David Lewis, Nazneen Kanji, Nuno S. Themudo, 2020-12-29 This book is an introduction to the wide ranging topic of non governmental organizations NGOs and development combining a critical overview of the main research literature with a set of up to date theoretical and practical insights drawn from experience in Asia Europe Africa and elsewhere The revised second edition highlights the continuing importance of NGOs in development while fully engaging with the criticisms that their increased profile now attracts It considers issues such as securitization changing technologies and recent concerns about safeguarding as well as going into more detail around topics such as market based development and social enterprise The diversity of NGOs and their roles is discussed against the broader historical background of struggles for social justice in different societies as well as within the shifting ideological contexts of neoliberalism and populism Using a broad range of short case studies of both successful and unsuccessful interventions the authors analyze how interest in NGOs has both reflected and informed wider theoretical trends and debates within development studies The book argues that NGOs are central to both development theory and practice and are likely to remain important actors for many years to come This critical overview will be useful to students of development studies at undergraduate and master s levels in fields and disciplines as diverse as International Development Studies International Relations Geography Anthropology Global Studies

Politics and International Studies as well as general readers and practitioners

*The Management of Non-Governmental Development Organizations* David Lewis, 2006-12-11 The first edition of this book was published in 2001 by Routledge and was the first academic text on the important new emerging field of NGO management It sets out the field for researchers with a new and original conceptual framework contains a comprehensive review of existing literature from a variety of disciplines including management development studies and social policy and provides wide ranging examples from the author's own practical and research experience New to this edition twelve new detailed case studies of NGO management issues and challenges new discussion points lessons learned and questions for debate to guide the reader through each chapter definitions of key terms highlighted key ideas to illustrate each chapter Revealing the distinctive organizational challenges faced by NGOs this second edition provides a fully updated and revised text that will prove invaluable to all those studying or working in NGOs the voluntary sector or development studies Visit the Companion website at [www.routledge.com/textbooks](http://www.routledge.com/textbooks) 978 0 415 37093 6

*Peacebuilding and NGOs* Ryerson Christie, 2013 Analysing the relationship between civil society and the state this book lays bare the assumptions informing peacebuilding practices and demonstrates through empirical research how such practices have led to new dynamics of conflict The drive to establish a sustainable liberal peace largely escapes critical examination When such attention is paid to peacebuilding practices scholars tend to concentrate either on the military components of the mission or on the liberal economic reforms This means that the roles of Non Governmental Organizations NGOs and the impact of attempting to nurture Northern forms of civil society is often overlooked Focusing on the case of Cambodia this book seeks to examine the assumptions underlying peacebuilding policies in order to highlight the reliance on a particular linear reading of European North American history The author argues that such policies in fostering a particular form of civil society have affected patterns of conflict dictating when and where politics can occur and who is empowered to participate in such practices Drawing on interviews with NGO representatives and government representatives this volume will assert that while the expansion of civil society may resolve some sources of conflict its introduction has also created new dynamics of contestation This book will be of much interest to students of peacebuilding conflict resolution development studies S E Asian politics and IR in general

**Non-Governmental Organizations in Contemporary China** Qiusha Ma, 2005-11-16 Based on documentary materials including interviews with key players in China this book charts the development of non governmental and non profit organizations in China from the late 1970s to the present day It recounts how in the aftermath of the 1978 reforms that created a market economy and diversified interests and social life new institutions and organizations outside of the state system increased dramatically in number size and influence These organizations which barely existed before the reforms began in the late 1970s carry out many social economic and cultural tasks neglected by the government Qiusha Ma examines two key questions crucial to understanding the development of NGOs in China First is it possible under China's one party state for non governmental

organizations to thrive and play important economic social and political functions And secondly are NGOs facilitating the formation of a civil society in China      *Environmental Policies and NGO Influence* Susan Carr,David Humphreys,Alan Thomas,2013-01-11 This book examines the conditions under which non governmental organisations NGOs may exert influence on policies to conserve and sustainably use natural resources in sub Saharan Africa The book is unique in bringing together NGO campaigners in three African countries with academics specialising in development studies systems and environmental policy      *NGOs, Political Protest, and Civil Society* Carew Boulding,2014-06-23 This book argues that non governmental organizations NGOs have an important effect on political participation in the developing world Contrary to popular belief they promote moderate political participation through formal mechanisms such as voting only in democracies where institutions are working well This is a radical departure from the bulk of the literature on civil society that sees NGOs and other associations as playing a role in strengthening democracy wherever they operate Instead Carew Boulding shows that where democratic institutions are weak NGOs encourage much more contentious political participation including demonstrations riots and protests Except in extreme cases of poorly functioning democratic institutions however the political protest that results from NGO activity is not generally anti system or incompatible with democracy again as long as democracy is functioning above a minimal level      *Future Positive* Michael Edwards,2013-06-17 An optimistic assessment of the prospects for a new international order acting as a counter blast to global pessimism The text explains how the international system operates the pressures it faces and the changes it must undergo and offers concrete ideas to re frame international relations foreign aid and humanitarian intervention without using jargon or simplistic judgements      **Global Citizen Action** Michael Edwards,John Gaventa,2014-04-08 Civil society or citizen s groups have taken centre stage in international policy debates and global problem solving They hold out the promise of a global community and global governance This volume by leading scholars and participants shows how to understand the changes that are occurring particularly in relation to the international institutions involved It includes case studies from all the major social movements of the 1990s      **NGOs, IGOs, and the Network Mechanisms of Post-Conflict Global Governance in Microfinance** A. Ohanyan,2008-10-27 Post conflict reconstruction stretches the capacities of international institutions and they turn to NGOs to answer the challenge This book explores how the interactions between international public institutions and NGOs have affected peacebuilding in the post conflict situations of Bosnia Afghanistan and Kosovo      **Regulatory Waves** Oonagh B. Breen,Alison Dunn,Mark Sidel,2017 An analysis of the features of both governmental regulation of non profit organizations and self regulation by non profit sectors themselves      *International Public Policy and Management* David Levi-Faur,Eran Vigoda-Gadot,2004-11-30 An impressive study of economic state social and international restructuring International Public Policy and Management explores new patterns and advances in the global integration of policies that result from an ever increasing pace of shared knowledge regulations and norms in countries around the globe It considers the impact of

globalized *From Conflict to Crisis* Jeanne M. Haskin, 2012 The rich understand that capitalism is a game of musical chairs. It's systemic class warfare conducted on a grand scale to discourage solidarity across lines that might otherwise threaten the system and with each market reset arranged by the Federal Reserve more of the country's resources fall into wealthy hands. Examining what happens when a society favors old money over new and breaks all the rules to make the world safe for finance, author Jeanne Haskin predicts increasing volatility and violence in the United States if we do not significantly change course. For a preview of what lies ahead for the U.S., the author takes us for a quick exemplary trip through Central America. A society that is reared on competition will face unsettling challenges to authority if it doesn't set certain functions outside the arena of battle via systematic enrichment of the affluent minority that has always had the power to topple and ruin the system. Today's preoccupation with America's revolutionary history is not just a piece of theater. At the heart of America's outrage is an inability to lash out and demand redemption from the source of its distress because the pain is inflicted not by hatred but by the fundamental lack of stability built into our way of life. Now that a fifth of the population is suffering job loss, foreclosures or exclusion from employment due to prejudice, poor credit, a lack of skills or education, a glut of competition and insufficient opportunity, the failure to provide for the helpless majority means the system is at an impasse. Because the system can't or won't perform, the Tea Party's rise was preemptive with all its implied violence and real American theater as the means to channel our anger into voting out Obama so reform can proceed unimpeded with all its inherent dangers. After reviewing some foreign examples that erupted in the environments of colonialism and post colonialism, neoliberalism, militarism and oligarchies, the author filters through the head-spinning social and political noise that stands in for responsible debate in America today. Ms. Haskin's richly documented essay sees a bonfire prepared as social tensions are increased and inter-group pressures are encouraged to mount. So much for One nation. **Civil Society, Religion and Global**

**Governance** Helen James, 2007-04-11 This is one of the first books to explore the nexus between civil society, religion and global governance, their impact on human security and well-being and significance for current debates in international politics. The contributors examine salient aspects of the secular state whose monopoly on and control of institutional violence has reified its use of power to such an extent that the modernistic separation of church and state is being called into question as institutional limits are sought to the abuse of that power. The volume is clearly divided into six key sections: human security and human rights, the politics of civil religion, the ethics of civil development, civil society and global governance, cross-cultural perspectives on institutional development for civil society, international civil society. Within these sections, the illuminating case studies span a wide geographical extent from Central and Eastern Europe to Egypt to Latin America, Iran, Bangladesh, Australia, the Pacific and East and Southeast Asia. *Civil Society, Religion and Global Governance* will be of strong interest to students, policy makers and researchers in the fields of human rights, religion, political science and sociology. *Aiding Violence* Peter Uvin, 1998 Includes statistics. **Activating China** Setsuko Matsuzawa, 2019-01-04 This book examines the

effects of the transnational social and environmental advocacy of foreign NGOs in China Based on three case studies including China's first participatory development project its first successful case of transnational anti dam activism and its first national park project the book challenges our typical understanding that global forces shape local outcomes Drawing on ethnographic fieldwork in China and archival work in the United States Matsuzawa sheds light on the entrepreneurial behaviors of Chinese activists researchers and government officials She shows that global projects are often substantially transformed by local actors despite the original intentions of their foreign collaborators and even China's central government Thus it is argued that foreign NGOs are not as hegemonic or culturally imperialistic as is commonly viewed Matsuzawa reveals that their goals may change profoundly as a result of their engagements with local actors on the ground She offers a new theory of transnational advocacy together with an account of the Chinese party state's rising concerns over the influence of foreign NGOs Activating China will be of interest to sociologists and political scientists working in the fields of social movement studies and activism in China      Tend the Olive, Water the Vine Rachel Christina, 2006-08-01 Current international development wisdom promotes the inclusion of non governmental organizations NGOs in national level policy making in the interest of strengthening state civil society relationships supporting locally driven culturally sensitive development and contributing to program and policy innovation However critics of increased state NGO donor collaboration argue that it actually dilutes the power of NGOs to act in the interest of the local populations they were established to serve This tension between the local and the global is connected to broader debates about the nature and role of contemporary educational development Should education aim primarily at preparing citizens for participation in the global economy thereby encouraging the integration of nation states into a world economic system driven by the industrialized North Or and should it endeavor to develop in students and in communities North and South the ability to critique resist and transform that world system Ultimately this is a question of who owns development international agencies and institutions or the communities being developed This book examines the complexities of these negotiations in a particularly complicated and volatile context Palestine and a particularly hot development field early childhood development The international community's efforts to support early childhood programming in the developing world fall more broadly within the empowerment camp than do other development efforts and in this case in particular serve as a source of important lessons about the dynamics of donor state NGO relationships suggestions for improved development policy and insights into forms of education which promote justice and equity in an increasingly interdependent world      *Civil Life, Globalization and Political Change in Asia* Robert P. Weller, 2004-08-02 Written by a team of international experts in the field the chapters in this book question whether and how NGOs actually lead to democratization and discuss the ways NGOs relate to broader global forces      Non-governmental Organizations (NGOs) and Sustainable Development in Sub-Saharan Africa Robert A. Dibia, 2008-01-01 Written to provide guidance for civil society organizations and their client groups this book examines the

role of NGOs in the development processes on the African continent It raises questions about the influence of funding agencies over the NGOs they support and explores the challenges NGOs face The book argues that increased knowledge and cooperation on all parts is essential to achieve sustainable development This book also concludes that sustainable development activities are not beneficial to every community in Africa Taking into consideration globalization and studies of sub Saharan countries this book concludes that news models of leadership are necessary for the success of Africa and NGOs are a vital part of achieving that development
