Nonverbal Communication Readings With Co:

As Others See Us Ellen Goldman, 2004 *As Others See Us* first published in 1994 by Gordon Breach is a book designed to introduce the reader to a new way of thinking about the movements both conscious and unconscious that we make every day and every second of our lives Goldman describes the human experience as a continuous stream of body movements though we are only aware of a small fraction of the more obvious and intrusive physical acts The aim of this book is first to increase awareness of the subtleties and complexities of our body language and then to encourage the reader to perceive these intricacies in their own movements and in those of others Finally with a more complete understanding and appreciation for the power of body language and non verbal communication one can achieve a deeper connection between physical and intellectual spheres to allow for a fuller and more engaging experience of communication and expression This new knowledge of the human body s movements not only permits one to more accurately perceive the emotions and thoughts of others but can allow a glimpse into one s own mind to see how we present ourselves to the world and whether our thoughts are in sync with our actions Central to the text is the author s treatment of the Integrated Movement a term used to describe the merger of a posture and a gesture with a consistent quality dynamic or shape This approach to understanding and explaining human movement offers a unique way of thinking about conscious gesture unconscious body language and verbal speech as interconnected communication a synthesis that allows for a more complete view of ourselves and others around us The structure of the book follows a logical framework that mirrors the progress of the reader from perception of movement to the close inspection of gesture and body language to the introduction and experience of Integrated Movement to the application of one s new awareness to different aspects of life Biographical sketches of leading figures in the field are included as are suggestions for additional reading and resources Perhaps the most unique feature of the book are the personal exercises boxed off text that appear on almost every other page These exercises are designed to allow the reader to experience the power of body language in real life situations while working towards the increased awareness and perception that is the goal of the book
