Nordic World:

International Sport Richard William Cox, 2004 There has been an explosion in the quantity of sports history literature published in recent years making it increasingly difficult to keep abreast of developments The annual number of publications has increased from around 250 to 1 000 a year over the last decade This is due in part to the fact that during the late 1980s and 90s many clubs leagues and governing bodies of sport have celebrated their centenaries and produced histories to mark this occasion and commemorate their achievements It is also the result of the growing popularity and realisation of the importance of sport history research within academe This international bibliography of books articles conference proceedings and essays in the English language is a one stop for the sports historian to know what is new *Ski*, 1984-12

Ski, 1985-02 ***Ski***, 1984-03 ***Ski***, 1982-09 ***Fascists of the World, Unite?*** Martin Kristoffer Hamre, 2025-08-04 This book analyzes the ideas and forms of international cooperation between Fascist Italy Nazi Germany and fascist movements from Denmark Norway Sweden Switzerland Ireland and Britain The study examines how fascists attempted to unite across borders by forming international organizations and networks hosting conferences and exhibitions disseminating multilingual publications and exchanging propaganda Their transnational cooperation was fuelled by shared ideas of ultranationalism anti liberalism anti communism antisemitism racism white supremacism and Europeanism The book argues that fascist internationalism marked by contradictions limitations and an Italo German rivalry emerged in the 1930s as a counter reaction to liberal and communist internationalism The epilogue discusses reverberations in the Second World War and the postwar period and outlines the relevance of this history for understanding contemporary forms of far right internationalism *Ski*, 1977-09 *Nordic Utopias and Dystopias* Pia Maria Ahlbäck, Jouni Teittinen, Maria

Lassén-Seger, 2022-11-24 The Nordic countries have long been subject to certain idealised even utopian imaginaries particularly with regard to images of pristine nature and the societal ideals of democracy equality and education On the other hand such projections inevitably invite dissent irony and intimations of the utopia s dark underside Things may yet take or may have already taken a dystopic course The present volume offers twelve contributions on utopias and dystopias in Nordic literature and culture Geographically the articles cover the Nordic countries of Denmark Finland Norway and Sweden as well as the autonomous area of Greenland Through the articles varied subjects ranging from avant garde literature and long poems to noir TV series young adult fiction popular historiography and political discourse in literature outside of Norden the volume brings forth a historically rich multi layered picture of social cultural and environmental imagination in the Nordic countries *Nordic Utopias and Dystopias* is thus of interest not only to specialists in dystopian and utopian research but more broadly to scholars of literature and culture and the political and social sciences especially but not exclusively in the Nordic context *Ski*, 1985-03 *Ski Jumping in Washington State: A Nordic Tradition* John W. Lundin, 2021 Ski jumping once Washington s most popular winter sport was introduced by Norwegian immigrants in the early twentieth century It began at

Spokane's Browne's Mountain and Seattle's Queen Anne Hill moved to midsummer tournaments on Mount Rainier in 1917 and expanded statewide as new ski clubs formed. Washington tournaments attracted the world's best jumpers Birger and Sigurd Ruud, Alf Engen, Sigurd Ulland and Reidar Andersen among others. In 1941 Torger Tokle set two national distance records here in just three weeks. Regional ski areas hosted national and international championships as well as Olympic tryouts entertaining spectators until Leavenworth's last tournament in 1978. Lawyer, historian and award-winning author John W. Lundin re-creates the excitement of this nearly forgotten ski jumping heritage. *Skiing*, 1982-10 **Ski**, 1985-04

Skiing Heritage Journal, 2007-09 Skiing Heritage is a quarterly Journal of original entertaining and informative feature articles on skiing history. Published by the International Skiing History Association, its contents support ISHA's mission to preserve skiing history and to increase awareness of the sport's heritage. **Urban Heritage in Europe** Gábor Sonkoly, 2023-04-17 Urban heritage, which is part of the conceptual expansion of cultural heritage, has become an extraordinarily complex notion. Any aspect of urban life and experience can become heritage, and this heritage is then continuously reinterpreted and exploited as a source not only for a city's identification but also for its cultural and economic innovation. This book provides a detailed overview of Central European urban heritage. It examines the key aspects of urban heritage: tangible, monumental, natural, landscape, world heritage, urban quarter and heritage experience, dark heritage. The regimes of urban heritage approach retraces 200 years of the development of European urban heritage to understand how it has become so significant and how it could integrate practically every area of urban existence. The novelty of the book is the interpretation of this development as a process of successive and integrating regimes, which are examined through the changing urban heritage agency and discourse. Through the examples of European cities and towns such as Belgrade, Budapest, Gdansk, Krakow, Ljubljana, Subotica, Szentendre, Vienna, but also Edinburgh, Nordic cities and Rome, these changes reveal their inner complexities and become comparable in an interdisciplinary analysis. Further, a particular aspect of the history of these cities is revealed through the development of their own urban heritage. The book is primarily aimed at academics, researchers and postgraduate students of cultural and economic geography, cultural history, culture and heritage management, modern and contemporary history, as well as urban history, planning and sociology. *Backpacker*, 1974 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine and the only magazine whose editors personally test the hiking trails, camping gear and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor industry awards are measured. **The Story of Modern Skiing** John Fry, 2017-03-14 This is the definitive history of the sport that has exhilarated and infatuated about 30 million Americans and Canadians over the course of the last fifty years. Consummate insider John Fry chronicles the rise of a ski culture and every aspect of the sport's

development including the emergence of the mega resort and advances in equipment technique instruction and competition The Story of Modern Skiing is laced with revelations from the author s personal relationships with skiing greats such as triple Olympic gold medalists Toni Sailer and Jean Claude Killy double gold medalist and environmental champion Andrea Mead Lawrence first women s World Cup winner Nancy Greene World Alpine champion Billy Kidd Sarajevo gold and silver medalists Phil and Steve Mahre and industry pioneers such as Vail founder Pete Seibert metal ski designer Howard Head and plastic boot inventor Bob Lange Fry writes authoritatively of alpine skiing in North America and Europe of Nordic skiing and of newer variations in the sport freestyle skiing snowboarding and extreme skiing He looks closely at skiing s relationship to the environment its portrayal in the media and its response to social and economic change Maps locating major resorts records of ski champions and a timeline bibliography glossary and index of names and places make this the definitive work on modern skiing Skiers of all ages and abilities will revel in this lively tale of their sport s heritage **Perceptions of**

Sustainability in Heritage Studies Marie-Theres Albert,2015-07-01 With contributions Francesco Bandarin Minja Yang and Mechthild R ssler This publication is the fourth in the Heritage Studies series and aims to reflect upon the many dimensions of sustainability and sustainable development within the Heritage Studies discourse Sustainability as a concept and sustainable development as a goal are presented in official policies within UNESCO s understanding of heritage in its paradigmatic reflections and in the diversity of theories and methods including many different and sometimes conflicting understandings of sustainability within this discourse Thus the contributors to this publication discuss sustainability as it directly concerns the potential of different approaches to World Heritage and Intangible Heritage The inclusion of the four dimensions of sustainability environmental economic social and cultural into the Heritage Studies discourse opens a new perspective on the discourse itself *Old Norse Folklore* Stephen A. Mitchell,2025-02-15 The second volume of Old Norse

Folklore explores medieval and early modern Nordic magic and witchcraft covering syncretism continuity survival and the reconstruction of pagan beliefs and cultic practices in this last area of western Europe to be Christianized This volume not only considers these issues but also pulls back the curtain on more obscure yet important corners of Nordic magico religious tradition In these chapters Stephen A Mitchell draws on materials from many different periods of the vast Nordic world stretching from Greenland to the Baltic and examines such diverse witnesses as sagas judicial records ballads synodal statutes runes proverbs church murals leechbooks and the language used to discuss magic and its actors Old Norse Folklore addresses how theology helped to shape the Nordic magical world and how language can reveal this world how magic was used as a practical matter in and what it meant philosophically to the medieval Nordic world and how inherited traditions between and among the historically connected societies of northern Europe impacted cultural developments in late medieval Scandinavia Economies that Mimic Life Joseph Bragdon,2021-03-03 The world economy today is at an historical inflection

point The neoclassical industrial model of economics is self destructing while a new life mimicking model based on radically

different assumptions is emerging Although rarely acknowledged in economic journals Nordic countries which pioneered the life mimicking model have become world leaders in prosperity and productivity while those operating on the older neoclassical industrial model are trapped in downward spirals By approaching economies as sub systems of life rather than super systems that transcend life we gain transformative insights Such thinking led to the first circular economy experiments in Kalundborg Denmark during the 1970s then quickly spread to the rest of the Nordic world By placing a higher value on living assets people and Nature than on non living capital assets this approach generates harmony rather than exploitation and conflict Because Nordic people feel vested in the system and responsible for its success they are extraordinarily innovative and productive That is why Nordic companies are regularly rated among the world s most sustainable and profitable in their fields even though their region holds less than half of one percent of the world s population Written in an accessible way for non economists the book is ideal for readers interested in the benefits of biomimicry and methods of guiding democratic countries along a proven path of self renewal Economies That Mimic Life will also provide useful background for corporate leaders in scenario planning and strategic thinking Knowing which way the political economic wind is blowing will become increasingly important to corporate survival

On the Legacy of Lutheranism in Finland Kaius Sinnemäki, Anneli Portman, Jouni Tilli, Robert H. Nelson, 2019-12-10 This volume analyses the societal legacy of Lutheranism in Finland in broad terms It contributes to the recent renewed interest in the history of religion in Finland and the Nordic countries by bringing together researchers in history political science economics social psychology education linguistics media studies and theology to examine the mutual relationship between Lutheranism and society in Finland The two main foci are i the historical effects of the Reformation and its aftermath on societal structures and on national identity values linguistic culture education and the economy and ii the adaptation of the church and its theology to changes in the geo political and sociocultural context Important sub themes include nationalism and religion the secularization and institutionalization of traditional values multiple Protestant ethics and long continuities in history Overall the book argues that large changes in societies cannot be explained via secular factors alone such as economic development or urbanization but that factors pertaining to religion provide substantial explanatory power for understanding societal change and the resulting societal structures
