Destruction United States. Congress. Senate. Committee on Governmental Affairs. Permanent Subcommittee on Investigations, 1996 *The EU and the Non-Proliferation of Nuclear Weapons* S. Blavoukos, D. Bourantonis, C.

Portela, 2015-01-20 Much of the literature on the emerging role of the EU as a non proliferation actor has only a minimal engagement with theory This collection aims to rectify this by placing the role of the EU in the non proliferation of nuclear weapons within an analytical framework inspired by emerging literature on the performance of international organisations

Combating Weapons of Mass Destruction Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials International Law and the Proliferation of Weapons of Mass Destruction Daniel Joyner, 2009 Proliferation of WMD technologies is by no means a new concern for the international community Indeed since the signing of the Nuclear Non proliferation Treaty in 1968 tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of WMD sensitive materials within states

as well as their spread through the increasingly globalised channels of international trade to other states and non state actors However the intervention in 2003 by Western powers in Iraq has served as an illustration of the importance of greater understanding of and attention to this area of law as disagreements over its content and application have once again lead to a potentially destabilising armed intervention by members of the United Nations into the sovereign territory of another member state Other ongoing disputes between states regarding the character of obligations assumed under non proliferation treaty instruments and the effect of international organisations decisions in this area form some of the most contentious and potentially destabilising issues of foreign policy concern for many states This book provides a comprehensive analysis of international law and organisations in the area of WMD proliferation It will serve both as a reference for understanding the law as it currently exists in its political and economic context as well as an analysis of areas in which amendments to existing law and organisations are needed *The European Union's Nuclear Non-proliferation Policy* Manuel Herrera,2025-04-15

This book looks at European Union EU attempts to manage the risks associated with nuclear non proliferation and assesses its performance and external challenges The introductory section delves into current academic scholarship elucidating the concepts of contestation and performance The second section provides an overview of the historical and institutional evolution and the third scrutinizes the performance The final section examines present policy with case studies on the EU s bilateral relations with Iran and India Adopting a focus on both the development and performance of the EU s non proliferation and disarmament policy as well as its contestation from non Western countries this book provides a solid and innovative contribution to existing debates on both the EU s non proliferation and foreign policy The book will appeal to scholars researchers and practitioners of International Relations European Union Studies and Nuclear Non Proliferation as it provides an analysis of the intricacy of the EU s non proliferation policy offering fresh perspectives and empirical evidence

China, Arms Control, and Non-Proliferation Wendy Frieman,2014-04-08 China Arms Control and Non Proliferation is an empirically and conceptually path breaking book that documents China s participation in international arms control and non proliferation regimes from 1985 to 2001 The book focuses on the distinction between US expectations of Chinese compliance which China has not always met and international standards against which Chinese performance is acceptable This will be the standard staple work dealing with China and international arms control and will be invaluable to those dealing with Chinese security studies foreign policy international relations and arms control and disarmament **Nuclear**

Nuclear Nonproliferation Phillip Margulies,2008 History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of this timely issue Nuclear Nonproliferation explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia North Korea

Nonproliferation - Challenges Old and New Brad Roberts,2004 Since the advent of the nuclear era in 1945 Americans and others have been debating whether or how it might be possible to prevent the proliferation of nuclear and other weapons of mass destruction WMD As each new proliferation challenge has emerged debate about the shortcomings of the various policy tools for coping with proliferation has intensified These debates have grown only more intense in the last ten to fifteen years Despite such debates American presidents have steered a fairly consistent course promoting nonproliferation innovating along the way while also coping with its periodic failures The end of the Cold War seemed to make new things possible for nonproliferation with the promise of even more cooperation between East and West on specific proliferation challenges And the Persian Gulf War of 1990 91 seemed to make new things necessary as the United States faced the first regional war under the shadow of weapons of mass destruction First President George H W Bush and then President William Clinton committed the federal government to significant political efforts to strengthen the tools of nonproliferation policy
