Voluntary Sector Brian Dollery, Joe L. Wallis, 2003 In this book the authors outline how policymakers in advanced countries have moved away from exclusive reliance on the public sector in social service delivery towards a more multi faceted approach that seeks to combine the strengths of public agencies private firms and voluntary organizations This development raises interesting and complex questions concerning the comparative advantages of these respective groups in the delivery of goods and services The Political Economy of the Voluntary Sector adopts a comparative institutions approach to assess the strengths and weaknesses of the government market and voluntary sectors as alternative instruments for implementing social and economic policies The authors examine existing market failure government failure and supply side models of non profit organizations before proposing a new leadership theory of the voluntary sector They then explore the interface between the voluntary sector and the development of social capital The book culminates in an investigation of appropriate public policy approaches towards the voluntary sector This book will be warmly welcomed by academics students and researchers working on alternative methods of public policy program delivery primarily from the disciplines of economics political science and public administration Practitioners drawn from the public and voluntary sectors as well as public policymakers in governments from around the world will also find this accessible book of great interest
