Homely Atmospheres and Lighting Technologies in Denmark Mikkel Bille, 2020-05-26 Using case studies such as the use of candlelight and energy saving lightbulbs in Denmark this book unravels light's place at the heart of social life. In contrast to common perception of light as a technical and aesthetic phenomenon Mikkel Bille argues that there is a cultural and social logic to lighting practices. By empirically investigating the social role of lighting in people's everyday lives Mikkel Bille reveals how and why people visually shape their homes. Moving beyond the impact of its use Bille also comments on the politics of lighting to examine how ideas of pollution and home act as barriers for technological fixes to curb energy demand. Attitudes to these issues are reflective of how human perceptions and practices are central to the efforts to cope with climate change. This ethnographic study is a must read for students of anthropology, cultural studies, human geography, sociology and design.

Work Organisation in Practice P-O Börnfelt, 2023-05-27 This textbook provides an overview of organisation models used in practice from over a century ago to the present day. It outlines the effects these models have on efficiency, learning, innovation and workers' health and offers critical reflections for students. Some of the models covered are Taylorism, bureaucracy, the socio-technical school, process organisation such as lean production, learning organisations, knowledge management, project organising including agile, platform economy, professional organisations, new public management and sustainable organisations. Featuring learning objectives and reflective questions for students of organisation studies and design, this textbook has a pedagogical structure based on the division of work and the coordination of work. Conclusions are presented on contemporary work organisation models' impact on working life, ultimately encouraging students to ask the question: how can we create more sustainable work organisations?

Animation in Europe Rolf Giesen, 2022-08-24 There is a lot one could say about animation in Europe, but above all there is no consistent European animation. It is as disparate as the various countries involved. Audiences will certainly recognize American or Japanese animation, but in Europe it can range from Czech, Polish and Hungarian to Greek, Italian, Spanish, Portuguese, French and British. Animation in Europe provides a comprehensive review of the history and current situation of animation in over 20 European countries. It features numerous interviews with artists and producers, including rare documents and firsthand accounts that illustrate the rich history of animation in Europe. Additional features include an extensive chronology with key events in European animation, a Who's Who of producers, directors, writers and animators working in Europe, an examination of the origin of European animation and its influence. Animation in Europe is the first book devoted entirely to this topic and therefore will be of value for animation buffs as well as practitioners and researchers.

Dynamics in Education Politics Hannu Simola, Jaakko Kauko, Janne Varjo, Mira Kalalahti, Fritjof Sahlstrom, 2017-03-16 *Dynamics in Education Politics* Understanding and Explaining the Finnish Case introduces a new theoretical framework characterised as Comparative Analytics of Dynamics in Education Politics CADEP Albeit the topicality of comparative research is obvious in the current era of global large scale assessment with its concomitant media visibility and political effects comparative education is still suffering from certain methodological deficits and is in need of robust theorisation Focusing on relational dynamics between policy threads actors and institutions in education politics CADEP seriously considers the phenomena of complexity contingency and trans nationality in late modern societies In this book CADEP is applied and validated in analysing the Finnish Educational Miracle that has been attracting attention in the

educational world ever since they rocketed to fame following the PISA studies during the 2000s This book will open up opportunities for mutual understanding and learning rather than just celebrating the exceptional circumstances or sustainable leadership Areas covered include The analytics of dynamics in education politics The dynamics of policy making and governance The dynamics of educational family strategies The dynamics of classroom culture It is vital for humankind to be able to learn from each other s successes and failures and this applies in education too This book is thus a valuable read for anyone interested in the education system and wanting to shape the learning environment *Leadership Across the Globe* Vipin Gupta, Montgomery Van Wart, 2015-07-16 Leadership Across the Globe aims to serve a growing interest in how to lead in a global or cross cultural environment This book focuses on the corporate setting with illustrations theories and evidence from various regions around the world The book includes coverage of culture and diversity issues in leadership as well as a comprehensive detailed exploration of the comparative aspects of leadership Generously illustrated with cases boxed profiles figures and examples from a wide range of organizations this is a relevant resource for anyone seeking a leadership career on a global scale in multinational enterprises or in a multi cultural context *Class Boundaries in Europe* Cédric Hugrée, Étienne Penissat, Alexis Spire, Johs. Hjellbrekke, 2022-11-30 Drawing inspiration from Pierre Bourdieu s social space theory this book provides an unprecedented overview of class relations covering topics such as class polarisation cultural reproduction political orientations and globalisation The book applies Bourdieusian social space approach to show how class boundaries have been maintained or transformed in different European countries Based on quantitative data it proposes a renewal of the analysis of distances divides and relations of domination between social classes documenting objective and symbolic boundaries that form the basis of individuals living and working conditions in 11 European countries Focusing on transformations of wealth inequalities education strategies and European labour markets the book examines the role of cultural economic and social capital It will be of interest to students and scholars across the social sciences in particular to those studying social and wealth inequalities in a comparative perspective and Master s students in European studies

The Cultural and Social Foundations of Educational Leadership Romuald Normand, Leif Moos, Min Liu, Pierre Tulowitzki, 2021-07-12 This book identifies the cultural and moral foundations of country specific educational governance and school leadership and presents the principles of justice and the diversity of common goods that guide leadership practices in schools It contributes to an existing research field that studies diversity and ethical leadership in schools The social dimension of school leadership is not limited to issues related to equality and equity or social inclusion The capacity of leaders to promote civic mindedness and social cooperation consensus and acceptance of others the right balance between freedom and duties and reciprocity of obligations are essential to maintain democratic rights and facilitate the life together while respecting ethnic and cultural differences Therefore the book gathers contributions from a range of international authors capable of reporting these moral and cultural features while broadening the research perspectives on school

leadership *Decolonial Sweden* Michael McEachrane, Louis Faye, 2024-12-16 *Decolonial Sweden* exposes the social and political relevance of European colonialism to Sweden and its place in the world. It is a book that points to why and how Sweden is to be included in global decolonial struggles. Sweden is often displayed as an ethnoracially homogenous country without any colonial history, an open and tolerant human rights champion, anti-racist, anti-colonial, and in solidarity with the Global South. For over twenty years, authors Michael McEachrane and Louis Faye have been challenging this account, pointing to Sweden's involvement in colonial histories and legacies, its racialized nationhood, and embedded colonial structures. This important new book reflects a decolonial turn in research, emphasizing that coloniality is far from over and that challenging global injustices remains an unfinished and open-ended process. Chapters in the book consider the resistance of the Sami people to Swedish colonialism, whether Sweden owes the Caribbean reparations for its colonization of Saint Barthélemy, and involvement in the transatlantic trade. Sweden's involvement in a colonial global economy and how white European identification is embedded in Swedish politics, nation building, and society. Engaging and insightful. *Decolonial Sweden* invites readers to reconsider Swedish attitudes toward race, colonialism, and international relations. This book is an essential read for Post and Decolonial scholars and students of Critical Race Studies, Critical Indigenous Studies, Africana Studies, International Relations, Global Development, and Political Science, as well as for anyone interested in Sweden's place in the world.

The Cambridge International Handbook of Lean Production Thomas Janoski, Darina Lepadatu, 2021-03-11 This handbook focuses on two sides of the lean production debate that rarely interact. On the one hand, management and industrial engineering scholars have presented a positive view of lean production as the epitome of efficiency and quality. On the other hand, sociology, industrial relations, and labor relations scholars focus on work speedups, management by stress, trade union positions, and self-exploitation in lean teams. The editors of this volume understand the merits of both views and present them accordingly, bridging the gaps among five disciplines and presenting the best of each perspective. Chapters by internationally acclaimed authors examine the positive, negative, and neutral possible effects of lean, providing a global view of lean production while adjusting lean to the cultural and political contexts of different nation-states. As the first multi-lens view of lean production from academic and consultant perspectives, this volume charts a way forward in the world of work and management in our global economy.

The Finnish Education Mystery Hannu Simola, 2014-11-20 Finnish education has been a focus of global interest since its first PISA success in 2001. After years of superficial celebration, astonishment, and educational tourism, the focus has recently shifted to what is possibly the most interesting element of this Finnish success story: that Finnish schools have been effectively applying methods that go against the flow of global education policy, with no testing, no inspection, no hard evaluation, no detailed national curriculum, no accountability, and no hard competition. From a historical and sociological perspective, the Finnish case is not merely a linear success story but is part of a controversial and paradoxical struggle towards Utopia, towards egalitarian schooling. Bringing together a collection of essays by Hannu Simola

and his colleagues this book analyses the key dimensions of schooling in Finland to provide a critical analytical and uncompromising picture of the Finnish education system Going beyond the story of success the book reveals the complexities of educational change but also identifies opportunities and alternatives for smart political action in complex and trans national societies Including a selection of key chapters on Finnish education policy and governance teacher education and classroom cultures the book will be of interest to researchers academics and postgraduate students in comparative education teacher education educational policy and educational reform *Education in Political Science* Anja P. Jakobi, Kerstin Martens, Klaus Dieter Wolf, 2009-09-10 This pioneering volume is devoted to the analysis of education from the perspective of political science applying the full range of the discipline s analytical perspectives and methodological tools The contributions demonstrate how education policy can be explored systematically from a variety of political science perspectives comparative politics public policy analysis and public administration international relations and political theory By applying a governance perspective on education policy the authors explore the changing institutional settings new actors constellations horizontal modes of interaction and public private regulatory mechanisms with respect to the role of the state in this policy field The volume deals with questions that are not merely concerned with the content or outcomes of education but it explicitly takes a political science view on how education politics work Including country case studies from the Americas and across Europe institutional analyses of education policy in the EU and the WTO GATS as well as normative reflections on the topic the volume provides a grand overview on the diversity of issues in education policy Dealing with a so far neglected field of policy this book provides a comprehensive and accessible analysis of a rapidly changing topic *Education in Political Science* will be of interest to scholars and students of political science education sociology and economics
