Nonlethal Weapons War Without Death:

Nonlethal Weapons David Morehouse, 1996-12-09 Presenting alternative methods of conflict resolution this examination of the philosophy of peace presents nonlethal weaponry as a solution to the destructiveness of war Conventional lethal weapons and weapons of mass destruction evolved into an unprecedented 900 billion dollar a year defense industry This industry and its war makers have taken the lives of an estimated 170 million human beings in this century A new approach appropriate to the new world order must be found This study provides a historical analysis of weapons and forces in this century and traces the development of nonlethal technologies and weapons It is the first work to present nonlethal weaponry in the framework of recognizable scenarios based on current world events that show the applicability of current available nonlethal weapons and technology to serve as a force to be reckoned with in a highly politicized world Morehouse argues that nonlethal weapons and technology could and should become forces for peace in the 21st century **The Future of**

Non-lethal Weapons Nick Lewer, 2017-09-29 These essays explore the increase in interest in non lethal weapons Such devices have meant that many armed forces and law enforcement agencies are able to act against undesirables without being accused of acting in an inhumane way Topics for discussion in this volume include an overview of the future of non lethal weapons emerging non lethal technologies military and police operational deployment of non lethal weapons a scientific evaluation of the effectiveness of non lethal weapons changes in international law needed to take into account non lethal technologies developments in genomics leading to new chemical incapacitants implications for arms control and proliferation the role of non lethal weapons in human rights abuses conceptual theoretical and analytical perspectives on the nature of non lethal weapons development **Death by Moderation** David A. Koplow, 2010 Addresses the military's pursuit of usable

weaponry that is deliberately crafted to be less powerful less deadly and less destructive than the systems it is designed to supplement or replace **Nonlethal weapons terms and references** Robert J. Bunker, 1999 Security, Strategy, and

the Quest for Bloodless War Robert Mandel, 2004 The first comprehensive look at the increasing push by government and military officials in the direction of bloodless war 'Non-Lethal' Weapons N. Davison, 2009-06-17 This book provides an up

to date analysis of the development and deployment of non lethal weapons by police and military organizations It reviews the key technologies issues and dangers with particular attention to the development of drugs lasers microwaves and acoustics as incapacitating weapons *Bait and Switch* Julie A. Mertus, 2008-02-19 It has become routine for the US government to

invoke human rights to justify its foreign policy decisions and military ventures But this human rights talk has not been supported by a human rights walk Policy makers consistently apply a double standard for human rights norms one the rest of the world must observe but which the US can safely ignore Based on extensive interviews with leading foreign policy makers military officials and human rights advocates Mertus tells the story of how America's attempts to promote human rights abroad have paradoxically undermined those rights in other countries The second edition brings the story up to date

including new sections on the second half of the Bush administration and the Iraq War and updates on Afghanistan The first edition of Bait and Switch won the American Political Science Association's 2005 Best Book on Human Rights **Military Medical Ethics: Sect. IV. Medical ethics in the military. Medical ethics on the battlefield: the crucible of military medical ethics**, 2003 Nonlethality and American Land Power: Strategic Context and Operational Concepts Douglas C. Lovelace, 1998 As great changes taking place in the global security environment American land power must be adapted to assure it can continue to protect and promote U S national interests This requires the development and integration of a range of new technologies concepts and organizations Among these nonlethality using armed force in a way that minimizes casualties shows promise for specialized applications To that end the authors discuss nonlethality of armed forces within its larger strategic context and explain how it is related to the revolution in military affairs They then assess the arguments for and against the integration of nonlethality into American doctrine and procedures Finally they offer operational concepts which could serve as the basis for doctrine and for tactics techniques and procedures Military Medical Ethics, Volume 2,

Bait and Switch Julie Mertus, 2013-06-17 Although our era is marked by human rights rhetoric human wrongs continue to be committed with impunity and the idea of human rights is becoming impoverished *Twenty-First Century Military Innovation* Marcus Schulzke, 2022-09-07 How the military actively reengineers for success on and off the battlefield The New Order of War Bob Brecher, 2010 At the Interface Probing the Boundaries seeks to encourage and promote cutting edge interdisciplinary and multi disciplinary projects and inquiry By bringing people together from differing contexts disciplines professions and vocations the aim is to engage in conversations that are innovative imaginative and creatively interactive

Weighing Lives in War Jens David Ohlin, Larry May, Claire Oakes Finkelstein, 2017 Weighing Lives in War examines the core principles of the modern law of war necessity proportionality and distinction and provides new and innovative insights into the process of weighing lives implicit in all theories of jus in bello *Weapons & Warfare* Salem Press, 2010 This work features 140 chronologically arranged overviews of the history of weaponry and military tactics from ancient times to the present global age Originally published in 2002 Weapons and Warfare is designed to meet the needs of students seeking information about weaponry tactics and models of warfare from ancient times to the present worldwide Written with the needs of students and general readers in mind the articles contained in this set present clear discussions of the topics explaining any terms or references that may be unclear The focus on the technical and strategic development of weapons and tactics more than on a narrative chronological history of events allows students of history political science science and technology alike to gain a broad understanding of the technological and strategic advances made over time and geography The new third volume adds the essential dimension of placing these topics in broad social cultural and ethical contexts Approximately 140 topics arranged chronologically and thematically with volume 1 Ancient and Medieval covering weapons and strategies from ancient times to 1500 volume 2 The Modern Era covering weapons and strategies from approximately

1500 to the present and volume 3 Warfare Cultural and Concepts providing valuable overviews of the way warfare weapons and military history have been expressed socially politically and in the arts Each essay ranges from 1 500 words to 7 000 words The first two volumes open with overviews of major weapons groups for example in volume 1 Clubs Maces and Slings Sieges and Siegecraft in volume 2 Swords Daggers and Bayonets Rockets Missiles and Nuclear Weapons followed by chronologically arranged sections covering major historical periods and regions of the world and their contributions to military weapons technologies and strategies Volume three touches on all sociocultural and political aspects of culture society science ethics and basic behind the battlefield theories strategies and policies The essays in this set are organized into three essay types Weapons overview articles are organized with sections on Nature and Use and Development of each weapons type The geographically arranged warfare articles feature sections on Political Considerations where relevant and on Military Achievement Weapons Uniforms and Armor Military Organization Doctrine Strategy and Tactics Warfare articles also feature a section on the primary sources from which historians base their observations and evaluates the best sources for understanding the warfare of the period Culture concept overviews new approach warfare and weaponry from several different perspectives sociological geographical cultural ritual political ethical religious tactical and strategic Perhaps the Stars Ada Palmer,2021-11-02 From the 2017 John W Campbell Award Winner for Best Writer Ada Palmer's Perhaps the Stars is the final book of the Hugo Award shortlisted Terra Ignota series World Peace turns into global civil war In the future the leaders of Hive nations nations without fixed location clandestinely committed nefarious deeds in order to maintain an outward semblance of utopian stability But the facade could only last so long The comforts of effortless global travel and worldwide abundance may have tempered humanity's darkest inclinations but conflict remains deeply rooted in the human psyche All it needed was a catalyst in form of special little boy to ignite half a millennium of repressed chaos Now war spreads throughout the globe splintering old alliances and awakening sleeping enmities All transportation systems are in ruins causing the tyranny of distance to fracture a long united Earth and threaten to obliterate everything the Hive system built With the arch criminal Mycroft nowhere to be found his successor Ninth Anonymous must not only chronicle the discord of war but attempt to restore order in a world spiraling closer to irreparable ruin The fate of a broken society hangs in the balance Is the key to salvation to remain Earth bound or perhaps to start anew throughout the far reaches of the stars At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied **Enemy Civilian Casualties** Ofer Fridman,2019-03-13 Civil casualties and collateral damage have been long considered as an undesired outcome of military activity that has to be reduced While most of the contemporary discourse on this topic has been primarily concentrating on three main factors the legal aspects of causing civil casualties the impact of war on local population and different factors of military professionalism required to avoid disproportional harm to civilians this book asks an entirely different question As the subject of civil casualties during military operations seems to be highly politicized this book takes

this discourse out of its usual niches and suggests that the indirect responsibility rests with the politicians and the public which they represent When a society in the beginning of the 21st century sends its troops to a battle does it really care about the enemy civilian casualties To answer this question this book traces the political and cultural factors that have led to the failure of Non Lethal Weapons the great promise of the 1990s which was intended to make the war significantly less lethal than it was known before Examining three different cases this study explains that the idea of minimizing civil casualties is no more than an illusion and in fact neither politicians nor societies feel really stressed to change this situation *National Security Challenges for the 21st Century* Williamson Murray, 2003 Officers who participated in the Advanced Strategic Art Program ASAP during their year at the U S Army War College wrote these chapters The ASAP is a unique program that offers selected students a rigorous course of instruction in theater strategy Solidly based in theory doctrine and history the program provides these students a rich professional experience that includes staff rides exercises and the best instructional expertise available The program is designed to provide the joint community with the military's best theater strategists The challenges facing the defense establishment in the United States at the beginning of the 21st century are daunting indeed however the thoughtful essays included in this volume including two award winners representing some of the thinking by students at the U S Army War College provide insights into these trials that will prove useful to policymakers both in and out of uniform

Asymmetries of Conflict John Leech, 2002 Decisions about defence and security are becoming increasingly open to public influence This book therefore aims to give both the voter and the decision maker a new vision of how to manage crises and avert hostilities with non traditional means

Routledge Handbook of Ethics and War Fritz Allhoff, Nicholas G. Evans, Adam Henschke, 2013-06-26 This new Handbook offers a comprehensive overview of contemporary extensions and alternatives to the just war tradition in the field of the ethics of war The modern history of just war has typically assumed the primacy of four particular elements jus ad bellum jus in bello the state actor and the soldier This book will put these four elements under close scrutiny and will explore how they fare given the following challenges What role do the traditional elements of jus ad bellum and jus in bello and the constituent principles that follow from this distinction play in modern warfare Do they adequately account for a normative theory of war What is the role of the state in warfare Is it or should it be the primary actor in just war theory Can a just war be understood simply as a response to territorial aggression between state actors or should other actions be accommodated under legitimate recourse to armed conflict Is the idea of combatant qua state employed soldier a valid ethical characterization of actors in modern warfare What role does the technological backdrop of modern warfare play in understanding and realizing just war theories Over the course of three key sections the contributors examine these challenges to the just war tradition in a way that invigorates existing discussions and generates new debate on topical and prospective issues in just war theory This book will be of great interest to students of just war theory war and ethics peace and conflict studies philosophy and security studies
