**The Noose of Laurels** Wally Herbert, 1989      **Muskox Land** Lyle Dick, 2001 Muskox Land provides a meticulously researched and richly illustrated treatment of Canada's High Arctic as it interweaves insights from historiography Native studies ecology anthropology and polar exploration      Globalizing Polar Science R. Launius, J. Fleming, D. DeVorkin, 2010-11-22 The International Polar Years and the International Geophysical Year represented a remarkable international collaborative scientific effort that has been largely neglected by historians This groundbreaking collection seeks to redress that neglect and illuminate critical aspects of the last 150 years of international scientific endeavour      Maritime Claims in the Arctic Erik Franckx, 2023-12-28 With the fundamental changes which occurred in the political structure of Europe and improved East West relations in general the Arctic has increasingly become the focal point of international attention during the last few years Scientific research and environmental protection are areas which have already witnessed some form of international cooperation in the area With this particular evolution in mind a new look at the legal regime of navigation in the Arctic seems to be justified While several other countries border on the Arctic Canada and Russia have the most extensive shorelines and have shown keen interest in ensuring that their proper share of this area is not encroached by other countries This book is thus generally restricted to an examination of the maritime boundaries that these states are claiming and the extent to which other states have recognized them It also explores the need for greater international cooperation in this area not only between the two main contenders but also with other countries that have shown a special interest in Arctic navigation and in the exploitation of resources of this area      **Nineteenth-Century Travels, Explorations and Empires, Part I Vol 1** Peter J Kitson, William Baker, Indira Ghose, Susan Schoenbauer Thurin, 2021-11-18 A collection of writings on travels undertaken in the Victorian era The texts collected in these volumes show how 19th century travel literature served the interests of empire by promoting British political and economic values that translated into manufacturing goods      1912 Chris Turney, 2012-11-02 The South Pole discovered trumpeted the front page of The Daily Chronicle on March 8 1912 marking Roald Amundsen's triumph over the tragic Robert Scott Yet behind all the headlines there was a much bigger story Antarctica was awash with expeditions In 1912 five separate teams representing the old and new world were diligently embarking on scientific exploration beyond the edge of the known planet Their discoveries not only enthralled the world but changed our understanding of the planet forever Tales of endurance self sacrifice and technological innovation laid the foundations for modern scientific exploration and inspired future generations To celebrate the centenary of this groundbreaking work 1912 The Year the World Discovered Antarctica revisits the exploits of these different expeditions Looking beyond the personalities and drawing on his own polar experience Chris Turney shows how their discoveries marked the dawn of a new age in our understanding of the natural world He makes use of original and exclusive unpublished archival material and weaves in the latest scientific findings to show how we might reawaken the

public's passion for discovery and exploration      **The Magnetic North** Sara Wheeler, 2011-02-01 More than a decade ago Sara Wheeler traveled to Antarctica to understand a continent nearly lost to myth and lore In the widely acclaimed bestselling *Terra Incognita* she chronicled her quest to find a hidden history buried in Antarctica's extreme surroundings Now Wheeler journeys to the opposite pole to create a definitive picture of life on the fringes In *The Magnetic North* she takes full measure of the Arctic at once the most pristine place on earth and the locus of global warming Inspired by the spiraling shape of a reindeer horn bangle she travels counterclockwise around the North Pole through the territories belonging to Russia the United States Canada Denmark Norway and Finland marking the transformations of what once seemed an unchangeable landscape As she witnesses the mounting pollution concentrated at the pole Wheeler reckons with the illness of the whole organism of the earth Smashing through the Arctic Ocean with the crew of a Russian icebreaker shadowing the endless Trans Alaska Pipeline with a tough Idaho born outdoorswoman herding reindeer with the Lapps and visiting the haunting deceptively peaceful lands of the Gulag Wheeler brings the Arctic's many contradictions to life *The Magnetic North* is an urgent beautiful book rich in dramatic description and vivid reporting It is a singular deeply personal portrait of a region growing daily in global importance      [The Mammoth Book of Polar Journeys](#) Jon E. Lewis, 2011-08-04 Exerting a magnetic pull our imaginations the poles have been the object of many gripping first hand accounts of exploration literally journeys to the ends of the earth A passport to the last wildernesses of Earth this is the definitive collection of first hand accounts of polar exploration 50 true stories of intrepid travel through the desolate and dangerous regions of both Arctic and Antarctic Beginning with Sir John Franklin's starvation trek through Alaska in 1821 and ending with Vassilli Gorshkovsky's northern expedition aboard a creaking ice breaker in 2005 these true stories encompass every kind of triumph and disaster The inspired but doomed courage of Captain Scott and the marvellous leadership of Shackleton are well known but here are many other stories including *The Bear* by Frederick A Cook 1908 *Meeting with Polar Eskimos* by Knud Rasmussen 1932 *By Dog Sledge to the Top of the World* by Wally Herbert 1968 *Hell on Earth* by Reinhold Messner 1989 90 *Solo* by Pen Hadow 2003 And many more      [Before the Heroes Came](#) T. H. Baughman, 1999-09-01 Although the Antarctic ice pack and some offshore islands had been sighted and even landed upon briefly as early as the 1820s it was not until an eccentric Anglo Norwegian explorer Carsten F Borchgrevink went ashore in 1895 that a human being set foot on the Antarctic continent Borchgrevink snubbed by the British establishment had stolen a march on several planned competing expeditions from Germany and Scandinavia Borchgrevink returned to Antarctica in 1899 with a party that was the first to winter over on the continent Regrettably bad weather and unscalable mountains limited their forays inland Borchgrevink's survival was proof that with adequate supplies the Antarctic winter was survivable and that with a better geographic position the enormous unknown of the continent could be investigated Borchgrevink galvanized the British geographical authorities who had come to consider polar exploration their exclusive province Led by Sir Clements Markham of the Royal Geographic

Society the British keenly felt his blow to their national pride delivered by an explorer they regarded as an arrogant upstart The RGS pushed forward with its plans and a tragic competition to be the first to reach the South Pole was set in motion between the British and the Scandinavians This work is an account of the first tentative human gropings in Antarctica concentrating on the coalescing of official and popular attitudes that later resulted in the polar races of Robert Falcon Scott and Roald Amundsen which dominate the story of the Heroic Era of Antarctic exploration from 1901 to 1922 A Fabulous Kingdom Charles Officer, Jake Page, 2012-05-30 The second edition of A Fabulous Kingdom will explain the history of the arctic and describe the current scientific and environmental issues that threaten this fascinating region *The Great Journeys in History* Robin Hanbury-Tenison, 2021-05-04 A lively collection of the adventurous stories of the greatest explorers in history Ferdinand Magellan Genghis Khan Thor Heyerdahl Amelia Earhart and Neil Armstrong these are some of the greatest travelers of all time This book chronicles their stories and many more describing epic voyages from early trips through the great port city of Alexandria to the latest journeys into space In antiquity we follow Alexander the Great to the Indus and Hannibal across the Alps in medieval times we trek beside Genghis Khan and Ibn Battuta The Renaissance eventually led to Columbus visiting the Americas and to the circumnavigation of the world In the following centuries global maps are filled in by Abel Tasman Vitus Bering and James Cook Journeys specifically made for scientific discoveries most famously by Alexander von Humboldt and Charles Darwin begin In modern times the ends of the earth were reached including both poles and the world's highest mountain Editor Robin Hanbury Tenison leads an incredible team of fifty two contributors including Robert Ballard and Ranulph Fiennes who relate firsthand experiences with the journeys and places they describe The Great Journeys in History chronicles the stories of bold early travelers who explored the unexplored and who set out into the unknown bringing alive the romance and thrill of adventure *The Arctic* Paul Simpson-Housley, 1996-09-09 This book seeks to provide illustrations of Arctic mysteries and fictions which often occur as a result of misconceptions of Arctic geography The chapters are extremely varied in subject matter and conclusions are in the domain of speculation The book begins with very early examples of northern travels starting with the probable adventures of Pytheas the Greek Brendan the Irish monk and the four medieval odysseys of Adam of Bremen Nicolas of Lynn Prince Henry Sinclair and Zeno of Venice No account of polar enigmas would be complete without reference to the Franklin expedition the possible fate of his lost ships and the debate over whether his men committed cannibalism The book concludes with a deliberation on whether Cook or Perry actually did reach the North Pole hinting that perhaps neither of them reached their objective *Exploring Polar Frontiers* William James Mills, 2003-12-11 Covers the entire history of Arctic and Antarctic exploration from the voyage of Pytheas ca 325 B C to the present in one convenient comprehensive reference resource Exploring Polar Frontiers A Historical Encyclopedia is the only reference work that provides a comprehensive history of polar exploration from the ancient period through the present day The author is a noted polar scholar and offers dramatic accounts

of all major explorers and their expeditions together with separate exploration histories for specific islands regions and uncharted waters He presents a wealth of fascinating information under a variety of subject entries including methods of transport myths achievements and record breaking activities By approaching polar exploration biographically geographically and topically Mills reveals a number of intriguing connections between the various explorers their patrons and times and the process of discovery in all areas of the polar regions Furthermore he provides the reader with a clear understanding of the intellectual climate as well as the dominant social economic and political forces surrounding each expedition Readers will learn why the journeys were undertaken not just where when and how
